Urban Politics Myron A. Levine, Heywood T. Sanders, 2025-03-31 Urban Politics brings together the classic and

contemporary literature on urban politics and history with today's pressing urban issues. This book's central theme is power going beyond the formal institutions and structures of city and suburban government to explain who defines the urban agenda and who benefits from local services and investments. This book also presents a number of subthemes including the impact of globalization, the dominant place of economic development concerns in the urban agenda, and the continuing importance of race and poverty in big city and suburban politics. It also places cities in the larger context of state and federal government politics and policies and discusses the impact of those policies. Urban Politics seeks to engage students with photographs, real world case studies, and boxed material that employs films, video, television shows, and popular music to illustrate how urban politics works. Urban Politics has been updated and revised to reflect the complex circumstances of both urban success stories and the difficult realities of cities left behind, and to add new material on concentrated poverty, climate change, and the impacts of the COVID-19 pandemic. The 11th edition of Urban Politics is an ideal introductory text for students of urban, suburban, and regional politics and policy. This book's coverage of contemporary issues, urban bureaucracy, policy analysis, and intergovernmental relations also makes it an effective textbook for classes in urban administration and planning. City-County Consolidation and Its Alternatives: Reshaping the Local Government Landscape J.B. Carr, Richard C. Feiock, 2016-07-08. City-county consolidation builds upon the Progressive tradition of favoring structural reform of local governments. This volume looks at some important issues confronting contemporary efforts to consolidate governments and develops a theoretical approach to understanding both the motivations for pursuing consolidation and the way the rules guiding the process shape the outcome. Individual chapters consider the push for city-county consolidation and the current context in which such decisions are debated, along with several alternatives to city-county consolidation. The transaction costs of city-county consolidation are compared against the costs of municipal annexation, interlocal agreements, and the use of special district governments to achieve the desired consolidation of services. The final chapters compare competing perspectives for and against consolidation and put together some of the pieces of an explanatory theory of local government consolidation.
