Regional Economic Policy:

Regional Economic Policy Frank J. B. Stilwell, 1972 **Regional Development and Economic Growth** Canada. Department of Regional Economic Expansion, N. G. Pillai, 1970 **Regional Economic Development** Robert J. Stimson, Roger R. Stough, Brian H. Roberts, 2006-10-12 The completely reedited second edition of this book reflects recent advances and adds insightful new material The book analyzes regional economic performance and change and discusses how analysis integrates with strategies for local and regional economic development policy and planning The aim is to provide the reader with an account of quantitative and qualitative approaches to regional economic analysis and of old and new strategic frameworks for formulating regional economic development planning *Regional Analysis and Regional Policy* William H. Miernyk, 1982 Regional Economic Development in the United States United States. Economic Development Administration. Office of Policy Coordination, 1967 Regional Economic Development Gordon C. Cameron, 2015-09-16 First published in 1970 *Regional Economic Development The Federal Role* examines the economic viability of depressed areas and regions This book questions whether there is adequate justification on national economic grounds for Federal involvement with distressed area revitalisation and looks at the main guidelines for intervention in relation to typology of distressed areas This title is an ideal resource for students interested in politics macroeconomics and federal policies concerning the revitalisation of distressed areas and economies **Regional Economic Development and Policy** David Pinder, 2017-09-05 Originally published in 1983 when Europe's economies were facing the worst recession since the 1930s this book reviews the outcome of a quarter of a century of research and practical experience in the field of regional economic management In the spatial context of the European Community the author explores central issues by integrating the results of his own research with those of economists geographers economic historians and psychologists It provides a wide survey of the subject demonstrates the complexity of the spatial economic systems which the regional economic planner seeks to modify analyses the strategies for regional development employed by national and international agencies and offers a substantial annotated bibliography Contradictions arising from the contrasting spatial perspectives of national governments and the European Commission are emphasised Among other things it concludes that many regional problems strongly reflect perception and behavioural factors as well as purely economic constraints **Government Measures for the Promotion of Regional Economic Development** International Information Centre for Local Credit, 2014-10-05 The International Information Centre for Local Credit with the assistance of member banks carries out investigations in different countries and publishes the results The present study relates to the problem of the unequal economic social and cultural development of different areas in the world Particularly since the second world war this problem has been recognized as being of major importance While initially it was the differences in development between different countries which attracted almost all the attention for a number of years now an increasing interest has been apparent in the differences in level of development

between specific regions in individual countries This growing realization of the problem with regard to the varying levels of development which could exist within one and the same country found expression for instance in the International Union of Local Authorities congress held at Tel Aviv in 1961 which was devoted to the task of local authorities in development areas The increasing interest in these problems was also evidenced in other quarters the Conference for Regional Economy of the European Economic Community being held in Brussels in the same year From these conferences and also from many other indications as well it became clear that the problem of regional economic development today stands high on the priority list of questions of policy for many governments and that in general there is a great need for information on how the problem is being tackled in other countries

Meeting - Federal Advisory Council on Regional Economic Development Federal Advisory Council on Regional Economic Development (U.S.),1978 *Regional Economic Development and State Economic Policy* Scott Alan Lindall,1985 *The New Regional Economies* William R. Barnes,Larry C. Ledebur,1998 The politics and economics of the United States are wedded in the political economy of the nation state and the nationalist economic policies This nationalist paradigm is however showing the following signs of fatigue the role of the nation state is diminishing as the economy globalizes US national accounting systems are less effective technology forces change trading blocs are emerging there is less control of exchange rates regional economies are restructuring and competitive environments are changing This book proposes that political jurisdictions are not economies but polities and explores the complex and important economic implications of this thesis

Regional Economic Policy and Its Analysis Harvey Armstrong,Jim Taylor,1982 *Regional Economic Development in the United States: Chap. 5-8* United States. Economic Development Administration. Office of Policy Coordination,1967 *Regional Economic Modeling: A Systematic Approach to Economic Forecasting and Policy Analysis* G.I. Treyz,2013-11-11 Regional economic models are the key to predicting the effects of transportation economic development energy fiscal and environmental policies Despite this the principal regional economic policy analysis model used throughout the United States by government agencies universities and the private sector has not been presented in a book until now The approach to building understanding and using regional models presented in *Regional Economic Models A Systematic Approach to Forecasting and Policy Analysis* is progressive It begins with the simplest possible models and concludes with a full presentation of the leading model used by policy makers today The full details are presented along with facilitating software which is made available so that the reader can build a prototype model for any state or country and can perform policy simulations with full operational models for a sample area Policy studies are discussed that have been carried out with the model as well as the range of ways in which policies can be tested through policy simulations The necessary background is developed for understanding the ways in which models can be used to improve the basis upon which policies are evaluated as well as the sensitivity of the predicted effects to the model chosen for the analysis The presentation is multifaceted and includes equations diagrams and numerical examples The professional literature is integrated with

introductory materials to produce the first comprehensive book on regional modeling that extends from economic base models to modeling advances that are currently being published in economic journals **Regional Economic Policy** H. Folmer, 2012-12-06 Impact analysis of economic policy is a subject which is gaining in increasing interest in both theoretical and applied economic research Two main reasons for the growing interest can be distinguished First the situation of the government's finances is making it more than ever necessary to assess critically the effects of the instruments used to pursue public policy goals Secondly because of the economic stagnation government will be increasingly appealed to for support Impact analysis however is hampered by three major problems methodological deficiencies lack of econometric approaches which have been adapted to the specific conditions of this kind of analysis and data availability The present book deals with these problems in the context of regional economic policy However the main findings are broadly applicable in various other fields This book is primarily oriented towards those who have a practical interest Therefore attention is mostly paid to the practical aspects of the methodology and the measurements methods Furthermore the methodological and econometric parts are supplemented by two extensive case studies Three people have contributed constructive criticisms and suggestions on some chapters of the book Peter Nijkamp Theo Dijkstra and Manfred Fischer I am very grateful for their support They of course share no blame for any deficiencies in the present form of the book I also gratefully acknowledge the assistance of Harry Barkema and Marja Schuring with the computations **Public Policy and Regional Economic Development** Niles M. Hansen, 1974 **Regional Economics** Marion Temple, 1994 This new and up to date text explains those aspects of economics most relevant to understanding contemporary issues facing the regional economy in the second half of the 1990s The region is considered in the context of the subregional and local urban economies and also in relation to the wider national and supranational economic framework The influence of the European Community is given particular consideration The components of the regional economy and their impact on regional growth potential are explained The practical relevance of the theory is illustrated through appropriate regional examples Regional and urban policies of the 1980s and 1990s are covered Policy objectives and instruments are studied and policy is appraised in light of its contribution and limitations Policy is placed in the context of both the European Community and national and local government authorities **Regional Economic Growth: Theory and Policy** Horst Siebert, 1969 **Regional Economic Development** Gordon C. Cameron, 1971 **Targeting Regional Economic Development** Stephan J. Goetz, Steven Deller, Tom Harris, 2009-03-25 Targeting regional economic development TRED has a long and rich tradition among academic economists and in the world of economic development practitioners This book builds on a series of workshops and papers organized by The Northeast Regional Center for Rural Development NERCRD at the Pennsylvania State University and the Rural Policy Research Centre RUPRI at the University of Missouri Through the coordinated efforts of NERCRD and RUPRI a network of university based researchers and Extension education specialists was developed and provides the foundation of this new edited volume For

the first time in a single book Goetz Deller and Harris present an innovative approach through a collection of chapters discussing industry targeting and the relevance of TRED as an important analytical tool for practical targeting purposes The papers present issues surrounding community economic development clusters in industry and rural communities and the role of agglomeration economies The book provides the reader with insights into not only the theoretical foundations of targeting as well as empirical methods but also approaches for using the community level analysis to affect policy directions
