Regional Orders At Centurys Dawn:

Global Rogues and Regional Orders Il Hyun Cho, 2016 *Global Rogues and Regional Orders* examines the relationship between nuclear proliferation and regional order in East Asia and the Middle East looking at what factors shape the perceptions and responses of relevant regional actors to North Korea and Iran why some of these regional actors cooperate with the United States while others do not and the consequences of shifting relations among these countries *Regional Organisations and Security* Stephen Aris, Andreas Wenger, 2013-10-30 This book aims to examine the conceptions and practices of security adopted by Regional Organisations ROs across the globe Since the end of the Cold War there has been an increased focus on regions as a relevant realm for security with actors within regional contexts identifying a significant degree of interdependency between one another As a consequence international security has taken on a distinct regionally institutionalised character as seen by the increase in calls for greater utilisation of Chapter VIII Regional Arrangements of the UN in order to create a devolved UN led system of global security management However the idea of a system of global security management is a remote prospect because divergence seems to be as important as commonality in terms of regional security In light of the above *Regional Organisations and Security* analyses the primary ROs that are active in Africa Asia Eurasia the Middle East and South America The findings of individual case studies are compiled to highlight disparities and similarities in how security is seen prioritised understood practised managed and implemented across regions On this basis the authors reach conclusions about whether we live in an increasingly globalised or regionally distinct world and go on to assess the prospects for a globalised system of security management and consider how this might be developed and organised This book will be of interest to students of comparative regionalism international organisations international security and IR

China's Challenges and International Order Transition Huiyun Feng, Kai He, 2020-01-30 *China's Challenges and International Order Transition* introduces an integrated conceptual framework of international order categorized by three levels power rules and norms and three issue areas security political and economic Each contributor engages one or more of these analytical dimensions to examine two questions 1 Has China already challenged this dimension of international order 2 How will China challenge this dimension of international order in the future The contested views and perspectives in this volume suggest it is too simple to assume an inevitable conflict between China and the outside world With different strategies to challenge or reform the many dimensions of international order China's role is not a one way street It is an interactive process in which the world may change China as much as China may change the world The aim of the book is to broaden the debate beyond the Thucydides Trap perspective currently popular in the West Rather than offering a single argument this volume offers a platform for scholars especially Chinese scholars vs Western scholars to exchange and debate their different views and perspectives on China and the potential transition of international order

Advancing East Asian Regionalism Melissa Curley, Nicholas Thomas, 2012-10-12 Developments in East Asia have progressed rapidly in terms

of regionalism since the 1997 crisis The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples but also challenged the viability of regional organizations such as ASEAN to adapt and respond to the changing circumstances Advancing East Asian Regionalism looks at the ways in which ASEAN has expanded since the crisis and evaluates the potential of East Asia to come together in a regional formation one capable of representing the region as a whole akin to the European Community It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism Coupling case study material on regionalism institutions and sectoral cooperation with theoretical debates on regionalization this book is an invaluable resource that pushes our understanding of East Asian regionalism forward

Powerplay Victor D. Cha, 2018-04-24 A close look at the evolution of American political alliances in Asia and their future While the American alliance system in Asia has been fundamental to the region's security and prosperity for seven decades today it encounters challenges from the growth of China based regional organizations How was the American alliance system originally established in Asia and is it currently under threat How are competing security designs being influenced by the United States and China In Powerplay Victor Cha draws from theories about alliances unipolarity and regime complexity to examine the evolution of the U S alliance system and the reasons for its continued importance in Asia and the world Cha delves into the fears motivations and aspirations of the Truman and Eisenhower

presidencies as they contemplated alliances with the Republic of China Republic of Korea and Japan at the outset of the Cold War Their choice of a bilateral hub and spokes security design for Asia was entirely different from the system created in Europe but it was essential for its time Cha argues that the alliance system s innovations in the twenty first century contribute to its resiliency in the face of China s increasing prominence and that the task for the world is not to choose between American and Chinese institutions but to maximize stability and economic progress amid Asia s increasingly complex political landscape Exploring U S bilateral relations in Asia after World War II Powerplay takes an original look at how global alliances are achieved and maintained The United States and Northeast Asia G. John Ikenberry, Chung-in Moon, 2007-12-24 Since World War II the United States has played a crucial role in shaping Northeast Asian politics and economics However as this authoritative book shows the Cold War s demise September 11 and America s major strategic realignments have unleashed seismic changes in the region China s rise Japan s quest for a normal state and the North Korean nuclear quagmire are also potential flashpoints Collective memories of past aggression as well as resurgent nationalism further complicate regional dynamics But hopeful signs abound as deepening economic interdependence expanding social and cultural exchanges and the proliferation of informal economic social and cultural networks have improved the chances for a peaceful evolution to a liberal and stable region Contributions by Vinod K Aggarwal Paul Bacon Avery Goldstein G John Ikenberry Takashi Inoguchi Ki Jung Kim Myongsob Kim Woosang Kim Yongho Kim Min Gyo Koo Michael Mastanduno Chung in Moon Katharine H S Moon Seung won Suh and William C Wohlforth *The Black Sea Region* Oleksandr Pavliuk, Ivanna Klympush-Tsintsadze, 2016-07-08 The ring of countries bordering the Black Sea make up one of the unstable subregions of former Soviet republics satellites and neighbours This volume analyses the security issues in the Black Sea region and the development of mechanisms that would promote cooperation and conflict management **The Political Economy of Regional Peacemaking** Steven E. Lobell, Norrin M. Ripsman, 2016-02-02 In The Political Economy of Regional Peacemaking scholars examine the efficacy of trade agreements economic sanctions and other strategies of economic statecraft for the promotion of peace both between rival states and across conflict ridden regions more generally In the introduction Steven E Lobell and Norrin M Ripsman pose five central questions 1 What types of economic statecraft including incentives and sanctions can interested parties employ 2 Who are the appropriate targets in the rival states state leaders economic and social elites or society as whole 3 When should specific economic instruments be used to promote peace prior to negotiations during negotiations after signature of the treaty or during implementation of the treaty 4 What are the limits and risks of economic statecraft and economic interdependence 5 How can economic statecraft be used to move from a bilateral peace agreement to regional peace The chapters that follow are grouped in three sections corresponding to the three stages of peacemaking reduction or management of regional conflict peacemaking or progress toward a peace treaty and maintenance of bilateral peace and the regionalization of the peace settlement In each chapter the

contributors consider the five key questions from a variety of methodological historical cultural and empirical perspectives drawing data from the Pacific the Middle East Europe Asia and Latin America The conclusion expands on several themes found in the chapters and proposes an agenda for future research

Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors evaluate the peaceful change that occurred in the world's key regions In the final part the editors address prospective research agenda and trajectories on this important subject matter Keywords Peaceful Change War Security International Relations Theory Sources of Change Systemic Theory Realism Liberalism Constructivism Critical Theories

The International Relations of Northeast Asia Samuel S. Regions in Transition in the Former Soviet Area Alessandra Russo, 2017-11-15 This book aims to understand the texture of the post Soviet region where waves of de integration and re integration have been resonating at different times and through diverse manifestations over the last quarter of century The post Soviet states have been evolving in an embryonic system of states in their close neighbourhood whose boundaries and rules of interactions are still in the making However one can already detect specific traits of regional governance one of these being the presence of overlapping organisations and institutions It includes reflections on relations between state formation and region formation and a tentative conceptualisation of a post colonial form of regionalism The focus on small states featuring different behaviours vis vis regional organisations and regional imaginaries in their transitional and still unsettled state identities and foreign policy narratives constitutes a further element of originality This innovative volume is crucial reading for scholars and researchers

of International Relations with a special interest in either the Former Soviet Space or Comparative Regionalism

Comparative Regionalism Etel Solingen, 2014-07-11 This book comprises key essays on comparative regionalism and more broadly on regional conflict and cooperation by Professor Etel Solingen. The study of regionalism, a subject pioneered by Solingen in the 1990s, is now an established field of inquiry with a large community of scholars and practitioners around the world. This book provides a window into an evolving conceptual framework for comparing regional arrangements with a special emphasis on non-European regions. Framed by a comprehensive previously unpublished introduction, the chapters provide a broad spectrum of analysis on domestic political economy, democracy, regional institutions, and global forces as they shape different regional outcomes and trajectories in economics and security. Themes as different as the regional effects of democratization in the Middle East and East Asia, the rise of China, Euro-Mediterranean relations, and regional nuclear trajectories are traced back to a common analytical core. The nature of domestic ruling coalitions serves as the pivotal analytical anchor explaining the effects of globalization and economic reform on different regional arrangements. This collection provides a focal point that brings this work together in a new light and will be of much interest to students of regionalism, international relations theory, international and comparative political economy, international history, and grand strategy.

Globalizing Regionalism and International Relations Beatrix Futák-Campbell, 2021-05-20 Building on the recent initiative to truly globalize the field of international relations, this book provides an innovative interrogation of regionalism. The book applies a globalizing framework to the study of regional worlds in order to move beyond the traditional conception of regionalism which views regions as competing blocs dominated by great powers. Bringing together a wide range of case studies, the book shows that regions are instead dynamic configurations of social and political identities in which a variety of actors, including the less powerful, interact and partake in regionalization processes and have done so through the centuries.

Multilateral Asian Security Architecture See Seng Tan, 2015-07-16 This book provides a comparative assessment of the material and ideational contributions of five countries to the regional architecture of post-Cold War Asia. In contrast to the usual emphasis placed on the role and centrality of the Association of Southeast Asian Nations (ASEAN) in Asia's multilateral architecture and its component institutions, this book argues that the four non-ASEAN countries of interest here—Australia, Japan, China, and the United States—have played and continue to play an influential part in determining the shape and substance of Asian multilateralism from its pre-inception to the present. The work does not contend that existing scholarship overstates ASEAN's significance to the successes and failures of Asia's multilateral enterprise. Rather, it claims that the impact of non-ASEAN stakeholders in innovating multilateral architecture in Asia has been understated. Whether ASEAN has fared well or poorly as a custodian of Asia's regional architecture, the fact remains that the countries considered here, notwithstanding their present discontent over the state of that architecture, are key to understanding the evolution of Asian multilateralism. This book will be of much interest to students of Asian politics.

international organisations security studies and IR more generally The Political Economy of Development and Underdevelopment in Africa Toyin Falola, Jessica Achberger, 2013-06-07 While Africa is too often regarded as lying on the periphery of the global political arena this is not the case African nations have played an important historical role in world affairs It is with this understanding that the authors in this volume set out upon researching and writing their chapters making an important collective contribution to our understanding of modern Africa Taken as a whole the chapters represent the range of research in African development and fully tie this development to the global political economy African nations play significant roles in world politics both as nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development **International Security in the Asia-Pacific** Alan Chong, 2017-09-13 This volume argues that international security in the Asia Pacific lends itself to contradictory analyses of centrifugal and centripetal trends Transitional polycentrism is intrinsically awkward as a description of the security of states and their populations it implies the loosening of state control and the emergence of newly asserted authority by mixed constellations of intergovernmental organizations and non state actors It implies a competition of agendas threats to the integrity of borders and human security threats such as natural disasters airliner crashes and displacement by man made pollution and food scarcity Conversely polycentrism could also imply a return to a more neo realist oriented international order where great powers ignore ASEAN and steer regional order according to their perceived interests and relative military superiority This book embraces these contradictory trends as a foundation of analysis and accepts that disorder can also be re described from the perspective of studied detachment as polycentric order **China's Grand Strategy Under Xi Jinping** Niv Horesh, 2020-11-29 This book attempts to identify change and continuity in PRC grand strategy and the extent to which Chinese imperial history complicates PRC global outreach in the Xi Jinping era Empires convey the wish to make the world a better place even in the midst of oppression and are eschatological in their rhetoric However empires that last longer have been more pragmatic in their grand strategy sometimes appropriating the aura of past golden ages and at other times learning from the mistakes of their predecessors To date Chinese strategic thinkers are preoccupied with learning lessons from the disintegration of the USSR and fascinated by the secrets of American power Interdisciplinary in its reach analysing grand strategy through both rhetoric and praxis this book unpacks the Chinese world view through critical examination of the latest history textbooks currently in use in PRC middle schools It also brings new evidence to bear on the debate in the West about Chinese strategic culture Finally it compares historical Japanese OFDI patterns with China in order to understand what makes the Chinese economy unique China's Grand Strategy Under Xi Jinping is aimed towards students and scholars of history international business and wider Chinese studies
