Regional Politics Vol 45 America In A Post City Age:

Urban Politics Bernard H. Ross, Myron A. Levine, 2011-08-10 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development A new chapter on globalization and its impact on cities brings the history of urban development up to date and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local arena The book traces the changing style of community participation including the emergence of CDCs BIDs and other new style service organizations It analyzes the impacts of the New Regionalism the New Urbanism and much more at an approachable level The eighth edition is significantly shorter and more affordable than previous editions and the entire text has been thoroughly rewritten to engage students Boxed case studies of prominent recent and current urban development efforts provide material for class discussion and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics Source material provides Internet addresses for further research

Planning from the Bottom Up Anirban Pal, 2008 Highlights the gap between the official rhetoric and the political reality of democratic decentralisation and bottom up planning using an in depth study of the metropolitan planning process in Kolkata India This book focuses on the dynamic interactions between planners and the operation of the political process that shapes this reality

Comparative Civic Culture Laura A. Reese, Raymond A. Rosenfeld, 2016-05-23 The quest for a theoretical framework for understanding urban policy making has been a recurring focus of research into local governments Civic culture is a means for understanding how municipal policy makers weigh the interests of different groups govern the local community frame local goals engage in decision making and ultimately select and implement public policies While it seems that culture matters in local policy making how to measure culture in a valid and replicable fashion presents a significant challenge which the authors address in this book They present their findings of a large multi city research project to explore the nature of civic culture in cities in the US and Canada The focus of their analysis is on three overarching systems of community power system the community value system and the community decision making system The authors address a number of questions around the nature of civic culture and the relationships between the three systemic elements of civic culture to refine and apply a more sophisticated theory of urban policy making

Metropolitan Growth Planning in California, 1900-2000 Elisa Barbour, 2002 *Geopolitical Fragmentation and Patterns of Social Structure in Urbanized Areas in the United States* Andrea Irmgard Frank, 2000 **New Mexico Historical Review** Lansing Bartlett Bloom, Paul A. F. Walter, 2007

Political Change in the Metropolis John J. Harrigan, Ronald K. Vogel, 2000 Political Change in the Metropolis Sixth Edition focuses on the political changes that have taken place in

American cities and the reactions of urban scholars to them In addition to offering scholarly perspectives the text offers students a theoretical framework for interpreting these changing events for themselves This framework analyzes the patterns of bias inherent in the organization and operation of urban politics giving students an in depth look at the fascinating and constantly changing face of urban politics

Merger Mania Andrew Sancton, Westmount (Québec), 2000 The idea that merging municipalities will improve local services and economic competitiveness has its roots deep in the nineteenth century Municipalities in the US were first merged as early as 1848 However despite being merged at the turn of the twentieth the city of New York was effectively bankrupt by 1975 In contrast metropolitan Boston often seen as a recent success story in global competition comprises 282 distinct municipalities Outside the United States forced municipal mergers were a popular policy in many European countries and Canadian provinces during the 1960s and 1970s The city of Laval just north of Montreal and the unicity of Winnipeg owe their origins to this period both amalgamations failed to meet their original objectives Despite the emergence of public choice theory which justifies municipal fragmentation on market principles some politicians and public servants in the 1990s have continued to advocate municipal amalgamations as a means of reducing public expenditure particularly in Ontario In *Merger Mania* Andrew Sancton demonstrates that this approach has generally not saved money He examines the history of amalgamation as well as studying recent forced municipal mergers in Halifax Toronto Ottawa Hamilton and Sudbury In the concluding chapter he examines the case for municipal amalgamation on the Island of Montreal and argues that those who would abolish locally elected municipal councils are obligated to explain very carefully especially in light of evidence to the contrary exactly why they think such drastic measures are necessary A compelling examination of a timely issue *Merger Mania* is a must read for anyone interested in the politics of city governments Andrew Sancton is professor of political science at University of Western Ontario and the author of several books on city politics

Transportation Issues in Large U.S. Cities National Research Council (U.S.). Transportation Research Board, 1999 In June 1998 in Detroit Michigan transportation officials from the 12 largest cities in the United States the U S Department of Transportation DOT several state departments of transportation metropolitan planning organizations transit properties and other concerned organizations came together to participate in a conference to begin to develop a better understanding of the issues and to improve transportation in large U S cities One of the most important things the conference did was establish a set of research and policy issues and needs that as they are acted on by the various stakeholders and interested parties should improve mobility in the large urban centers of America An important background theme throughout the conference was the central role large cities play in the economic and social health of the country These conference proceedings contain an introduction conference overview the presentations by seven guest speakers six resource papers a list of best practices and a list of participants

America Becoming National Research Council, Commission on Behavioral and Social Sciences and Education, 2001-02-23 The 20th

Century has been marked by enormous change in terms of how we define race. In large part we have thrown out the antiquated notions of the 1800s giving way to a more realistic sociocultural view of the world. The United States is perhaps more than any other industrialized country distinguished by the size and diversity of its racial and ethnic minority populations. Current trends promise that these features will endure. Fifty years from now there will most likely be no single majority group in the United States. How will we fare as a nation when race based issues such as immigration, job opportunities and affirmative action are already so contentious today? In *America Becoming*, leading scholars and commentators explore past and current trends among African Americans, Hispanics, Asian Americans and Native Americans in the context of a white majority. This volume presents the most up to date findings and analysis on racial and social dynamics with recommendations for ongoing research. It examines compelling issues in the field of race relations including Race and ethnicity in criminal justice, Demographic and social trends for Hispanics, Asian Americans and Native Americans, Trends in minority owned businesses, Wealth, welfare and racial stratification, Residential segregation and the meaning of neighborhood, Disparities in educational test scores among races and ethnicities, Health and development for minority children, adolescents and adults, Race and ethnicity in the labor market including the role of minorities in America's military, Immigration and the dynamics of race and ethnicity, The changing meaning of race, Changing racial attitudes. This collection of papers compiled and edited by distinguished leaders in the behavioral and social sciences represents the most current literature in the field. Volume 1 covers demographic trends, immigration, racial attitudes and the geography of opportunity. Volume 2 deals with the criminal justice system, the labor market, welfare and health trends. Both books will be of great interest to educators, scholars, researchers, students, social scientists and policymakers.

Politics and Policy in States and Communities John J. Harrigan, David C. Nice, 2004. This up to date highly readable text focuses on twin perspectives: the political economy of state and local politics and the impact of political reformism on states and communities. This book studies reformism and its consequences as they relate to the legal, cultural and financial framework of state and community politics as well as their effect on citizen influence, community politics and the institutions of state government.

The Future of Local Government Administration International City/County Management Association, 2002. A group of noted scholars of U.S. local government and a group of leading local government administrators convened at the Hansell Symposium sponsored by the University of Kansas and ICMA to honor ICMA executive director William H. Hansell on the eve of his retirement. The papers presented there together with thoughtful responses by practicing managers are brought together in a volume that represents the state of the art of academic research into local government and the management profession. Coverage includes the democratic and political context of local government administration, the changing forms of American cities, the settings, roles and responsibilities of local government leaders in cities and counties and prospects for the future of local
