**New Challenges for Stateless Nationalist and Regionalist Parties** Eve Hepburn, 2013-10-18 Throughout Europe stateless nationalist and regionalist parties have moved from niche actors in party systems to mainstream political players No longer the outsider in party politics these parties have successfully entered government at the regional and state levels and many have been responsible for pushing the agenda for radical constitutional change in the United Kingdom Spain Italy Belgium Germany and France However the transformation of these parties from peripheral movements to established parties of

government does not come without its problems Whilst these parties were once able to focus on the single issue of self determination they have been forced to change their strategies alter their behaviour and compromise on their principles in order to succeed in an era of electoral volatility partisan dealignment and multi level governance This book explores how stateless nationalist and regionalist parties across Western Europe have responded to the twin challenges of multi level politics i e operating at the regional state and European levels and a multi dimensional policy space whereby they must articulate policy proposals alongside their territorial demands Written by leading experts in the field this is a cutting edge collection of theoretical analytical and empirical work on the challenges currently facing nationalist and regionalist parties in Europe This book was previously published as a special issue of Regional and Federal Studies     The European Union and the Rise of Regionalist Parties Seth Kincaid Jolly,2015-08-27 Rather than weakening the forces of nationalism among member states the expanding power of the European Union actually fosters conditions favorable to regionalist movements within traditional nation states Using a cross national quantitative study of the advent of regionalist political parties and their success in national parliamentary elections since the 1960s along with a detailed case study of the fortunes of the pro independence Scottish National Party Seth K Jolly demonstrates that supranational integration and subnational fragmentation are not merely coincidental but related in a theoretical and predictable way At the core of his argument Jolly posits the Viability Theory the theory that the EU makes smaller states more viable and more politically attractive by diminishing the relative economic and political advantages of larger sized states European integration allows regionalist groups to make credible claims that they do not need the state to survive because their regions are part of the EU which provides access to markets financial institutions foreign policy and other benefits Ultimately Jolly emphasizes scholars and policy makers must recognize that the benefits of European integration come with the challenge of increased regionalist mobilization that has the potential to reshape the national boundaries of Europe     **New Challenger Parties in Western Europe** Airo Hino,2012-06-12 This book provides a systematic and comparative account of the rise of new challenger parties across Western Europe It analyses how parties that challenge the conventional party system by addressing issues neglected by existing parties can succeed and fail Systematically comparing 229 elections since 1950 across 15 European democracies including the United Kingdom France Germany Italy the Benelux and Scandinavian countries this book questions why new challenger parties are more successful in some countries than others and analyses the conditions that determine their emergence and subsequent success or failure As one of the first systematic and comparative examinations of new challenger parties this book looks at both new politics parties and extreme right parties and the structures to aid their emergence at the time of an election Identifying two distinctive stages of party development the author adopts a double hurdle model involving first the chances of emergence and second sustained success This framework in combination with a wide range of empirical data provides for an innovative and insightful analysis of a neglected topic New Challenger Parties in Western Europe will be

**Contesting Spain? The Dynamics of Nationalist Movements in Catalonia and the Basque Country** Richard Gillespie, Caroline Gray, 2015-06-26 Contesting Spain The Dynamics of Nationalist Movements in Catalonia and the Basque Country offers an exploration of the dynamics behind contemporary shifts in the orientation of nationalist parties and movements with reference to Catalonia and the Basque country in Spain The chapters were originally papers presented at a workshop held at the Barcelona Centre for International Affairs CIDOB in September 2014 as part of a research project on The Dynamics of Nationalist Evolution in Contemporary Spain whose purpose was to gain a better understanding of why regionally based nationalist movements have experienced shifting relationships with the Spanish state over time in some periods appearing content with accommodation between central and regional government and at other times pushing to go beyond autonomist demands to seek sovereignty or even attain full independence The volume is one of the first to focus comparatively on the rise of pro sovereignty politics in mainstream nationalist parties whose evolution has also featured more traditional impulses towards territorial accommodation within the wider state Using the exceptionally rich laboratory provided by Spain the book explores the dynamics behind shifts in the orientation of nationalist parties and movements once they have established themselves as electorally successful at regional level Dimensions to the analysis include the interaction of nationalist parties with central government pressures from their support bases competition between parties within the home region and international influences This title is innovative in bringing together experts with a range of disciplinary approaches primarily political scientists but also historians and scholars located at the cusp between social sciences and humanities      **Origin, Ideology and Transformation of Political Parties** Vít Hloušek, Lubomír Kopeček, 2010

**Political Strategy and Ideological Adaptation in Regionalist Parties in Western Europe** Emanuele Massetti, 2010 The aim of the thesis is

contribute to the growing comparative literature on regionalist parties in Western Europe focusing on strategy and ideology. The research questions correspond to the three ideological dimensions domains which are taken into consideration: centre periphery, left-right and European integration, as well as to the links amongst such dimensions domains: why are some regionalist parties more moderate i.e. autonomists while others are more radical i.e. secessionists; why do some regionalist parties position themselves to the left while others position themselves to the right; why are some regionalist parties pro integration while others are against it; are there relationships between regionalist parties positions across the diverse ideological dimensions. The analytical framework brings together sociological theories of political alignments with theories of party competition and theories of party change. The empirical section is made up of a comparison of four case studies: LN, PC, SVP and SNP which are analysed in depth plus a final chapter that includes the most important regionalist parties in Western Europe. Data are gathered through interviews with prominent party members, party documents, primarily manifestos, election studies and secondary sources. In brief, in the conclusions it is argued that regions that have been independent states in the past and regions with concentrated ethno-linguistic minorities tend to produce more radical parties on the centre periphery dimension. Competition between regionalist parties acting in the same region also increases radicalism: working class regions tend to produce leftist regionalist parties while bourgeois regions tend to produce rightist regionalist parties. Positioning on European integration depends mainly on the compatibility of the self-government project with the process of European integration and on parties' satisfaction with the policy output of the state vis-à-vis that of the EU. Only weak relationships can be discerned between centre periphery and left-right positioning and between centre periphery and European integration. A stronger relationship is apparent between left-right and European integration positioning.
