Regression Of Atherosclerotic Lesions Experimental Studies And Observations In Humans:

Regression of Atherosclerotic Lesions M. Rene Malinow, 2013-06-29 The Advanced Study Institute on Regression of Atherosclerotic Lesions sponsored by the North Atlantic Treaty Organization was held in Maratea Italy September 11 13 1983 The institute was designed to foster discussion of experimental data on the regression of atherosclerosis in animals and evidence of a similar phenomenon in humans The participating scientists showed with anatomical and biochemical data that atherosclerosis regresses in cholesterol fed animals after withdrawal of atherogenic stimuli The existence of regression in humans was inferred from sequential angiographic visualization of arteries but anatomical and biochemical characteristics of the process have not been defined Two mechanisms are probably involved in such an angiographic regression The first which may occur when hyperlipidemia is partly or fully corrected or during undernutrition or other metabolic abnormalities may be related to atherosclerosis changes noted in animals undergoing regression The second type seems independent of changes in plasma lipid levels and may involve resolution of thrombi or other underlying arterial wall factors The relative frequencies of the two mechanisms are unknown whether they can occur simultaneously also warrants consideration It is likely that an exciting milestone will be forthcoming when regression of atherosclerosis is unequivocally demonstrated in humans

Publication of these institute proceedings constitutes a valuable background for future developments **Pathobiology of the Human Atherosclerotic Plaque** Seymour Glagov, William P., III Newman, Sheldon A. Schaffer, 2012-12-06 Seymour Glagov The last meeting devoted exclusively to an examination of the atherosclerotic plaque took place in Chicago 25 years ago under the joint auspices of the Council on Arteriosclerosis of the American Heart Association and the Chicago Heart Association The proceedings were published subsequently in a volume entitled Evolution of the Atherosclerotic Plaque edited by Richard J Jones 1 Both experimental and human lesions were considered and several provocative new approaches to the disorder were discussed The electron microscope was being applied systematically to the study of blood vessels at that time so that details of the infrastructure and cellular composition of the artery wall and of atherosclerotic lesions were presented in some detail There was as one result of these explorations considerable discussion of morphologic evidence suggesting that the principal cell involved in the atherogenic process was neither the fibroblast nor the macrophage as had been supposed but the smooth muscle cell In particular the findings indicated that this cell could incorporate lipid and become a foam cell

Occult Atherosclerotic Disease A-M. Salmasi, A.N. Nicolaides, 2012-12-06 Occult atherosclerotic diseases impose great challenges in the cardiovascular practice Although their pathology is not much different from that of the overt group of diseases the clinical approach to their diagnoses remains a puzzle This has mainly emerged as a result of the problems faced in trying to pick up the vulnerable subjects from among the general public More definitive candidates to be evaluated are those belonging to one of the high risk groups There are no statistical figures available on the incidence of occult atherosclerotic disease in the non risky general public and this is definitely an area that needs further investigation

Atherosclerotic disease whether they are in the cerebral coronary renal or lower limb arteries are theoretically interrelated because the basic patho logical changes are usually similar However there still remain some differ ences which are mainly due to variation in the flow pattern in the arteries Thus it will be important clinically and from the management point of view to investigate for the presence of occult disease in other arteries if an atherosclerotic disease in a certain artery has been discovered This approach is of a great significance especially from the preventive point of view in order to avoid catastrophic events which may have resulted from pathology in the other region *National Library of Medicine Current Catalog*

National Library of Medicine (U.S.),1985 **Expanding Horizons in Atherosclerosis Research** Günter Schlierf,Hubert Mörl,2012-12-06 On 29 February 1964 a group of European scientists met in Paris to discuss a subject of common interest namely atherosclerosis research with particular reference to international communication and collaboration After a second meeting on 15 May 1964 they founded the European Atherosclerosis Group which was to com prise individuals engaged in the various disciplines of atherosclero sis research in Eastern and Western Europe Since then this group has initiated multidisciplinary discussion and scientific collabora tion across Europe in accordance with the objects and aims written in its statutes 1 To hold colloquia and symposia dealing with research in the field of atherosclerosis and allied sciences 2 To encourage meetings and exchanges between scientists in the group engaged in the investigation of atherosclerosis 3 To encourage collaborative work between national and interna tional centers engaged in atherosclerosis research 4 To encourage the publication of reviews etc on atherosclerosis research which may be considered of value 5 To promote research fellowships particularly for younger research workers for studies within the field of atherosclerosis and allied sciences 6 To accept dues endowments grants funds and bequests to be used for the above purposes The European Atherosclerosis Group has helped to bring together what was separated during the second world war and the postwar period in Europe and to reestablish ties with the leading American teams **Insulin Resistance and Insulin Resistance**

Syndrome Barbara Hansen, Eleazar Shafrir,2013-08-29 Type II diabetes has developed into a global epidemic with nearly 20 type II patients for every type I individual Preceding the onset of type II diabetes is a prolonged episode of insulin resistance featuring a host of detrimental symptoms This period comprises a disease referred to as Insulin Resistance Syndrome or Metabolic Syndrome In *Current Catalog* National Library of Medicine (U.S.),1985 First multi year cumulation covers six years 1965 70 *Lipid-Lowering Therapy and Progression of Coronary Atherosclerosis* A.V. Bruschke,Johan H. C. Reiber,K.J. Lie,Hein J.J. Wellens,2012-12-06 A unique overview of all major angiographic lipid intervention trials presented by their principal investigators Basic mechanisms and methodological aspects including biochemical as well as angiographic aspects are discussed by experts in these fields A careful comparison of all available data permits an analysis to be made of what may currently be considered proved which aspects merit further investigation and which hypotheses should be rejected Audience Clinicians involved in the practice of lipid lowering and investigators involved in lipid lowering clinical trials

Scientists involved in other areas of lipid research and investigators conducting coronary angiographic trials designed to study the influence of different interventions will find a wealth of information and practical guidelines in this book

Diseases of the Arterial Wall Jean-Pierre Camilleri,Colin L. Berry,Jean-Noel Fiessinger,Jean Bariety,2012-12-06 This text combines extensive coverage of normal structure and function of the arterial wall with detailed accounts of the changes that occur in disease These data are presented in a comprehensive way not found elsewhere they are essential for the proper understanding of arterial disease and for its investigation using modern methodology Development and the factors controlling vessel form and structure are first discussed and the normal cellular populations functions and interactions are then considered Particular topics such as pulmonary hypertension the effects of trauma on vessels and diabetic vascular disease are reviewed in detail This book will be of interest to all involved in the management of vascular disease

Cell Calcium Metabolism Gary Fiskum,2013-04-17 A widespread appreciation for the role that calcium plays in cell physiology and patho physiology has now been achieved due to the pioneering studies of many of the scientists who attended the VIIth International Spring Symposium on Health Sciences at George Washington University in Washington D C The participants in this unique meeting rep resented diverse fields of basic and clinical research such as molecular physiology oncology molecular genetics cardiology bioenergetics pathology and endocrinology The content of the proceedings of the symposium represents work in these and other areas of biomedical research Organization of the book is aimed at striking a balance between the biochemistry 2 and physiology of normal cell Ca metabolism and the pathological consequences of al 2 terations in cell Ca homeostasis The first section of the book is devoted to the transport mechanisms responsible for 2 2 regulating intracellular Ca and the pharmacological modalities for controlling cell Ca Particular attention is given to the molecular basis for plasma membrane transport activities 2 2 including the ATP driven Ca pump the Na Ca exchange system and voltage sensitive 2 Ca channels The second section covers the exciting relationships between phosphoinositide metab 2 olism signal transduction and cell Ca metabolism This section begins with an eloquent overview by Professor Michael Berridge who was the keynote speaker at the symposium and the recipient of the scientific merit award

Hormones and Atherosclerosis Gregory Pincus,2013-10-22 Hormones and Atherosclerosis covers the proceedings of the conference held in Brighton Utah on March 11 14 1958 The book focuses on the role of hormones in atherosclerosis as well as cholesterol metabolism and biosynthesis lipogenesis and lipid transport The selection first discusses the biosynthesis of cholesterol and aspects of the biosynthesis of cholesterol from mevalonic acid Discussions focus on components of liver homogenates and coenzymes required for squalene and sterol synthesis from mevalonic acid and preservation of enzymes and microsomes The text also ponders on the formation and metabolism of bile acids under different conditions and thyroid function thyroxine analogs and cholesterol metabolism in rats and rabbits The book elaborates on the comparison of the participations of fibroblasts and reticuloendothelial cells in the synthesis and

metabolism of cortisol and cholesterol and control of aortal lipid metabolism and lipid movement by hormones and vitamins The manuscript also examines the influence of estrogens on lipids and atherosclerosis in experimental animals and the effect of adrenals pituitary liver and mucopolysaccharides on blood lipids The selection is a dependable reference for readers interested in the relationship of hormones and atherosclerosis Annals of the New York Academy of Sciences Thomas Lincoln Casey, Gilbert Van Ingen, Charles Lane Poor, Edmund Otis Hovey, Ralph Winfred Tower, 1990 Records of meetings 1808 1916 in v 11 27 Vascular Surgery Samuel Eric Wilson, Juan Carlos Jimenez, Frank J.
