Regulating Procurement:

Regulating Procurement Peter-Armin Trepte, 2004 **Public Procurement Regulation in (a) Crisis?** Sue Arrowsmith, Luke RA Butler, Annamaria La Chimia, Christopher Yukins, 2021-11-04 This timely book provides the first systematic analysis of global public procurement regulation and policy during and beyond the COVID 19 pandemic Through both thematic chapters and national case studies this book explores the adequacy of traditional legal frameworks for emergency procurement examines how governments and international organisations have responded specifically to the pandemic and considers how the experience of the pandemic and the political impetus for reform might be leveraged to improve public procurement more broadly Public procurement has been critical in delivering vital frontline public services both in the health sector and elsewhere with procurement of ventilators protective equipment and new hospitals all hitting the headlines At the same time procurers have faced the challenge of adjusting existing contracts to a new reality where for example some contracted services can no longer operate Further efficient and effective procurement will be an essential and not a luxury in the economic recovery With case studies on Italy the UK the USA India Singapore Africa Latin America and China the book brings together the world's leading academics and practitioners from across Europe the Americas Asia and Africa to examine these issues providing an essential resource for policy makers legislators international organisations and academics This title is included in Bloomsbury Professional's Local Government Law online service Regulation Public Procurement - National and International Perspectives Sue Arrowsmith, John Linarelli, Don Wallace, 2000-04-17 Three international leaders in public procurement law fully explain how the procurement award process must be managed to achieve its goals in global market economy The Internationalization of Government Procurement Regulation Aris Georgopoulos, Bernard Hoekman, Petros C. Mavroidis, 2017-02-16 As governments are major buyers of goods and services foreign companies are keen to be able to participate in procurement opportunities on an equal footing with national firms This has given rise to the inclusion of procurement disciplines in trade agreements and to internationally agreed good regulatory practices in this important policy area The contributions to this book examine how the dynamic mix of bilateral regional plurilateral and international norms on government procurement is reflected in purchasing practices at the national level and whether these are leading to convergence in policies and approaches The countries studied span both advanced high income economies and emerging economies Some are members of the WTO procurement agreement others are not Most WTO members have decided not to commit to binding international disciplines on procurement in trade agreements This book explores whether there has been nonetheless internationalization of good procurement practices and what current public purchasing processes suggest as regards the value added of signing on to binding rules of the game in this area The approach taken in the volume is interdisciplinary Contributors include economists political scientists legal scholars and practitioners with a solid understanding of both the extant international disciplines and national government procurement

policies Each chapter assesses the current state of play as regards legislation and procurement practices the degree to which industrial policy considerations feature in the relevant regulatory frameworks the existence and use of domestic dispute resolution and review procedures that allow firms to contest the behavior of procuring entities and the availability of data on procurement processes and outcomes *Public Procurement Regulation in Africa* Sue Arrowsmith, Geo Quinot, 2013-01-17 This book examines the regulatory rules on public procurement in selected African countries and provides a comparative analysis of key regulatory issues *Construction Law Handbook* Thomas Telford Limited, 2007 A legal reference on construction law that offers guidance for professionals and addresses the important construction law issues **Public Procurement and Labour Rights** Maria Anna Corvaglia, 2017-09-21 This book investigates patterns of fragmentation and coherence in the international regulatory architecture of public procurement In the context of the major international instruments of procurement regulation the book studies the achievement of social and labour policies the most controversial and problematic instrumental uses of public procurement practices This work offers an innovative comparative approach discussing the ways in which the different international instruments namely the EU Procurement Directives the WTO Agreement on Government Procurement the UNCITRAL Model Law and the World Bank's Procurement Framework are able to implement labour and social purposes and at the same time ensure a regulatory balance with the principles of efficiency and non discrimination Scholarly rigorous and timely this will be important reading for international trade lawyers and procurement practitioners **Public Procurement and the EU Competition Rules** Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law **Framework Agreements, Supplier Lists, and Other Public Procurement Tools** Serban Filipon, 2023-07-13 This book looks at regulation policy and

implementation of framework agreements supplier lists and other similar public procurement tools with a strategic and pragmatic perspective Whilst procurements of huge volumes and value are performed worldwide through such tools on a daily basis and despite their complexity and diversity this topic has rarely been studied in a systematic way The book fills this major gap It examines a series of public procurement systems or legal instruments selected to ensure wide coverage the UNCITRAL Model Law on Public Procurement the World Bank the US federal procurement system EU law France Romania and the UK pre and post Brexit By deconstructing over 20 clusters of tools into their key features along a pattern for analysis the book reconstructs a conceptual framework for purchasing uncertain or indefinite requirements through a transversal perspective across public procurement systems In this way the book provides valuable orientation to law and policy makers for improving or reforming this area to procurement officers in interpreting existing regulation and identifying innovative practical solutions and to lawyers and the judiciary for a balanced application of the regulation The book delivers essential material for procurement of uncertain or indefinite requirements

Systemic Discrimination in Employment and the Promotion of Ethnic Equality Ronald L. Craig, 2007 This book argues that traditional complaint based antidiscrimination laws are inherently inadequate to respond to systemic discrimination in employment It examines the mechanisms and characteristics of systemic discrimination and the shortcomings of complaint based laws Yet these characteristics can also inform employers and government authorities of the kinds of preventive action that help alleviate systemic discrimination at the workplace In its search for a rational government policy response to systemic discrimination the book evaluates selected legal regimes which impose proactive obligations on employers to promote equality at the workplace Proactive regimes are regulatory in nature rather than adjudicatory They induce employer compliance through technical assistance dialogue and regulatory pressure rather than court orders By

examining the key elements of these regimes the author explains why some proactive regimes function better than others and why proactive regimes function better than complaint based laws in addressing systemic discrimination
