Regulating Eden:

Regulating Sexuality Rosie Harding, 2010-10-04 *Regulating Sexuality* Legal Consciousness in Lesbian and Gay Lives explores the impact that recent seismic shifts in the legal landscape have had for lesbians and gay men The last decade has been a time of extensive change in the legal regulation of lesbian and gay lives in Britain Canada and the US Almost every area where the law impacts on sexuality has been reformed or modified These legal developments combine to create a new uncharted terrain for lesbians and gay men And through an analysis of their attitudes views and experiences this book explores the effects of these developments Drawing on and developing the concept of legal consciousness *Regulating Sexuality* focuses on four different texts qualitative responses to a large scale online survey of lesbians and gay men's views about the legal recognition of same sex relationships published auto biographical narratives about being and becoming a lesbian or gay parent semi structured in depth interviews with lesbians and gay men about relationship recognition parenting discrimination and equality and fictional utopian texts In this study of the interaction between law and society in social justice movements Rosie Harding interweaves insights from the new legal pluralism with legal consciousness studies to present a rich and nuanced exploration of the contemporary regulation of sexuality *Regulating Eden* Joe Hermer, 2002-01-01 In order to experience the naturalness and freedom of the parks we must embrace the very forms of regulation that we closely associate with places we consider to be artificial restrictive and alienating ***Regulating Agricultural Biotechnology*** Richard E. Just, Julian M. Alston, David Zilberman, 2006-12-26 This book presents the first thorough economic analysis of current agricultural biotechnology regulation The contributors most of whom are agricultural economists working either in universities or NGOs address issues such as commercial pesticides the costs of approving new products liability benefits consumer acceptance regulation and its impacts transgenic crops social welfare implications and biosafety *Inventing Stanley Park* Sean Kheraj, 2013-05-15 In early December 2006 a powerful windstorm ripped through Vancouver's Stanley Park The storm transformed the city's most treasured landmark into a tangle of splintered trees and shattered a decades old vision of the park as timeless virgin wilderness In *Inventing Stanley Park* Sean Kheraj traces how the tension between popular expectations of idealized nature and the volatility of complex ecosystems helped transform the landscape of one of the world's most famous urban parks This beautifully illustrated book not only depicts the natural and cultural forces that shaped the park's landscape it also examines the roots of our complex relationship with nature *Eden's Endemics* Elizabeth Callaway, 2020-08-04 In the past thirty years biodiversity has become one of the central organizing principles through which we understand the nonhuman environment Its deceptively simple definition as the variation among living organisms masks its status as a hotly contested term both within the sciences and more broadly In *Eden's Endemics* Elizabeth Callaway looks to cultural objects novels memoirs databases visualizations and poetry that depict many species at once to consider the question of how we narrate organisms in their multiplicity Touching on topics ranging from seed banks

to science fiction to bird watching Callaway argues that there is no set generally accepted way to measure biodiversity Westerners tend to conceptualize it according to one or more of an array of tropes rooted in colonial history such as the Lost Eden Noah's Ark and Tree of Life imagery These conceptualizations affect what kinds of biodiversities are prioritized for protection While using biodiversity as a way to talk about the world aims to highlight what is most valued in nature it can produce narratives that reinforce certain power differentials with real life consequences for conservation projects Thus the choices made when portraying biodiversity impact what is visible what is visceral and what is unquestioned common sense about the patterns of life on Earth

Cultural Contestation Jeroen Rodenberg, Pieter Wagenaar, 2018-07-04 Heritage practices often lead to social exclusion as such practices can favor certain values over others In some cases exclusion from a society's symbolic landscape can spark controversy or rouse emotion so much so that they result in cultural contestation Examples of this abound but few studies explicitly analyze the role of government in these instances In this volume scholars from a variety of academic backgrounds examine the various and often conflicting roles governments play in these processes and governments do play a role They act as authors and authorizers of the symbolic landscape from which societal groups may feel excluded Yet they also often attempt to bring parties together and play a mitigating role

Creative Subversions Margot Francis, 2011-12-01 Creative Subversions explores how whiteness and Indigeneity are articulated through images of Canadian identity and the contradictory and contested meanings they evoke These benign even kitschy images she argues are haunted by ideas about race masculinity and sexuality that circulated during the formative years of Anglo Canadian nationhood In this richly illustrated book Margot Francis shows how national symbols such as the beaver the railway the wilderness of Banff National Park and ideas about Indianness evoke nostalgic versions of a past that cannot be expelled or assimilated Juxtaposing historical images with material by contemporary artists she investigates how artists are giving these taken for granted symbols new and suggestive meanings

Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature

get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences

Against Ecological Sovereignty Mick Smith, 2011-09-29 Links the political critique of sovereign power with ecological concerns

The American Environment Revisited Geoffrey L. Buckley, Yolonda Youngs, 2018-03-01 This innovative book provides a dynamic and often surprising view of the range of environmental issues facing the United States today A distinguished group of scholars examines the growing temporal spatial and thematic breadth of topics historical geographers are now exploring Seventeen original chapters examine topics such as forest conservation mining landscapes urban environment justice solid waste exotic species environmental photography national and state park management recreation and tourism and pest control Commemorating the twenty fifth anniversary of the publication of the seminal work The American Environment Interpretations of Past Geographies the book clearly shows much has changed since 1992 Indeed not only has the range of issues expanded but an increasing number of geographers are forging links with environmental historians promoting a level of intellectual cross fertilization that benefits both disciplines As a result environmental historical geographies today are richer and more diverse than ever The American Environment Revisited offers a comprehensive overview that gives both specialist and general readers a fascinating look at our changing relationships with nature over time

Geography and Vision Denis Cosgrove, 2012-11-25 Leading geographer Denis Cosgrove provides a series of personal reflections on the complex connections between seeing imagining and representing the world geographically In a series of eloquent essays he draws upon pictorial images including maps sketches cartoons paintings and photographs to explore and elaborate upon the many and varied ways in which the vast and varied earth and at times the heavens beyond have been both imagined and represented as a place of human habitation The essays include reflections upon geographical discovery urban cartography and utopian visions ideas of landscape and the shaping of America wilderness and masculinity conceptions of the Pacific and the imaginative grip of the Equator Extensively illustrated this engaging work reveals the richness of the geographical imagination as expressed over the past five centuries

Canoe and Canvas Jessica Dunkin, 2019-08-22 Canoe and Canvas offers a detailed portrait of the summer encampments of the American Canoe Association between 1880 and 1910 The encampments were annual events that attracted canoeing enthusiasts from both sides of the Canada US border to socialize race canoes and sleep under canvas While the encampments were located away from cities they were still subjected to urban logic and ways of living The encampments

thus offer a unique site for exploring cultures of sport and leisure in late Victorian society but also for considering the intersections between recreation and the politics of everyday life A social history of sport Canoe and Canvas is particularly concerned with how gender class and race shaped the social cultural and physical landscapes of the ACA encampments Although there was an ever expanding arena of opportunity for leisure and sport in the late nineteenth century as the example of the ACA makes clear not all were granted equal access Most of the members of the American Canoe Association and the majority of the campers at the annual encampments were white middle class men though white women were extended partial membership in 1882 and in 1883 they were permitted to camp on site Canoe and Canvas also reveals how Black Indigenous and working class people while obscured in the historical record were indispensable to the smooth functioning of these events through their labour

Martin, 2013-11-11 The biotechnological advances of recent years have put us on the brink of unprecedented gains in animal productivity Manipulation of animal growth rate and composition of gain is now possible by a variety of techniques Examples include ingestion of beta adrenergic agonists injection of somatotropin castration immunization and gene insertion Animal Growth Regulation addresses modern concepts of growth regulation with an emphasis on agriculturally important animals This emphasis is not exclusive as many situations exist in which the only information available was generated in other species and this information has been included for the sake of clarity and completeness However because of the overall orientation of this volume particular attention has been given to the regulation of skeletal muscle adipose tissue and bone growth Certain hormones and growth factors have a profound influence on growth regulation and this basic physiological knowledge is being harnessed to manipulate growth Thus considerable emphasis has been given to growth hormone somatomedin-like growth factor regulation of cell and tissue growth The involvement of peptides coded by protooncogenes and of negative growth regulators such as transforming growth factor β represents an emerging area of molecular biology wherein basic knowledge offers potential exploitation for growth manipulation Opportunities also exist for regulation of protein turnover especially from the standpoint of protein degradation Therefore a place was reserved for these topics in order to provide relevant basic knowledge *Scientific Canadian Mechanics' Magazine and Patent Office Record* Canada.
