Jeunemaître**

Regulating Utilities Broadening The Debate:

Regulation of Network Utilities Claude Henry, Michel Matheu, Alain Jeunemaître, 2001 Propelled by deep technical economic and cultural changes network utilities have in the last twenty years entered a new era Since competition has been widely introduced and promoted we have experienced a radical change in the structure of the industries and the role of the state authorities Their role in managing monopolies has evolved into regulating new forms of markets which has resulted in the creation of independent regulatory authorities These new public bodies work with governments to try and reconcile the needs of competition and public service missions This suggests the use of recent developments in economic theory to handle complex problems This volume offers an exploration by scholars and regulators of the new regulatory regimes across Europe The first part presents the pioneering experiences of the United Kingdom and Sweden The United Kingdom has quickly chosen to establish powerful and independent individual regulators Reforms in Sweden have been more gradual and regulators have in the first instance acted mainly as mediators Part two is devoted to second wave developments that took place in various European countries i e France Germany Italy and Spain countries where the legal tradition is less conducive to the concept of independent regulators There the regulators are often but not always less powerful and meet more obstacles in their efforts to prevent either the formation of oligopolies or the resistance of incumbent monopolies In Germany another problem has emerged as the federal tradition prevents the creation of independent regulators in certain key sectors The contributions in the third part of the volume throw some light on the problems of coordinating national regulations One can observe the continuous emergence of modes of cooperation between national regulators as well as European authorities Faced with certain categories of problem the European authorities are themselves led to act as common regulators The countries of central and eastern Europe which are progressively converging towards the general economic model of the West are more and more concerned with the accompanying regulation problems Last but not least the Internet raises worldwide problems of regulation that are beginning to be seriously considered

Governments, Competition and Utility

Regulating Infrastructure José A. Gómez-Ibáñez,2003-09-15 This wide ranging study of urban infrastructure offers a series of fascinating arguments in favor of market oriented approaches to regulation Times Higher Education Supplement In the 1980s and 90s many countries turned to the private sector to provide infrastructure and utilities such as gas telephones and highways with the idea that market based incentives would control costs and improve the quality of essential services But high profile failures have since raised troubling questions about privatization This book addresses one of the most vexing of these how can government fairly and effectively regulate natural monopolies those infrastructure and utility services whose technologies make competition impractical Mapping out various approaches to regulation Jos G mez Ib ez draws on a wealth of case studies as well as history politics and economics He makes a strong case for favoring market oriented and contractual approaches over those that grant more discretion to government regulators He shows how contracts can provide stronger protection for infrastructure customers and suppliers and greater opportunities to tailor services to their mutual advantage At the same time he highlights scenarios where alternative schemes may be needed

Utility Regulation and Competition Policy Colin Robinson,Institute of Economic Affairs (Great Britain),London Business School,2002-01-01 The regulatory essays do not focus exclusively on the UK energy industry There is an excellent review of progress in opening European electricity and gas markets which hints at further reforms that have occurred since the book was published There are also fine reviews of

regulatory developments and competition policy in telecommunications railroads and water supply In short there is probably something of interest here for any serious energy professional or student of regulatory economics Jeff Skeer *The Journal of Energy and Development* In this book the latest volume in the annual series published in association with the London Business School and the Institute of Economic Affairs some of the main issues in UK and EU utility regulation and competition policy are discussed Topics examined include the new electricity and gas trading markets regulating the railways introducing competition into water telecoms and Ofcom opening EU gas and electricity markets the 1998 Competition Act EU merger policy and a general review of privatisation and regulation in Britain Essays by expert commentators are followed in each case by comments from the relevant regulator

Regulating Utilities David A. Currie, 1997 Utility regulation has become not only a major area for academic research but an important economic policy issue Every year the Institute in conjunction with the London Business School publishes a volume of Readings which provides an intellectual foundation for discussions about regulation It reviews regulatory problems in Britain considers how they might be solved and draws on the experience of other countries

Regulating Utilities M. E. Beesley, 1999

The National Lottery and Its Regulation Andrew Douglas, 2001-12-01 The introduction of a National Lottery into the United Kingdom created a unique regulatory challenge The response to this challenge is embodied in arrangements informed not by international precedent but by privatisation policies pursued by successive Conservative governments between 1979 and 1994 when the Lottery was launched Dr Douglas assesses the success of the Lottery's regulation against the objectives set out in the enabling legislation the upholding of the Lottery's propriety the protection of the players and the maximising of the funds to be applied to the Good Causes Lessons learned during the initial Licence period will inform the new seven year Licence from October 2001 the operator chosen for the new term and in particular the role of the profit motive within the new arrangements

The Politics of Regulation A. Young, 2001-03-13 The privatization of the utilities by the Conservative governments of the 1980s and 1990s was a major shift in public policy It was also a huge experiment in reinventing government since the newly privatized companies were regulated by high profile individuals Frequently criticized and often controversial the regulators wield enormous power over a large sector of the British economy This book tells the story of their first fifteen years or so controlling prices introducing competition refereeing mergers and sometimes clashing with the government

Regulating Utilities Martin Cave, 1998 Utility regulation in Britain has now entered a phase in which debate is no longer so much concerned with whether it is preferable to rival systems but with how to shape the regulatory contract in monopoly areas and in potentially competitive areas how to ensure rivalry

Competition in the Railway Industry José A. Gómez-Ibáñez, Ginés de Rus, 2006-01-01 Numerous countries have attempted to improve the performance of their railways by introducing more competition but there is fierce debate and no consensus on how this is best achieved This book reveals how railways were an obvious target for reform because they were often losing traffic and money and because the government was typically deeply involved as either owner or regulator

International Energy Experience, The: Markets, Regulation And The Environment G Mackerron, Peter J Pearson, 2000-04-19 How far can energy markets be free as well as competitive What do low oil prices mean for the oil industry and other energy markets How can economic efficiency in the energy industries be reconciled with environmental protection How far is the UK model of liberalising electricity and gas industries being applied

elsewhere in the world and how is it faring at home and abroad These are typical questions addressed in this collection of articles written by an international group of economists Edited by the leaders of the two leading UK academic centres of energy economics the book demonstrates how important the analysis of policy and regulatory frameworks has become for those interested in efficient energy and environmental outcomes a **Digital Economic Dynamics** Paul J.J.
