Regulating Wetlands Protection Environmental Federalism And The States:

Regulating Wetlands Protection Ronald Keith Gaddie, James L. Regens, 2000-01-01 Wetlands are a valuable natural resource yet over 200 000 acres are destroyed in the United States per year This book examines whether states should assume the role of protecting wetlands rather than the federal government *Water Pollution Policies and the American States* John A. Hoornbeek, 2012-01-02 The relationship between federal and state water pollution policies is revealed and assessed in this incisive volume Focusing on Congress's statutory directions in the Federal Water Pollution Control Act of 1972 and state compliance this study throws into relief the complex and often troubled relationship between the laws enacted by Congress and the public policies produced by state governments that implement them Compliance at the state level can be affected and sometimes disturbed by state politics particular policymaking processes and the effects of federal oversight practices As convincingly demonstrated in these pages American water pollution policy reflects neither runaway bureaucracies nor Congressional control but rather a complex intergovernmental process that is structured around Congress's statutory directions

Frontiers in Resource and Rural Economics Wu JunJie, Paul Barkley, Bruce Weber, 2010-09-30 Most land in the United States is in rural areas as are the sources of most of its fresh water and almost all its other natural resources One of the first books to approach resource economics and rural studies as fundamentally interconnected areas of study *Frontiers in Resource and Rural Economics* integrates the work of 18 leading scholars in resource economics rural economics rural sociology and political science in order to focus on two complex interdependencies one pertaining to natural resources and human welfare the other to urban and rural communities and their economies The book reviews the past 50 years of scholarship in both natural resource and rural economics It contrasts their different intellectual and practical approaches and considers how they might be refocused in light of pressing demands on human and natural systems It then proposes a new rural economics that acknowledges the full range of human ecosystem and urban rural interdependencies It explores the relationship between natural resources and economic growth and considers the prospects for amenity driven growth that would benefit both new and traditional inhabitants of rural areas Later chapters explore the politics of place spatial economics strategies for reducing rural poverty and prospects for linking rural and environmental governance Throughout the book emphasizes innovative research methods that integrate natural resource environmental and rural economics

Science and Politics Brent S. Steel, 2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The

essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect Science and Politics An A to Z Guide to Issues and Controversies is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics *A Republic of Statutes* William N. Eskridge (Jr.), John A. Ferejohn, 2010-01-01 William Eskridge and John Ferejohn propose an original theory of constitutional law whereby while the Constitution provides a vision our democracy advances by means of statutes that supplement or even supplant the written Constitution

Wetlands Sharon L. Spray, Karen L. McGlothlin, 2004-02-16 The purpose of the Exploring Environmental Challenges A Multidisciplinary Approach series is to publish a collection of short texts that each explore a specific environmental issue and describe the methodologies theories and findings pertaining to that issue from both natural and social science perspectives Each text contains three natural science essays three social science essays and a concluding essay Intended for introductory environmental studies courses these balanced thoughtful and rigorous texts aim to provide students with a deeper understanding of the relationship between people and their environment and to serve as a foundation for further inquiry and discussion *Wetlands* introduces students to the natural ecological functions and policy issues of wetlands so they will have a solid understanding of why these ecosystems are necessary and why their governance remains a significant environmental challenge Although not a comprehensive overview on wetlands it does provide background material for a more comprehensive investigation into the science behind and the management of these ecosystems **Unlikely**

Environmentalists Paul Charles Milazzo, 2016-02-08 Environmental activism has most often been credited to grassroots protesters but much early progress in environmental protection originated in the halls of Congress As Paul Milazzo shows a coterie of unlikely environmentalists placed water quality issues on the national agenda as early as the 1950s and continued to shape governmental policy through the early 1970s both outpacing public concern and predating the environmental movement Milazzo examines a two decade crusade to clean up the nation's water supply led by development boosters pork barrel politicians and the Army Corps of Engineers all of whom framed threats to the water supply as an economic rather than environmental problem and saw pollution as an inhibitor of regional growth Showing how the legislative branch acted more assertively than the executive the book weaves the history of the federal water pollution control program into a broader narrative of political and institutional development covering all major clean water legislation as well as many other landmark environmental laws Milazzo explains how the evolution of Congress's internal structure after World War II with its standing committees and powerful chairmen ultimately shaped the scope and substance of important legislative policies He reveals how Representative John Blatnik of Minnesota chairman of the House Subcommittee on Rivers and Harbors shepherded the first permanent water pollution control legislation through Congress in 1956 how Senator Robert Kerr of Oklahoma

embraced pollution control to deflect criticism of the public works budget and how Senator Edmund Muskie of Maine used an unwanted pollution subcommittee chairmanship to create a more viable federal water quality program at a time when few Americans demanded one By showing that a much more diverse set of people and interests shaped environmental politics than has generally been supposed Milazzo deepens our understanding of how Congress took the lead in addressing environmental concerns like water quality that ultimately contributed to the expansion of government His book demonstrates that the rise of the environmental regulatory state ranks as one of the most far reaching transformations in American government in the modern era

Federalism of Wetlands Ryan Taylor, 2014-07-17 This book

investigates the consequences of redundant state and federal environmental regulations in the United States Drawing on the most exhaustive statistical analysis of US federal wetland permits ever constructed the book uncovers the disjointed world of wetland regulation The author starts by examining the socioeconomic and environmental factors driving individuals to apply for environmental regulatory permits and the regional inconsistencies encountered in federal environmental regulatory program performance The book goes on to demonstrate that states have more power in federal relationships than scholars often believe and that individual state policies are important even in a time of strong federal governance Evidence shows that such intergovernmental redundancy serves to increase overall regulatory program effectiveness This book breaks new ground in the subjects of federalism and environmental regulation by rejecting the traditional approach of picking winners

and losers in favour of a nuanced demonstration of how redundancy and collaboration between different levels of governance can make for more effective governmental programs The book is also innovative in its use of the perspectives of regulated citizens not as a point of judgment but as a means of introducing a constructive new way of thinking about political and administrative boundaries within a federalist system of governance The book provides relevant context to wider political debates about excessive and duplicative regulatory oversight and will be of interest to Environmental Policy students and administrators

Rothenberg,2002-02-01 Within a federal system government agencies and regulatory policies can be fractured even at odds with each other National actors share power with their counterparts in states and localities as do presidents with Congressional leaders and bureaucrats with judges Understanding the broad economic and political contexts of environmental policymaking illuminates the motivations behind policy choices of various interested parties from the National Park Service and the EPA to environmental activists and members of Congress Rothenberg utilizes basic economic ideas to provide not only a fresh look at how the U S deals with environmental ills but a way of thinking about policy making in general
