Chemicals, Cancer, and Choices Peter M. VanDoren, 1999 This book offers readers a unique way to sort through the rhetoric that accompanies questions of science and health Surprisingly the answers are not to be found in more and better scientific research Better studies can reduce but not eliminate our uncertainty about chemical side effects The market provides the sorting mechanism through which many of the conflicts may be reconciled In the case of exposures that arise from the consumption of specific products markets permit individuals to choose their level of exposure Even when everyone is exposed to chemicals in the air the creation of a market for emission rights would allow the cautious to purchase such rights and reduce their exposure Emission rights also would allow firms to increase their pollution in return for compensating everyone else for increased risk In short the market affords individualized responses to chemical risk as an alternative to

government imposed rules for everyone An Undisciplined Economist Morris L. Barer, Greg L. Stoddart, Kimberlyn M. McGrail, Chris B. McLeod, 2016-06-01 For four decades Robert Evans has been Canada's foremost health policy analyst and commentator playing a leadership role in the development of both health economics and population health at home and internationally An Undisciplined Economist collects Evans' most important contributions and includes two new articles. The topics addressed range widely from the peculiar structure of the health care industry to the social determinants of the health of entire populations to the misleading role that economists have sometimes played in health policy debates. Written with Evans' characteristic clarity, candour, and wit, these essays unabashedly expose health policy myths and the special interests that lie behind them. He refutes claims that public health insurance is unsustainable, that the health care costs of an aging population will bankrupt Canada, that user charges will make the health care system more efficient, and that health care is the most important determinant of a population's health. An Undisciplined Economist is a valuable collection for those familiar with Evans' work, a lucid introduction for those new to the fields of health economics, health policy, and population health, and a fitting tribute to an outstanding scholar.
