## **Reincarnation And Karma Two Fundamental Truths Of Existence:**

**Reincarnation and Karma** Rudolf Steiner, 2001-05 5 lectures Berlin and Stuttgart January March 1912 CW 135 Just as an age was once ready to receive the Copernican theory of the universe so is our own age ready for the ideas of reincarnation and karma to be brought into the general consciousness of humanity Rudolf Steiner introduced the West to his detailed scientific knowledge of reincarnation and karma He gave concrete descriptions of the way individuals transform during the course of successive incarnations and specific examples of how karma works Steiner also provides practical exercises that lead us to experience the reality of reincarnation He believed that by experiencing the reality of successive earth lives we can form a foundation for a spiritual understanding of the relationship between humankind and the cosmos These talks contain some of Steiner's most important teachings on reincarnation and karma His examples and exercises can lead us to direct knowledge of the laws of reincarnation and karma Topics include How to perceive directly the part of our being that passes through many lives on earth How to develop a feeling memory which we need before we are able to experience reincarnation Thought exercises for gaining knowledge of reincarnation and karma Examples of how karma works between incarnations How knowledge of reincarnation and karma affects our moral life This volume is a translation from German of *Wiederverkörperung und Karma und ihre Bedeutung für die Kultur der Gegenwart* **Reincarnation and Karma: Lecture 2 of 5** Rudolf Steiner, **A Western Approach to Reincarnation and Karma** Rudolf Steiner, 1997 The soul's immortality and its repeated earthly births are not new ideas in Western thought They are implicit in the Pythagorean and Platonic traditions as well as in some branches of esoteric Judaism and Cabbala But it was not until the early years of this century that the West was given a detailed modern evolutionary philosophy of human life based on the reality of reincarnation and karma This turning point occurred when Rudolf Steiner began to make public the results of his spiritual scientific researches He viewed the revelation of reincarnation and karma as one of his most important life tasks Steiner's contribution however remains unique in its understanding of the human being as an evolving developing being of body soul and spirit On the basis of his researches presented in numerous books and lectures we begin to understand how the complex interaction of human lives between birth and death and between death and a new birth gives new meaning not only to individual lives lived on Earth in community with others but also to human history and evolution and to earthly and cosmic events This book collects many of Steiner's major statements on reincarnation and karma The primary purpose of this volume is to help readers meet the challenge of spiritual research in the area of individual evolution of the soul and spirit in the context of cultural and universal evolution Such a study can be tremendously revealing and provide spiritual understanding in a time of increasing intellectual confusion and spiritual poverty The notion of reincarnation and karma is generally associated in most minds with spiritual traditions of the East especially Hinduism and Buddhism Ren Querido's in depth sixty page introduction however places these concepts within the context of Western spiritual development and esoteric tradition

showing us a panoramic view of how such ideas have developed over the centuries in the West

Harry L. Serio, 2021-04-12

We are so much more than we appear to be

The why of our existence is far more complex than the how of our being

Mysticism probes the hidden nature of who we are why we are and our relationship to our Creator

We catch glimpses of this not only in the ordinary experiences of life but also through extraordinary and unusual encounters with mystery

Mysticism is the awareness of our reality

By Reincarnation we mean the repeated incarnation or embodiment in flesh of the soul or immaterial part of man's nature

The term Metempsychosis is frequently employed in the same sense the definition of the latter term being The passage of the soul as an immortal essence at the death of the body into another living body

The term Transmigration of Souls is sometimes employed the term being used in the sense of passing from one body into another

But the term Transmigration is often used in connection with the belief of certain undeveloped races who held that the soul of men sometimes passed into the bodies of the lower animals as a punishment for their sins committed during the human life

But this belief is held in disrepute by the adherents of Reincarnation or Metempsychosis and has no connection with their philosophy or beliefs the ideas having sprung from an entirely different source and having nothing in common

There are many forms of belief many degrees of doctrine regarding Reincarnation as we shall see as we proceed but there is a fundamental and basic principle underlying all of the various shades of opinion and divisions of the schools

This fundamental belief may be expressed as the doctrine that there is in man an immaterial Something called the soul spirit inner self or many other names which does not perish at the death or disintegration of the body but which persists as an entity and after a shorter or longer interval of rest reincarnates or is re born into a new body that of an unborn infant from whence it proceeds to live a new life in the body more or less unconscious of its past existences but containing within itself the essence or results of its past lives which experiences go to make up its new character or personality

It is usually held that the rebirth is governed by the law of attraction under one name or another and which law operates in accordance with strict justice in the direction of attracting the reincarnating soul to a body and conditions in accordance with the tendencies of the past life the parents also attracting to them a soul bound to them by some ties in the

past the law being universal uniform and equitable to all concerned in the matter This is a general statement of the doctrine as it is generally held by the most intelligent of its adherents Reincarnation and the Law of Karma William Walker Atkinson,1908 By Reincarnation we mean the repeated incarnation or embodiment in flesh of the soul or immaterial part of man s nature The term Metempsychosis is frequently employed in the same sense the definition of the latter term being The passage of the soul as an immortal essence at the death of the body into another living body The term Transmigration of Souls is sometimes employed the term being used in the sense of passing from one body into another But the term Transmigration is often used in connection with the belief of certain undeveloped races who held that the soul of men sometimes passed into the bodies of the lower animals as a punishment for their sins committed during the human life But this belief is held in disrepute by the adherents of Reincarnation or Metempsychosis and has no connection with their philosophy or beliefs the ideas having sprung from an entirely different source and having nothing in common There are many forms of belief many degrees of doctrine regarding Reincarnation as we shall see as we proceed but there is a fundamental and basic principle underlying all of the various shades of opinion and divisions of the schools This fundamental belief may be expressed as the doctrine that there is in man an immaterial Something called the soul spirit inner self or many other names which does not perish at the death or disintegration of the body but which persists as an entity and after a shorter or longer interval of rest reincarnates or is re born into a new body that of an unborn infant from whence it proceeds to live a new life in the body more or less unconscious of its past existences but containing within itself the essence or results of its past lives which experiences go to make up its new character or personality It is usually held that the rebirth is governed by the law of attraction under one name or another and which law operates in accordance with strict justice in the direction of attracting the reincarnating soul to a body and conditions in accordance with the tendencies of the past life the parents also attracting to them a soul bound to them by some ties in the past the law being universal uniform and equitable to all concerned in the matter This is a general statement of the doctrine as it is generally held by the most intelligent of its adherents We are the Revolution! Ulrich Röscher,2013 Freedom for the spiritual cultural life equality and democracy for human rights initiative and solidarity for the economic sphere Revolutions happen when society does not change and evolve Stagnation and resistance create a situation in which a leap in development is required In nature living organisms suffering from inner blockages must heal or die The same applies to the social organism society which occasionally requires drastic change to avoid complete collapse or violent revolution With his frequently repeated phrase We are the Revolution the artist and social activist Joseph Beuys was intimating that true transformation develops from within in an artistic or creative way People are the source of metamorphosis in the social realm But in modern times a we is also required an agreement with others The individual connects with fellow human beings in active cooperation as a solid foundation for healthy forms of coexistence In a series of clear and insightful essays Ulrich Röscher builds on the threefold social thinking of Rudolf Steiner

Joseph Beuys and others presenting ideas for change in the context of twenty first century life Our world has become unified through the global division of labor and interdependence which calls for fresh thinking and rejuvenated social forms R sch compares the spirituality and social action of Mahatma Gandhi and Rudolf Steiner takes the living example of a biodynamic farm as a social organism and studies the tangible situation of the production and worldwide sale of bananas as a symptom of inequitable commerce
