Barnett, Caryl Rivers, 2016-08-22 Long productive lives are the destiny of most of us not just the privilege of our great grandchildren The story of aging is not one of steady decline and decay we need a new narrative based on solid research not scare stories Today Americans enjoy a new healthy stage of life between roughly 65 and 79 during which we are staying engaged in the workplace starting new relationships and careers remaining creative and becoming entrepreneurs and job creators We are in the midst of a major paradigm shift in the way we live Our major milestones are shifting The definition of normal behavior is changing Today we marry later or not at all cohabitation is not just a stepping stone to marriage but a long term arrangement for many Women often have their first child in their 40s and increasingly before they marry People enjoy active sex lives well into their 6th 7th or even 8th decades None of our institutions will remain the same People are working longer and given the declining birth rate older workers will be in great demand Four generations are increasingly working side by side learning from each other But we must ensure that the benefits of long life are not limited to a wealthy few The Age of Longevity shows how we as a society can embrace the life altering changes that are either coming in the near future or are already underway The authors give readers a panoramic view of how they the institutions that affect them and the country as a whole will need to adapt to what's ahead They offer strategies based on cutting edge research that will enable individuals institutions companies and governments to make the most of our lengthening life spans Using real life examples throughout the authors paint a picture of what our new longer lives will look like and the changes that need to be made so we can all make those years both more productive and more enjoyable

**Boomer Bust?** Robert B. Hudson, 2008-11-03 Seventy six million Baby Boomers are careening toward retirement in the United States. Demographic shifts toward aging populations are taking place around the Western world as a variety of factors—biological, technological, medical, and sociocultural—are extending life spans. Meanwhile, birth rates are declining. The scaremongers argue that this generational shift is going to be disastrous. It will result in skyrocketing tax rates, lower retirement and health benefits, higher inflation, increased unemployment and poverty, political instability, and a host of other societal ills. But will it? In *Boomer Bust*, Robert Hudson assembles leading authors from fields such as economics, political science, and finance to separate fact from fiction, highlight the terms of debate, and showcase innovative policies that will prevent disaster from occurring. From topics like Social Security to older people rejoining the workforce to the elderly as a political lobby, this two volume set covers the gamut of economic, political, financial, and business issues related to aging.
