Relation Als Vergleich:

Relation Als Vergleich Rolf Schönberger, 1994 This book interprets the theory of relation of John Buridan one of the most influential thinkers of the late Middle Ages In so doing it examines his whole wider oeuvre in the context of the history of scholastic debate *Relation als Vergleich* Schönberger, 2021-11-01 All central concepts in philosophy contain a relational aspect The type of reality to be accorded to relations is for this reason one of the core questions of philosophical thought This is particularly so in the case of nominalism This book is devoted to John Buridan While his towering importance in the late Middle Ages and for the development of early modern science has been recognised his works are still not really well known How does his theory of relations relate to those of his contemporaries for example William of Ockham or Gregory of Rimini The question of the reality of relations is not only of interest as an experimentum crucis of nominalism but also because Buridan in his ethics frequently falls back upon older traditions The first part of the book contains a discussion of theories of relation from Thomas Aquinas to Gregory of Rimini The author then offers an exhaustive presentation of the basic lines of Buridan s philosophy and its relation to theology before turning attention to his theory of relation Finally he addresses particular forms of relation identity analogy causality etc **Philosophical Debates at Paris in the Early**

Fourteenth Century Stephen F. Brown, Thomas Dewender, Theo Kobusch, 2009-05-20 This collection of essays papers originally delivered at conferences in Bonn and Boston show in a detailed way the tone and nature of philosophical and theological issues and arguments at the University of Paris in the early fourteenth century They touch on a large number of authors and a broad spectrum of subjects and present these discussions with regard to the intellectual framework set by the earlier Parisian generation of Thomas Aquinas Henry of Ghent and Godfrey of Fontaine It becomes evident that the principal contributors to the new intellectual energy in early fourteenth century discussions at Paris are Meister Eckhart John Duns Scotus Hervaeus Natalis Durandus of St Pour ain Walter Burley and Petrus Aureoli Das Vergleichen und die

D. Rollinger, 2023-03-13 The influence of Franz Brentano in twentieth century philosophy has been extensive His two most famous and outstanding pupils were Alexius Meinong and Edmund Husserl These two are closely related not only regarding their common background in the school of Brentano but also in their common concern with problems arising from British empiricism Such a problem is to be found in the nominalist views of Locke Berkeley and Hume and their concomitant theories of general ideas While Meinong's early work continues in the empiricist tradition by characterizing general ideas in terms of abstraction and not in terms of general objects universals as their correlates Husserl's Logical Investigations are committed to the claim that general ideas can be described only as ideas which refer to general objects In Meinong and Husserl on Abstraction and Universals the epistemological psychological and ontological aspects of these theories are examined and compared Included is also a translation of Abstraction and Comparing 1900 by Meinong
