

Relational Grammar

- Developed by linguists David Perlmutter and Paul Postal in the 1970s and '80s
- An alternative to transformational grammar
- According to Blake (1990),

"**Relational grammar** represents a . . . reaction to early Transformational Grammar. It is not a single level theory, but a multilevel one in which the initial stratum is analogous to deep structure, and revaluations to transformations. The principle difference between the two approaches is that RG conceives of a sentence in terms of labeled relations borne to a predicate."

Studies in Relational Grammar 1 David M. Perlmutter, 1983 In this long awaited book the first in a three volume work David M Perlmutter has co authored and edited ten essays that introduce relational grammar a novel conception of sentence structure that offers far reaching conclusions for universal grammar The basic ideas of relational grammar can be simply stated First grammatical relations such as subject of direct object of and indirect object of are needed to characterize the class of grammatical constructions in the clausal syntax of natural languages to formulate universals of grammar and to construct adequate and insightful grammars of individual languages Second the range of linguistic variation in word order and case patterns makes it impossible to define grammatical relations in terms of phrase structure configurations or case Rather grammatical relations must be taken as primitive notions of linguistic theory The papers collected here take up the first of these ideas They lay out the basic theoretical constructs of relational grammar and discuss three areas of grammar advancement construction raising and clause union In his introduction Perlmutter discusses each of the papers most of which are published here for the first time and places them in the context of the whole of linguistic study

Relational Grammar Barry Blake, 2002-09-11 Relational Grammar had its beginnings in the early 1970s In this theory of the structure of language grammatical relations are taken to be undefined primitives The set of relations recognised includes subject direct object indirect object and a number of oblique relations including benefactive locative and instrumental This is the first book that describes the theory s basic ideas evaluates them and compares them with other approaches in other theories The treatment is straightforward and should be comprehensible to anyone conversant with traditional grammatical terminology All unfamiliar terms and conventions are explained and illustrated The book is written for students of modern theories of grammar but it should also be of relevance and interest to descriptive and comparative linguistics It contains a wealth of data on morphology and syntax and also includes comparisons of Relational Grammar analyses with those of non aligned linguistics who are working with much the same data

Klaiman, 2005-11-24 Categories of the verb in natural languages include tense aspect modality mood and voice Among these voice in its rich and diverse manifestations is perhaps the most complex But most prior research concentrates on only certain types predominantly passives Voice expresses relations between a predicate and a set of nominal positions or their referents in a clause or other structure Grammatical Voice is the first typological study of voice systems based on a multi language survey It introduces a threefold classification of voice types in the first place distinguishing passivization phenomena derived voice from active middle systems basic voice and further distinguishing each of these from pragmatically grounded voice behaviours such as focus and inverse systems As the first comprehensive study of voice systems and voice typology this book makes a significant contribution to current research in linguistics and grammatical theory *A Relational Grammar of Kinyarwanda* Alexandre Kimenyi, 1980 The MIT Encyclopedia of the Cognitive Sciences (MITECS) Robert A. Cognitive Sciences MITECS is a landmark comprehensive reference work that represents the methodological and theoretical diversity of this changing field. At the core of the encyclopedia are 471 concise entries from Acquisition and Adaptationism to Wundt and X bar Theory. Each article written by a leading researcher in the field provides an accessible introduction to an important concept in the cognitive sciences as well as references or further readings. Six extended essays which collectively serve as a roadmap to the articles provide overviews of each of six major areas of cognitive science: Philosophy, Psychology, Neurosciences, Computational Intelligence, Linguistics and Language, and Culture, Cognition and Evolution. For both students and researchers, MITECS will be an indispensable guide to the current state of the cognitive sciences.

Studies in relational grammar Paul Martin Postal, Carol G. Rosen, 1986 **A Bibliography on Relational Grammar Through April 1983** Stanley Dubinsky, Carol G. Rosen, 1983 **Investigations of the Syntax-Semantics-Pragmatics Interface** Robert D. Van Valin, Jr., 2008-11-21. *Investigations of the Syntax Semantics Pragmatics Interface* presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory: verb semantics and argument structure, the nature of syntactic categories and syntactic representation, prosody and syntax information structure and syntax and the syntax and semantics of complex sentences. In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion. In particular there are analyses of grammatical phenomena such as transitivity in Kabardian, the verb less numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran, Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches. In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research, parsing and automated text analysis.
