Behavioral Sciences Ronald S. Krug, Alvah R. Cass, 2012-12-06 There are five separate sections to this book arranged in a logical sequence Section One covers normal phenomenology of human behavior including issues of learning and growth and development Section Two addresses the theories of human development which have implications for problem behavior as well as the psychosocial issues in health care delivery The latter are those issues which are not clearly psychopathology but represent problems in health care delivery which physicians encounter in the normal practice of medicine Section Three is an overview of psychopathology in both children and adults and Section Four deals with the diagnosis and intervention issues involved in various forms of psychopathology and problems of living Section Five is the overview of the different systems of health care delivery and the incidence/prevalence of different health care problems This is a review text and should not be substituted for more complete texts The authors do not recommend that this book be used as a course text except to those academic offerings that are specifically directed to an overview of the behavioral sciences To use this book effectively the beginning student should start at the first chapter and progress through the text in a systematic fashion For the more advanced student the basic information in Sections One and Two might be skipped and they can proceed directly to Sections Three and Four

Creation and Covenant Christopher Roberts, 2008-11-01 Does sexual difference matter for marriage Are there good theological reasons why the two main characters in a marriage should be a male and a female or is marriage a more flexible covenant which any two people can keep Creation and Covenant analyzes latent but under-examined beliefs about sexual difference in the theology about marriage which has been dominant for centuries in the Christian west The book opens by studying patristic theologies of marriage which rested on mostly implicit and often incompatible beliefs about sexual difference However Roberts argues that Augustine developed a coherent theology of sexual difference according to a shifting significance from creation to eschaton Roberts traces how Augustine's theology influenced and was developed by subsequent theologians such as Bernard of Clairvaux Luther Barth and John Paul II Finally Roberts engages today's debates about gay marriage Before becoming an academic Dr Roberts was a journalist On behalf of PBS television he covered both the Lambeth Conference in England and the World Council of Churches in Zimbabwe During those years he was disappointed by both the liberal and conservative arguments on homosexuality Left wingers seemed more interested in privacy autonomy and experience than in theology and right wingers seemed to have lots of prohibitions but little good news In the final chapters this book tries to do better inviting liberals to improve the standard of their arguments and explaining what is beautiful and persuasive about the traditional case
