Relevance Of History:

Why Study History? John Fea, 2013-09-15 What is the purpose of studying history How do we reflect on contemporary life from a historical perspective and can such reflection help us better understand ourselves the world around us and the God we worship and serve In this introductory textbook accomplished historian John Fea shows why Christians should study history how faith is brought to bear on our understanding of the past and how studying the past can help us more effectively love God and others Deep historical thinking can relieve us of our narcissism cultivate humility hospitality and love and transform our lives more fully into the image of Jesus Christ *The Relevance of History* Gordon Connell-Smith, Howell A. Lloyd, 1972

The Relevance of History to Contemporary Accounting Issues Barbara Dubis Merino, 1978 **The Contemporary Relevance of History** Salo Wittmayer Baron, 1986 This book explores the puzzling phenomenon of new veiling practices among lower middle class women in Cairo Egypt Although these women are part of a modernizing middle class they also voluntarily adopt a traditional symbol of female subordination How can this paradox be explained An explanation emerges which reconceptualizes what appears to be reactionary behavior as a new style of political struggle as accommodating protest These women most of them clerical workers in the large government bureaucracy are ambivalent about working outside the home considering it a change which brings new burdens as well as some important benefits At the same time they realize that leaving home and family is creating an intolerable situation of the erosion of their social status and the loss of their traditional identity The new veiling expresses women's protest against this MacLeod argues that the symbolism of the new veiling emerges from this tense subcultural dilemma involving elements of both resistance and acquiescence *The Study of History*, 2000 History is a subject which never stands still It is always changing its philosophies its contours its leading questions its politics its conceptual status and its methodologies This bibliographical guide to the study of history is wide ranging in scope extending from the ancient world to the 20th century It deliberately concentrates on modern historians views provides a substantial section on the philosophy of history charts controversies and highlights the continual evolution and diversification of history The material is logically organized in major areas and subsections and cross references are given where appropriate An index of authors editors and compilers is also provided

Thinking Historically Stéphane Lévesque, 2008-01-01 Drawing on a rich collection of personal national and international studies in history education Lévesque offers a coherent and innovative way of looking at how historical expertise in the domain intersects with the pedagogy of history education *Perspectives on the Entangled History of Communism and Nazism* Klas-Göran Karlsson, Johan Stenfeldt, Ulf Zander, 2015-07-15 The collective work deals with the problems of if how and why the histories of German Nazism and Soviet Communism should and could be situated within one coherent narrative As historical phenomena can Communism and Nazism fruitfully be compared to each other Do they belong to the same historical contexts Have they influenced reacted to or learned from each other Are they interpreted represented and

used together by posterity The background of the book is twofold One is external There is an ongoing debate about the historical entanglements of Communism and Nazism especially about Auschwitz and Gulag respectively Our present fascination with the evil history of genocide has situated the Holocaust as the borderline event in Western historical thinking The crimes against humanity perpetrated by the Soviet Communist regime do not have the same position but are considered more urgent in the East and Central European states that were subdued by both Nazi and Communist regimes The other internal background is to develop an analytical perspective in which the comnaz nexus can be understood Using a complex approach the authors investigate Communist and Nazi histories as entangled phenomena guided by three basic perspectives Focusing on roots and developments a genetic perspective highlights historical process oriented connections A structural perspective indicates an attempt to narrow down operational parallels of the two political systems in the way they handled ideology to construct social utopia used techniques of terror etc A third perspective is genealogical emphasizing the processing and use of Communist and Nazi history by posterity in terms of meaning and memory What past is worth remembering celebrating debating but also distorting and forgetting The chapters of the book address phenomena such as ideology terror secular religion museum exhibits and denial

To the Past Ruth Sandwell, 2006-12-15 Recent years have witnessed a breakdown in consensus about what history should be taught within Canadian schools there is now a heightened awareness of the political nature of deciding whose history is or should be included in social studies and history classrooms Meanwhile as educators are debating what history should be taught developments in educational and cognitive research are expanding our understanding of how best to teach it To the Past explores some of the political cultural and educational issues surrounding what history education is and why we should care about it in the twenty first century in Canada Originally broadcast in the fall of 2002 on the CBC Radio program Ideas the lectures that comprise this volume not only address how history is taught in Canadian classrooms but also explore strands within larger discussions about the meaning and purposes of history more generally Contributors show how Canadians are demonstrating a new interest in what scholars have termed historical consciousness or collective memory through participation in a wide range of cultural activities from visiting museums to watching the History Channel Canadian adults and children alike seem to be seeking answers to questions of identity meaning community and nation in their study of the past Through this series of essays readers will have the opportunity to explore some of the political and ethical issues involved in this emerging field of Canadian citizenship through history as they learn about public memory and broadly defined history education in Canada

The Notion of Relevance in Information Science Tefko Saracevic, 2022-05-31

Everybody knows what relevance is. It is a ya know notion concept idea no need to explain whatsoever. Searching for relevant information using information technology (IT) became a ubiquitous activity in contemporary information society. Relevant information means information that pertains to the matter or problem at hand; it is directly connected with effective communication. The purpose of this book is to trace the evolution and with it the history of thinking and research on relevance in information science and related fields from the human point of view. The objective is to synthesize what we have learned about relevance in several decades of investigation about the notion in information science. This book deals with how people deal with relevance; it does not cover how systems deal with relevance; it does not deal with algorithms. Spurred by advances in information retrieval (IR) and information systems of various kinds in handling of relevance, a number of basic questions are raised. But what is relevance to start with? What are some of its properties and manifestations? How do people treat relevance? What affects relevance assessments? What are the effects of inconsistent human relevance judgments on tests of relative performance of different IR algorithms or approaches? These general questions are discussed in detail.

Why History? Donald Bloxham, 2020-07-09

What is the point of history? Why has the study of the past been so important for so long? Why History? A History contemplates two and a half thousand years of historianship to establish how very different thinkers in diverse contexts have conceived their activities and to illustrate the purposes that their historical investigations have served. Whether considering Herodotus, medieval religious exegesis or twentieth century cultural history, at the core of this work is the way that the present has been conceived to relate to the past. Alongside many changes in technique and philosophy, Donald Bloxham's book reveals striking long term continuities in justifications for the discipline.

The Pursuit of History John Tosh, 2013-08-21

This classic introduction to the study of history invites the reader to stand back and consider some of its most fundamental questions. What is the point of studying history? How do we know about the past? Does an objective historical truth exist and can we ever access it? In answering these central questions, John Tosh argues that despite the impression of fragmentation created by postmodernism in recent years, history is a coherent discipline which still bears the imprint of its nineteenth century origins. Consistently clear-sighted, he provides a lively and compelling guide to a complex and sometimes controversial subject while making his readers vividly aware of just how far our historical knowledge is conditioned by the character of the sources and the methods of the historians who work on them. The fifth edition has been revised and updated throughout with the addition of new sections on Global history, Comparative history, Postcolonialism, Women's and gender history, Oral history and memory.

Lucid and engaging this new edition retains all the user friendly features that have helped to make this book a favourite with both students and lecturers including marginal glosses illustrations suggested further reading and boxed guides to key events and people

Imperfect Histories Ann Rigney, 2018-09-05 Imperfect Histories puts imperfection at the heart of a theory of historical representation Ann Rigney shows how historical writing involves dealing with intractable subjects that resist our efforts to know and to shape them Those who write history she says engage in an ongoing struggle to match up what they find relevant in the past with the information and interpretive models at their disposal Chronic dissatisfaction is at the heart of historical practice This is especially evident in the various attempts made over the last two centuries to write an alternative history of everyday experience Focusing on historical writing in the last decades of the eighteenth century and the first half of the nineteenth Rigney analyzes a wide range of works by Walter Scott Jules Michelet Augustin Thierry and Thomas Carlyle She shows how the attempt to write an alternative history brought historical writing into a close yet fraught relationship with literature The result is a new account of that relationship as it took shape in the romantic period and as it continues to influence contemporary practices
