Mole,2025-08-26 Huge bird eating spiders Massive teams of tiny termites building high rises out of mud Get ready for a big bold compendium of bugs sure to have kids gleefully shouting Eww Whether you re nibbled by a lizard or you re gobbled by a frog for a bug being eaten is part of the job What was the first animal to walk on land Or fly through the sky The answer is a bug and for every human on earth today there are more than 200 million of these ubiquitous creatures From the New Zealand glowworms whose slimy fairy lights catch flies and gnats to the earthworms whose little tunnels bring water and air to plants from the ladybugs keeping vegetable gardens safe from pesky pests to the common fly working as clean up crew for the stinky stuff we d rather not think about this bright bouncy introduction to bugs shows the ways that we need them more than they need us Written with Simon Mole s trademark energy and illustrated with Adam Ming s pitch perfect humor this collection of thirty witty poems about these often misunderstood creatures provides all the facts kids could want to know about bugs and then some Readers seeking practical tips on how to help bugs will find information in the back matter

Lone Star Field Guide to Texas Snakes Alan Tennant,2006-01-27 The State of Texas not only boasts the largest snakes in North America but also the largest number of species 105 This guide describes in detail each and every one of them from the benign Texas long nosed snake to the venomous Western Cottonmouth Facts on the biology and behavior are given plus the latest findings on abundance reproduction prey sizes and habitat In addition introductory chapters describe the physiology and diet of snakes and an all important section on Venom and Evenomation debunks the many myths surrounding what to do when bit by a venomous snake 128 color plates of species and subspecies aid in identification **Is a Snake Or a Lizard the Pet for Me?** Cara Krenn,2024-08 Scaly bodies Eye catching spots and stripes Snakes and lizards are fun interesting pets Compare these two reptiles side by side Which is easier to feed Which is more active Is one easier to bond with Learn the answers to these questions and more Then decide which one might make the best pet for you A Natural Sense of Wonder Rick Van Noy,2010-09-15 The technology boom of recent years has given kids numerous reasons to stay inside and play while parents increasing safety concerns make it tempting to keep children close to home But what is being lost as fewer kids spend their free time outdoors Deprived of meaningful contact with nature children often fail to develop a significant relationship with the natural world much less a sense of reverence and respect for the world outside their doors A Natural Sense of Wonder is one father s attempt to seek alternatives to the flickering waves of TV and the electrifying boing of video games and get kids outside and into nature In the spirit of Rachel Carson s The Sense of Wonder Rick Van Noy journeys out of his suburban home with his children and describes the pleasures of walking in a creek digging for salamanders and learning to appreciate vultures Through these and other walks to school the Van Noys discover what lives nearby what nature has to teach and why this matters From the backyard to the hiking trail in a tide pool and a tree house in the wild and in town these narrative essays explore the terrain of childhood threatened by the lure of computers and television by fear and the loss of play habitat showing how kids thrive in their special places In chronicling one parent s

determination and at times frustration to get his kids outside A Natural Sense of Wonder suggests ways kids both young and old can experience the wonder found only in the natural world A Book of Migrations Rebecca Solnit,1998 A brilliant meditation on travel The New York Times *Hal Borland's Book of Days* Hal Borland,2022-06-23 Oftentimes the answers to life's biggest questions can be found by searching for them at the smallest scales In *Book of Days* beloved nature writer Hal Borland 1900-1978 takes readers on an eye opening day by day journey through a year of the outdoor world around us Originally published in The New York Times as daily reflections these short reports and observations convey Borland's inspiring thoughts about the world around him and the creatures he shared it with He also muses about the changes in weather and climate through the seasons reflects on our traditions and habits and ponders fundamental questions about what it all means Writing in the tradition of Henry David Thoreau and Aldo Leopold and with the inquisitiveness of a philosopher and the perceptive wit of a wise old New England farmer Borland portrays with simple clarity the elements of change and permanence in the untamed world around us Neither calendar nor almanac this delightful natural history daybook of mini essays features a treasure trove of fascinating philosophical insights and environmental wonders *Book of Days* can be read straight through or savored one day at a time Be sure to also read Hal Borland's other bestselling classics published by Echo Point Books Hal Borland's *Twelve Moons of the Year* and *Sundial of the Seasons* **The Oölogist** ,1912

How to Draw Spectacular Reptiles Earl R. Phelps,2002-04 **Tadpole Hunter** Arnold Cooke,2023-08-15 This book describes the history of amphibian conservation and research in Britain It is packed with unique insights from the author who in the late 1960s was probably Britain's first professional amphibian conservationist At that time the situation for amphibians was extremely serious after three decades of population decline Up to the 1990s Arnold Cooke was directly involved in understanding and trying to remedy the situation via research legislation and active conservation He initiated long term monitoring surveillance and studies that continued well into this century This research developed and utilised simple monitoring techniques such as counting breeding newts at night or toads dead on roads The resulting datasets also proved of value in determining whether breeding behaviour was affected by climate change This personal overview charts in detail how amphibian conservation developed from a relatively low knowledge base with few individuals involved to an abundance of information available for the many groups of people now active in the field It includes published unpublished and no longer readily accessible material to emphasise how contemporary knowledge attitudes and resources affected what was done and what happened as a result Various policies strategies laws and other initiatives have helped stop or slow declines but the future is still uncertain The book will appeal to a broad readership from naturalists to professional herpetologists Furthermore this story will have relevance for amphibian conservation in other countries in light of their more recent widespread declines It is also of interest to those wanting to know more about the development of wildlife conservation in Britain The Spectator ,1906 A weekly review of politics literature theology and art
