Schoolmaking An Alternative In Teacher Education:

Schoolmaking Carolyn Lipton Ellner, Betty J. Barnes, 1977 An experimental training program designed to produce change agents with special skills for working with disadvantaged and culturally deprived children *Alternative Routes to Teaching* Pam Grossman, Susanna Loeb, 2021-02-25 Over the past 20 years alternative certification for teachers has emerged as a major avenue of teacher preparation The proliferation of new pathways has spurred heated debate over how best to recruit prepare and support qualified teachers *Alternative Routes to Teaching* provides a thorough and dispassionate review of the research evidence on alternative certification It takes readers beyond the simple dichotomies that have characterized the debate over alternative certification encourages them to look carefully at the trade offs implicit in any route into teaching and suggests ways to marry the proven strengths of both traditional and alternative approaches *Schoolmaking* Carolyn Lipton Ellner, B. J. Barnes, 1972 **Resources in Education**, 2001 **The Hows and Whys of Alternative Education** Darlene Leiding, 2008 *The Hows and Whys of Alternative Education* offers the essential information on the history of alternative education school choice alternative schools charter schools magnet schools homeschooling private schools vouchers distance learning teacher student parent attraction and the future of educational choice **Alternative Approaches to Education** Fiona Carnie, 2003 This book is designed to give parents and teachers information on the alternative education options available in the UK It covers three main areas Outside the state system small schools Steiner Waldorf schools Montessori schools democratic schools and other schools with alternative philosophies Doing it yourself setting up a small school or learning centre educating at home flexible schooling Alternatives within the state system how some state schools are finding different ways of working The values philosophies and methods of each alternative are described including the first hand experiences and accounts of children teachers and parents There are answers to common questions and useful sources of further information This accessible and informative book is the ideal introduction for parents deciding how best to educate their children It will be of interest to teachers looking to build their knowledge of different education philosophies **Action in Teacher Education**, 1989 [Alternative Schooling, Social Justice and Marginalised Students](#) Stewart Riddle, David Cleaver, 2017-07-14 This book examines the experiences and perspectives of students and teachers at an alternative music school which caters for young learners who have been marginalised and disenfranchised from mainstream schooling The school utilises a rich music infused curriculum that connects to the lives of its students alongside a democratic ethos and ethic of care for members of the school community including the students teachers and parents The combination of personal narratives together with detailed critical discussion provides a compelling argument for how schools can make a major difference to the lives of young people The case study presented in this book offers one potential response to the institutionalised social and educational inequities that young people continue to face and highlights the important lessons from alternative schooling for education more broadly It will be of particular interest to researchers in

the areas of education and sociology especially those concerned with matters of social justice and equity in education

Sugarman, Frank R. Kemerer, 2011-12-01 In this important new volume distinguished legal and public policy scholars address issues that are critical to the successful drafting and implementation of school choice programs yet are usually overlooked in the choice debate They explore whether school choice is a threat or an opportunity to the many children who are largely deprived of choice today and they offer a variety of perspectives with some authors enthusiastic others more skeptical The book begins with a discussion of the types and extent of school choice what is known about its consequences and how politics has influenced its development It then focuses on three important public policy issues how school choice can revolutionize the way schools are financed what policy interventions are necessary to increase the supply of choice schools and how choice programs can be held accountable to parents and the state without undermining institutional autonomy The book addresses legal issues including whether public and private choice schools will be required to observe student and teacher rights generally recognized in traditional public schools how the religion and speech clauses of the First Amendment may affect the participation of religious schools in school choice programs whether school choice will enhance or aggravate opportunities for racial justice what the implications of school choice are for teacher unions and collective bargaining and whether children

with disabilities will be accommodated in school choice programs under federal disability law Throughout the book the authors offer recommendations for public policy development The contributors are Jeffrey Henig Robert Bulman and David L Kirp Paul T Hill Robert M O Neil Jesse H Choper Betsy Levin William G Buss and Laura F Rothstein Stephen D Sugarman is Agnes Roddy Robb Professor of Law at the University of California Berkeley Frank R Kemerer is Regents Professor and director of the Center for
