Science And Theology Questions At The Interface:

Science and Theology Murray Rae, Hilary Regan, John Stenhouse, 2016-10-06 In popular culture science and theology have often been portrayed as antagonistic. Some writers have described the history of the debate in terms of a surrender by theology, a retreat from the field of engagement; theology has abandoned the public arena, leaving all creation to science and has opted instead for the safer ground of ethics, morality and personal or private belief. Science and Theology advocates a constructive dialogue between the two subjects and suggests the topics where they might meet. The essays in this volume were commissioned from leading figures around the world, experts in their own disciplines but enthusiasts for debate at the science and theology interface. They include Norma Emerton, Owen Gingerich, Nancey Murphy, John Polkinghorne, John Puddefoot and Carver T. Yu. They discuss natural theology, the methodologies of science and theology and theology in the light of scientific discovery. Their themes cover scientism, divine action in the world, the problem of evil, freedom and determinism, reductionism and humanity, the limits of knowledge and chaos theory. Together these essays offer a significant and positive contribution to one of the most exciting areas of modern thought. *Science and Religion in Dialogue* Melville Y.

Stewart, 2009-12-01 This two volume collection of cutting edge thinking about science and religion shows how scientific and religious practices of inquiry can be viewed as logically compatible, complementary and mutually supportive. Features submissions by world leading scientists and philosophers. Discusses a wide range of hotly debated issues including Big Bang cosmology, evolution, intelligent design, dinosaurs and creation, general and special theories of relativity, dark energy, the Multiverse Hypothesis and Super String Theory. Includes articles on stem cell research and Bioethics by William Hurlbut who served on President Bush's Bioethics Committee. **Describing the Hand of God** Robert Brennan, 2016-04-28 The question of divine agency in the world remains one important unresolved underlying obstacle in the dialogue between theology and science. Modern notions of divine agency are shown to have developed out of the interaction of three factors in early modernity. Two are well known: late medieval perfect being theology and the early modern application of the notion of the two books of God's revelation to the understanding of the natural order. It is argued the third is the early modern appropriation of the Augustinian doctrine of inspiration. This assumes the soul's existence and a particular description of divine agency in humans which became more generally applied to divine agency in nature. Whereas Newton explicitly draws the parallel between divine agency in humans and that in nature, Darwin rejects its supposed perfection and Huxley raises serious questions regarding the traditional understanding of the soul. This book offers an alternative incarnational description of divine agency, freeing consideration of divine agency from being dependent on resolving the complex issues of perfect being theology and the existence of the soul. In conversation with Barth's pneumatology, this proposal is shown to remain theologically coherent and plausible while resolving or avoiding a range of known difficulties in the science-theology dialogue.

Science and Religion Claudia May, Channon Visscher, 2023-10-24 Science and Religion Perspectives Across Disciplines

interweaves science technology engineering and math STEM fields with the arts humanities theology and psychology to cultivate discussion on science and religion alongside biblical interpretation This anthology is paradoxically ecumenical for it embraces unifying and disparate positions without being prescriptive or exclusive It is both synergistic and disruptive Building on this premise the Advent and Easter stories are examined through praxes from STEM theology and psychology Taken together this anthology allows for connection between disciplines by creating community in the midst of differing approaches to the study of science and religion

Torrance's insights into the theology/science dialogue Christology From Within and Ahead Mark Chan, 2021-10-01

Troeltsch's struggle with historicism sets the stage for a proposal that Christology be done from within and from ahead. Gadamer's philosophical hermeneutics and Schleiermacher's experiential theology inform a Christology from within that is rooted in tradition and experience while Pannenberg's notion of proleptic eschatological fulfilment serves as resource for a Christology from ahead. This volume develops a hermeneutical Christology that takes into account the historical contingency of knowledge and seeks a Christology beyond the objectivism of timeless truth and the relativism of absolutised contextuality. The book is concluded with an examination of the convergence of critical traditionality, experiential appropriation and eschatological prolepsis in the Christology of the apostle Paul. The author explores how Christology might respond to the scandal of universality in postmodernity without defaulting on its claim to transcontextual referentiality.

God, Humanity and the Cosmos - 2nd Edition Christopher Southgate, 2005-12-01. Contributors include Christopher Southgate, John Hedley Brooke, Celia Deane Drummond, Paul D. Murray, Michael Robert Negus, Lawrence Osborn, Michael Poole, Jacqui Stewart, Fraser Watts, David Wilkinson. This fully revised and updated edition of *God, Humanity and the Cosmos* includes new chapters by John Hedley Brooke, Paul D. Murray and David Wilkinson. In addition to a systematic exploration of contemporary perspectives in physics, evolutionary biology and psychology as they relate to theological descriptions of the universe, humanity and consciousness, the book now provides a thorough survey of the theological, philosophical and historical issues underpinning the science/religion debate. Contributors also examine such issues as theological responses to the ecological crisis and to biotechnology, how science is treated and valued in education and the relation of science to Islamic thought. Dr Christopher Southgate is Lecturer in Theology at the University of Exeter.

A Future for American Evangelicalism Harold Heie, 2015-04-15. This book proposes that participation in God's Project of Reconciliation is the Center that can hold evangelical Christians together in the midst of great diversity in belief and ecclesiastical practices. The author envisions a vibrant future for the Evangelical movement if professing evangelicals can model that rare combination of deep commitment to their own beliefs, openness to listening to the beliefs of others and willingness to engage in respectful conversation with those who disagree with them in place of the combativeness that has characterized too much of Evangelicalism in the recent past. The book models this type of conversation on such controversial issues as the exclusivity of Christianity, the inerrancy of the Bible, Evangelicalism and morality, Evangelicalism and politics, scientific models on humanity, cosmic and human origins and the future of evangelical higher education.

Nineteenth-Century Science A.S. Weber, 2000-03-10. *Nineteenth Century Science* is a science anthology which provides over 30 selections from original 19th century scientific monographs, textbooks and articles written by such authors as Charles Darwin, Mary Somerville, J. W. Goethe, John Dalton, Charles Lyell and Hermann von Helmholtz. The volume surveys scientific discovery and thought from Jean Baptiste Lamarck's theory of evolution of 1809 to the isolation of radium by Marie and Pierre Curie in 1898. Each selection opens with a biographical

introduction situating each scientist and discovery within the context of history and culture of the period Each entry is also followed by a list of further suggested reading on the topic A broad range of technical and popular material has been included from Mendeleev s detailed description of the periodic table to Faraday s highly accessible lecture for young people on the chemistry of a burning candle The anthology will be of interest to the general reader who would like to explore in detail the scientific cultural and intellectual development of the nineteenth century as well as to students and teachers who specialize in the science literature history or sociology of the period The book provides examples from all the disciplines of western science chemistry physics medicine astronomy biology evolutionary theory etc The majority of the entries consist of complete unabridged journal articles or book chapters from original 19th century scientific texts **Natural Philosophy**

Alister E.
