Science Politics And Controversy Civilian Nuclear Power In The Us 1946 1974:

Science, Politics, And Controversy Stephen L Del Sesto, 2019-06-26 As of June 1977 the United States had some 232 nuclear power plants either planned or in operation with a generating capacity estimated at about 321 million kilowatts To date the industrial world has spent over 200 billion in order to produce useful energy from nuclear fission By all odds civilian nuclear power is one of the largest technological ventures in history To many this massive effort is completely justified No other single technology offers as much promise for satisfying world energy needs in the years ahead particularly as fossil fuels dwindle and climb drastically in price Yet to others there is no single technology which raises such serious questions of risk to public health and safety

Science, Politics, and Controversy Steven L. Del Sesto, 1979 *Nuclear Politics in America* Robert J. Duffy, 1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon.com viewed August 24 2020

Public-private Policy Partnerships Pauline Vaillancourt Rosenau, 2000 The first book to evaluate public private partnerships in a broad range of policy areas

Social Movements in an Organizational Society Mayer N. Zald, 2017-09-29 First Published in 2017 This book is concerned with the carriers and fate of social movements in modern America It presents an argument that in an organizational society the shape of social movements is closely tied to the technologies forms opportunities and targets created by that society

Site Unseen Gerald Jacob, 2010-11-23 Gerald Jacob views the history of public policy regarding nuclear waste culminating in the 1982 Nuclear Waste Policy act and its aftermath The 1982 act promised a solution but Jacob believes it deferred to the interests of the nuclear utilities and the U S Department of Energy He describes how the nuclear establishment used science and geography to protect its interests and dominate nuclear waste policy making He examines the federal promotion of nuclear power and asserts that federal policies strong armed public opposition and locked the country into a single but flawed waste disposal solution

Beyond Engineering Robert Pool, 1997-07-17 We have long recognized technology as a driving force behind much historical and cultural change Now in *Beyond Engineering* science writer Robert Pool turns the question around to examine how society shapes technology Drawing on such disparate fields as history economics risk analysis management science sociology and psychology Pool illuminates the complex often fascinating interplay between machines and society in a book that will revolutionize how we think about technology We tend to think that reason guides technological development that engineering expertise alone determines the final form an invention takes But if you look closely enough at the history of any invention

says Pool you will find that factors unrelated to engineering seem to have an almost equal impact In his wide ranging volume he traces developments in nuclear energy automobiles light bulbs commercial electricity and personal computers to reveal that the ultimate shape of a technology often has as much to do with happenstance business acumen and cultural context Whether discussing bovine growth hormone nuclear power plants or baboon to human transplants Beyond Engineering is an engaging look at modern technology and an illuminating account of how technology and the modern world shape each other

Life Atomic Angela N. H. Creager, 2024-05-31 After World War II the US Atomic Energy Commission AEC began mass producing radioisotopes sending out nearly 64 000 shipments of radioactive materials to scientists and physicians by 1955 Even as the atomic bomb became the focus of Cold War anxiety radioisotopes represented the government's efforts to harness the power of the atom for peace advancing medicine domestic energy and foreign relations In Life Atomic Angela N H Creager tells the story of how these radioisotopes which were simultaneously scientific tools and political icons transformed biomedicine and ecology Government produced radioisotopes provided physicians with new tools for diagnosis and therapy specifically cancer therapy and enabled biologists to trace molecular transformations Yet the government's attempt to present radioisotopes as marvelous dividends of the atomic age was undercut in the 1950s by the fallout debates as scientists and citizens recognized the hazards of low level radiation Creager reveals that growing consciousness of the danger of radioactivity did not reduce the demand for radioisotopes at hospitals and laboratories but it did change their popular representation from a therapeutic agent to an environmental poison She then demonstrates how by the late twentieth century public fear of radioactivity overshadowed any appreciation of the positive consequences of the AEC's provision of radioisotopes for research and medicine

James B. Conant: Harvard to Hiroshima and the Making of the Nuclear Age James Hershberg, 2019-07-31 James B Conant 1893 1978 was one of the titans of mid 20th century American history attaining prominence and power in multiple fields Usually remembered as an educational leader he was president of Harvard University for two tumultuous decades from the Depression to World War II to the Cold War and McCarthyism To take that job he gave up a scientific career as one of the country's top chemists and he left it twenty years later to become Eisenhower's top diplomat in postwar Germany Hershberg's prize winning study however examines a critical aspect of Conant's life that was long obscured by government secrecy his pivotal role in the birth of the nuclear age During World War II as an advisor to Roosevelt and then Truman on the elite Interim Committee that considered how to employ the bomb against Japan Conant was intimately involved in the decisions to build and use the atomic bomb

During and after the Manhattan Project he also led efforts to prevent a postwar nuclear arms race between the United States and the Soviet Union that he feared threatened the survival of civilization an apocalyptic prospect he glimpsed in the first instant of the new age when he witnessed the first test of the new weapon at Alamogordo on July 16 1945 a vivid inquiry a model of historiography evocative reading Conant was central to atomic policy and progress the bomb would be as much Conant's as it was anyone's in Government His inner response to that burden responsibility has long been obscured but it is illuminated here Philip Morrison The New York Times Book Review In his splendid portrait of Conant James Hershberg has illuminated the life of a pivotal figure in the making of U S nuclear scientific educational and foreign policy for almost a half century But the book is much more It is not only an insightful narration of Conant's life it is also a brilliant and important account of the making of the nuclear age a chronicle that contains much that is new Hershberg's superb study is a chronicle of Conant's moral journey and we are the wiser for his having charted Conant's path S S Schweber Washington Post Book World James G Hershberg ably comes to grips with Conant and his hazardous times His book is vibrantly written and compelling and it breaches Conant's shield of public discretion in masterly fashion making extensive use of unpublished interviews diaries reports and correspondence pried from private and governmental repositories It is a huge ambitious work a history of the Cold War as Conant encountered it as well as a study of the man Daniel J Kevles The New Yorker a well written comprehensive nonjudgmental but sensitive biography Conant was involved in so many and such critical events that students of almost any aspect of our public life over the past half century will find useful the new material and helpful insights in this book This fine biography of one of the most important and complicated of America's twentieth century leaders immediately establishes James Hershberg as one of America's outstanding young historians Stephen E Ambrose Foreign Affairs magnificent Any reader interested in nuclear weapons Cold War history or American politics from FDR to JFK will find this biography riveting Priscilla McMillan Chicago Tribune masterful The prose is clear the narrative forceful and the author's judgments are balanced and judicious This is simply splendid biography The highest praise one can give for a book of this sort is that the historian has not shrunk from speaking truth to power This book quietly but insistently does so It should be read by the public at large as one of the definitive texts on the cold war and the nuclear age Hershberg's triumph is that he has prevailed over all the official lies to give us one more layer of the historical truth Kai Bird The Nation riveting an impressive achievement honest and comprehensive in its scholarship the author has shown himself to be a historian of notable achievement and promise McGeorge Bundy Nature Hershberg's outstanding balanced biography lifts the self imposed secrecy surrounding a key architect of U S Cold War policy and of the nuclear age Publisher's Weekly an impressive and substantial achievement Hershberg has used the life of one strategically placed individual to illuminate the most important issues surrounding America's role and conduct in the nuclear age His book will be invaluable to scholars assessing the impact and legacy of the group who acquired the epithet wise men now that the Cold War has receded Carol S Gruber

Science definitive a far more textured picture than one finds in Conant's own guarded and unrevealing autobiography an important and rewarding book illuminating Conant's life in remarkable and eventful times James Hershberg has explored that life and those times in exhaustive and revealing detail Paul Boyer *The New Republic* James G Hershberg has achieved the impossible He has written a huge biography of a Harvard president that is fascinating informative and as valuable a piece of American history as anything I have read in years Mr Hershberg has brought us back vividly to an age that seems remote so long ago but the questions about nuclear proliferation are the same even while the answers are still ambiguous As we watch men struggling with unanticipated post Cold War problems and civil wars sprouting like Jason's men at arms it is good to read this story about a complex man who deserves an important place in our history because he helped make that history possible Arnold Beichman *The Washington Times* engrossing A magisterial study of an awesome and intriguing public career Kirkus Reviews entertaining thought provocative Dick Teresi *The Wall Street Journal* Hershberg's book helps us more clearly understand the postwar Establishment and offers a challenging appraisal of the role of elites of universities and of the state Gar Alperovitz *In These Times* Hershberg deserves great credit for cracking a tough New England walnut analyzing this very important public figure demonstrating how he fit into his own time and showing us what we can learn from the man Daniel R Mortensen *The Friday Review of Defense Literature* a compelling account an engaging examination of one of the central figures of the nuclear age It succeeds in showing one man's intersection with great events and issues and in the process illuminates those issues for us all American Historical Review well written Conant's participation in one of our country's most dynamic periods is thanks to Hershberg now much better understood Library Journal A reader of the book will enter the realm of the greats the shapers of worlds created by the atomic blasts at Hiroshima and Nagasaki Conant was no bit player in Cold War history the book is very successful in weaving Conant's subsurface persona in with his ups and downs as a prominent and committed public figure And it leaves out little detail in describing top level decisions involving the Cold War geopolitics of nuclear weaponry Conant was a participant in most of these decisions with Presidents Roosevelt and Truman themselves their Secretaries of War and State and of course all the major scientific figures of the time Chemical Engineering News A wonderfully rich portrait that emerges from a carefully documented account of Conant's role in the development of the atomic bomb and post war nuclear policy An extraordinarily well written text Hershberg lays bare the person behind the persona warts dimples and all Stanley Goldberg *Bulletin of the Atomic Scientists*

The Rise of Nuclear Fear Spencer R. Weart, 2012-03-19 After the Fukushima Nuclear Power Plant had a meltdown protesters around the world challenged nuclear power Climate change has never aroused this visceral dread Weart dissects this paradox showing that powerful images surrounding nuclear energy hold us captive allowing fear rather than facts to drive our thinking and public policy

Mobilizing Against Nuclear Energy Christian Joppke, 2023-09-01 In the past two decades young people environmentalists church activists leftists and others have mobilized against nuclear energy

Anti nuclear protest has been especially widespread and vocal in Western Europe and the United States In this lucid richly documented book Christian Joppke compares the rise and fall of these protest movements in Germany and the United States illuminating the relationship between national political structures and collective action He analyzes existing approaches to the study of social movements and suggests an insightful new paradigm for research in this area Joppke proposes a political process perspective that focuses on the interrelationship between the state and social movements a model that takes into account a variety of forces including differential state structures political cultures movement organizations and temporal and contextual factors This is an invaluable work for anyone studying the dynamics of social movements around the world In the past two decades young people environmentalists church activists leftists and others have mobilized against nuclear energy Anti nuclear protest has been especially widespread and vocal in Western Europe and the United States In this lucid ri

Accident At Three Mile Island David L. Sills, 2019-03-01 The nuclear accident at Three Mile Island in March 1979 was as much a social systems failure as it was an engineering failure It raised questions not only about the regulation and management of nuclear power plants but also about the effects of nuclear accidents on the community on society and on the total controversy surrounding nuclear energy Questions were also raised about public perceptions of the risks of high technology At the request of the President's Commission on the Accident at Three Mile Island the Kemeny Commission the Social Science Research Council commissioned social scientists to write a series of papers on the human dimensions of the event This volume includes those papers in revised and expanded form and a comprehensive bibliography of published and unpublished social science research on the accident and its aftermath The National Politics of Nuclear Power Benjamin K. Sovacool, Scott V. Valentine, 2012 This book offers a comprehensive assessment of the dynamics driving and constraining nuclear power development in Asia Europe and North America providing detailed comparative analysis The book formulates a theory of nuclear socio political economy which highlights six factors necessary for embarking on nuclear power programs 1 national security and secrecy 2 technocratic ideology 3 economic interventionism 4 a centrally coordinated energy stakeholder network 5 subordination of opposition to political authority and 6 social peripheralization The book validates this theory by confirming the presence of these six drivers during the initial nuclear power developmental periods in eight countries the United States France Japan Russia the former Soviet Union South Korea Canada China and India The authors then apply this framework as a predictive tool to evaluate contemporary nuclear power trends They discuss what this theory means for developed and developing countries which exhibit the potential for nuclear development on a major scale and examine how the new renaissance of nuclear power may affect the promotion of renewable energy global energy security and development policy as a whole The volume also assesses the influence of climate change and the recent nuclear accident in Fukushima Japan on the nuclear power industry's trajectory This book will be of interest to students of energy policy and security nuclear proliferation international security global governance and IR in general *Community at Risk* Thomas D.

Beamish,2015-05-06 In 2001 following the events of September 11 and the Anthrax attacks the United States government began an aggressive campaign to secure the nation against biological catastrophe Its agenda included building National Biocontainment Laboratories NBLs secure facilities intended for research on biodefense applications at participating universities around the country In Community at Risk Thomas D Beamish examines the civic response to local universities plans to develop NBLs in three communities Roxbury MA Davis CA and Galveston TX At a time when the country s anxiety over its security had peaked reactions to the biolabs ranged from vocal public opposition to acceptance and embrace He argues that these divergent responses can be accounted for by the civic conventions relations and virtues specific to each locale Together these elements clustered providing a foundation for public dialogue In contrast to conventional micro and macro level accounts of how risk is perceived and managed Beamish s analysis of each case reveals the pivotal role played by meso level contexts and political dynamics Community at Risk provides a new framework for understanding risk disputes and their prevalence in American civic life

Bureaucracy In Crisis Maureen Hogan Casamayou,2019-08-22 How bureaucracies perceive and respond to technological risk is the subject of this study in organizational theory The author offers evidence from primary sources such as the testimony of agency officials agency memoranda and extensive interviews in Congress the bureaucracy and the White House to explain the organizational failures leading to the Three Mile Island and Challenger accidents She examines the implications of these organizational failures in terms of how organizations communicate about and cope with potential risks to public safety in hopes of avoiding such disasters in the future

Nuclear Power and Social Power Rick Eckstein,1997 We often think of progress and economic growth as natural developments that benefit various members of society This title challenges this view and instead suggests that specific definitions of progress and economic growth can be molded by powerful individuals organizations and classes

Politics, Values, And Public Policy Frank Fischer,2019-06-04 Addressed to the growing concerns about norms and values in policy assessment this study develops a methodology for the political evaluation of public policy It is designed to move policy evaluation beyond its current emphasis on efficient achievement of goals focusing instead on the assessment of the acceptability of the goals themselves

Supplying the Nuclear Arsenal Rodney P.

Carlisle,2020-02-04 Originally published in 1996 Although the history of commercial power nuclear reactors is well known the story of the government reactors that produce weapons grade plutonium and tritium has been shrouded in secrecy Supplying the Nuclear Arsenal looks at the origin and development of these production reactors Rodney Carlisle and Joan Zenzen describe a fifty year government effort no less complex expensive and technologically demanding than the Polaris or Apollo programs yet one about which most Americans know virtually nothing Carlisle and Zenzen describe the evolution of

the early reactors the atomic weapons establishment that surrounded them and the sometimes bitter struggles between business and political constituencies for their share of nuclear pork They show how since the 1980s aging production reactors have increased the risk of radioactive contamination of the atmosphere and water table And they describe how the Department of Energy mounted a massive effort to find the right design for a new generation of reactors only to abandon that effort with the end of the Cold War Today all American production reactors remain closed Due to short half life the nation's supply of tritium crucial to modern weapons is rapidly dwindling As countries like Iraq and North Korea threaten to join the nuclear club the authors contend the United States needs to revitalize tritium production capacity in order to maintain a viable nuclear deterrent Meanwhile as slowly decaying artifacts of the Cold War the closed production reactors at Hanford Washington and Savannah River South Carolina loom ominously over the landscape
