The background of the lower half of the cover is an abstract, black and white image. It features a series of horizontal, wavy lines that create a sense of depth and movement, resembling a landscape of sand dunes or a textured surface. The lines are more pronounced in the foreground and fade into the background.

Engineering and Mathematics Faculty presents new and surprising findings about career differences between female and male full time tenure track and tenured faculty in science engineering and mathematics at the nation s top research universities Much of this congressionally mandated book is based on two unique surveys of faculty and departments at major U S research universities in six fields biology chemistry civil engineering electrical engineering mathematics and physics A departmental survey collected information on departmental policies recent tenure and promotion cases and recent hires in almost 500 departments A faculty survey gathered information from a stratified random sample of about 1 800 faculty on demographic characteristics employment experiences the allocation of institutional resources such as laboratory space professional activities and scholarly productivity This book paints a timely picture of the status of female faculty at top universities clarifies whether male and female faculty have similar opportunities to advance and succeed in academia challenges some commonly held views and poses several questions still in need of answers This book will be of special interest to university administrators and faculty graduate students policy makers professional and academic societies federal funding agencies and others concerned with the vitality of the U S research base and economy Engineering for Peace and Diplomacy Bernard Amadei,2025-08-06 This book makes a compelling argument for the role of the engineering profession in advancing human development and security and its contribution to various peacebuilding and diplomatic efforts in the 21st century world How do engineers collaborate with other disciplines to deliver interventions contributing to peacebuilding and diplomatic efforts in conflict affected conflict sensitive and fragile community environments How should engineers be trained in lifelong practice to do so What principles should the engineering profession uphold while participating in peacebuilding and diplomatic initiatives How does the engineering profession serve the local and global public good The book emphasizes the importance of developing programs such as peace engineering and engineering diplomacy and training globally engaged engineers with attitudes skills knowledge and lifelong experience to address the challenges of the 21st century Engineering is not only about delivering technology It involves developing and implementing solutions that benefit people and the planet nature based solutions contribute to prosperity create partnerships and promote peace Engineers must be systems thinkers and globally involved in actively participating in sustainable development peacebuilding peacemaking peacekeeping and diplomatic efforts Science, Technology, and Society David D. Kumar,Daryl E. Chubin,2012-12-06 David D Kumar and Daryl E Chubin We live in an information age Technology abounds information tech nology communication technology learning technology As a once popular song went Something s happening here but it s just not exactly clear The world appears to be a smaller less remote place We live in it but we are not necessarily closely tied to it We lack a satisfactory understanding of it So we are left with a paradox In an information age information alone will neither inform nor improve us as citizens nor our democracy society or in stitutions No improvement will take some effort It is a heavy burden to be reflective indeed analytical and disciplined but only constructively constrained by different perspectives The science based

technology that makes for the complexity contro versy and uncertainty of life sows the seeds of understanding in Science Technology and Society STS as it is known encompasses a hybrid area of scholarship now nearly three decades old As D R Sarewitz a former geologist now congressional staffer and an author put it After all the important and often controversial policy dilemmas posed by issues such as nuclear energy toxic waste disposal global climate change or biotech nology cannot be resolved by authoritative scientific knowledge instead they must involve a balancing of technical considerations with other criteria that are explicitly nonscientific ethics esthetics equity ideology Trade offs must be made in light of inevitable uncertainties Sarewitz 1996 p 182
