This issue's Out Front dossier, coedited by Kitty Krupat and Patrick McCreery, who also contribute essays, takes a hard look at the emergent relationship between sexual politics and the labor movement. AFL-CIO president John J. Sweeney presents a major policy statement, and four other labor leaders—Bill Fletcher Jr., Yvette Herrera, Gloria Johnson, and Van Allen Sheets—discuss homophobia as "labor's new frontier." Nikhil Pal Singh's conversation with lesbian activist Amber Hollibaugh and a virtuoso piece by filmmaker Tami Gold offer incisive personal histories and commentaries, and Cathy J. Cohen takes the politics of the mainstream gay and lesbian movement to task. . . . Also in this issue are two separate essays by Vinay Lal and Paola Sacchetta about the complex state of sexual politics in India. \$12.00 Winter 1999

Science Wars Andrew Ross,1996 Analyzing the antidemocratic tendencies within science and its institutions they insist on a more accountable relationship between scientists and the communities and environments affected by their research

The Network Collective Klaus Eichmann,2008-11-18 The network paradigm dominated immunological research from the early 1970s to the late 1980s The originator Niels Jerne hypothesized that the vast diversity of antibodies in each individual forms a network of mutual idiotypic recognition thus regulating the immune system In context of emerging concepts of systems biology such as cybernetics and autopoiesis the Eigenbehavior of the immune system fascinated an entire generation of young immunologists But fascination led to experimental errors and overinterpretation eventually magnifying the immune system from a mere infection fighting device to a substrate of personality and individuality As a result what initially appeared as an exciting new perspective of the immune system is now viewed as a scientific vagary and is largely abandoned The author himself a participant in the network vagary begins with a description of the leading theoretical concepts on fact finding in science This is followed by a historical account of the rise and fall of the network paradigm complemented by personal interviews with some of the prominent protagonists By comparing the network paradigm to other more lasting concepts in life science the author develops a general perspective on how solid knowledge is derived from error prone scientific methodology namely by exposure of scientific notions to the scrutiny of reality *The New Media Theory*

Reader Hassan, Robert,Thomas, Julian,2006-09-01 The study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed It encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon The Nature of Being Human

Harold Fromm,2009-05-04 Essays exploring humanity s connection with the environment Although the physical relationship between the natural world and individuals is quantifiable the psychosocial effect of the former on the latter is often less tangible What for instance is the connection between the environment in which we live and our creativity How is our consciousness bounded and delimited by our materiality And from whence does our idea of self and our belief in free will derive and when do our surroundings challenge these basic assumptions Eco critic Harold Fromm s challenging exploration of these and related questions twines his own physical experiences and observations with insights gathered from both the humanities and the sciences Writing broadly and personally Fromm explores our views of nature and how we write about it He ties together ecology evolutionary psychology and consciousness studies to show that our perceived separation from our surroundings is an illusory construct He argues for a naturalistic vision of creativity free will and the literary arts unimpeded by common academic and professional restraints At each point of this intellectual journey Fromm is honest engaging and unsparing Philosophical critical often personal Fromm s sweeping interdisciplinary and sometimes combative essays will change the way you think about your place in the environment How rare it is that a

work of philosophical inquiry is written with the passion of a *cri de coeur* but Harold Fromm's brilliantly conceived *The Nature of Being Human* resonates with such uncanny depths Here is an utterly engrossing first person account of a harrowing pilgrimage into the 21st century and its disturbing revelations about humankind's truest nature in contrast to the comforting solitudes of a humanist past If the role of the philosopher is to force us to think Harold Fromm is a born philosopher Joyce Carol Oates Fromm an erudite prolific author of numerous works ranging from ecocritical commentary to self reflective discourses presents a compilation of essays that illuminate his views regarding why most Americans seem oblivious to the destruction of their environment Choice Fromm's journey from victim to campaigner to pioneer of eco criticism that is the study of literature from an ecological viewpoint is documented here alongside challenging analyses of man's place in nature free will our relationship with technology and more Scholarly but engaging Fromm is an environmentalist but also a realist Organic Gardener

Cognitive Justice in a Global World Boaventura de Sousa Santos, 2007-10-23 Cognitive Justice in a Global World Prudent Knowledges for a Decent Life is an edited collection that springs from the now dormant debates known as The Science Wars which questioned the nature of scientific theories Learning from the debates about the plurality of truths and opinions editor Boaventura de Sousa Santos has realized an opportunity for strengthening the relations between the natural and social sciences with more epistemological affinities and for opening up new transnational dialogues between scientists and other producers of knowledge This book analyses in detail some of the topics that amount to a set of problematic relations between science and ethics between objectivity and neutrality between the sociological and theoretical condition of production and the limits of scientific rigor between public faith in science and the economic powers that determine scientific priorities and between science and other kinds of knowledge existing in society Maintaining that global social injustice is by and large epistemological injustice and that there can be no global social justice without global cognitive justice Cognitive Justice in a Global World is an important collection for higher level students and researchers in the social sciences philosophy of science and intellectual history

Geopolitics and Business Čedomir Nestorović, 2023-11-29 This book sheds light on the intricate relationship between geopolitics and business and the essential interdependence between corporations and geopolitics Despite apparent animosity practical solutions and theories proposed by geopolitics find resonance within the business world and vice versa Concepts like critical theory disruption hegemony strategic rivalry and cost effectiveness hold common ground in both realms even though they have historically been disregarded Geopolitical authors have often overlooked the vital role played by businesses in shaping global affairs while businesses themselves view geopolitics as a risk to be managed These contrasting viewpoints have given rise to misunderstandings and misconceptions between the two spheres The author sets out to bridge the gap between

geopolitics and business exploring how corporations perceive space state and power while also analyzing the influence of classical critical and feminist geopolitics on business strategies This comprehensive analysis reveals that businesses are not mere non state agents among many but indeed the principal non state agents in geopolitics The book is an essential read for scholars researchers and professionals seeking a deeper understanding of the dynamic interplay between these critical forces

Interdiscipline Petar Ramadanovic, 2021-11-29 This book brings together two different discussions on the value of the humanities and a broader debate on interdisciplinary scholarship in order to propose a new way beyond current threats to the humanities Petar Ramadanovic offers nothing short of a drastic rehaul of our approaches to literary scholarship the humanities and university systems Beginning with an analysis of what is often referred to as the crises in the humanities the author looks at the specifics of literary studies but also issues around working conditions for academics From precarity and pay conditions to peer review the book has practical as well as theoretical implications that will resonate throughout the humanities While most books defending the humanities emphasize the uniqueness of the subject or area Ramadanovic does the opposite emphasizing the need for interdisciplinarity and combined knowledge This proposal is then fully explored through literary studies and its potential throughout the humanities and beyond into the sciences Interdiscipline is not just a defense of literature and the humanities it offers a clear and inspiring pathway forwards drawing on all disciplines to show their cultural and social significance The book is important reading for all scholars of literary studies and also throughout the humanities

Elite Cultures Cris Shore, Stephen L. Nugent, 2002 What makes an elite This authoritative new volume examines elite groups in power across Europe North America Mexico Peru Indonesia and Africa to answer this question fully at a time of their increasing dominance

Survivor-Centred Justice Ingrid Roestenburg-Morgan, Tim Murithi, 2025-02-04 This volume interrogates global perspectives and issues that constitute and characterize survivor centred justice exploring both conceptual and theoretical issues surrounding the definition of a survivor practical considerations of what constitutes a survivor centred approach to justice and available avenues of justice for survivors of mass atrocities In the first part of the book survivor centred justice is explored at the level of the International Criminal Court ICC The second part evaluates developments taking place at the local and domestic levels where traditional customary or local justice mechanisms find affinity with survivors in their quest for justice The third part focuses on advocacy based approaches being utilized specifically by non governmental organizations NGOs multilateral and regional institutions such as the United Nations and African Union in support of survivors In the final part of the book future prospects for survivors in the promotion of peacebuilding and atrocity prevention are discussed The discussions in this volume will be of particular value and importance to international and transitional justice scholars including legal and development practitioners interested in survivor centred approaches to mass atrocity crimes Most importantly it aims to be of value to survivors survivor communities and survivor centred networks

Once More Unto the Breach, Dear Friends Irving Louis Horowitz, Andrew McIntosh, Patrick

Ivins, Deborah Berger, 2017-07-05 Candor breadth judiciousness all these are attributes Irving Louis Horowitz possesses as a scholar Under his leadership there is no academic publication from which I have learned as much as Transaction Society David Riesman Harvard University We are all happy beneficiaries of Horowitz's acutely perceptive and often devastatingly plain spoken self as sociologist and sage broad gauged scholar dedicated teacher tough minded editor and publisher with an ingrained sense of fairness Robert K Merton Columbia University *Security Studies* Christopher W. Hughes, Yew Meng Lai, 2011-02-18 This reader brings together key contributions from many of the leading scholars in the field offering students an informed overview of the most significant work in security studies The editors chart the development of the key theoretical and empirical debates in security studies in the Cold War and post Cold War periods introducing the ideas of the most influential past masters and contemporary thinkers on security in the UK US and elsewhere The book is divided into five areas What is Security Security Paradigms Security Dimensions and Issues Security Frameworks and Actors The Future of Security In order to guide students through the issues the book has a substantial critical introduction exploring the development of security studies as well as introductory essays that provide an overview of each section highlighting clearly how the readings fit together Suggestions for further reading and key questions for discussion are also included Security Studies is an invaluable resource for all students of security studies and international relations *Report of the Library Syndicate for the Year ...* Cambridge University Library, 1913 **Report of the Library Syndicate** Cambridge University Library, 1905 **Locating Zika** Kevin Bardosh, 2019-12-06 The emergence of Zika virus in 2015 challenged conventional ideas of mosquito borne diseases tested the resilience of health systems and embedded itself within local sociocultural worlds with major implications for environmental sexual reproductive and paediatric health This book explores this complex viral epidemic and situates it within its broader social epidemiological and historical context in Latin America and the Caribbean The chapters include a diverse set of case studies from scholars and health practitioners working across the region from Brazil Venezuela Ecuador Mexico Colombia the United States and Haiti The book explores how mosquito borne disease epidemics not only Zika but also chikungunya dengue and malaria intersect with social change and health governance By doing so the authors reflect on the ways in which situated knowledge and social science approaches can contribute to more effective health policy and practice for mosquito borne disease threats in a changing world The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *The Eclectic Magazine of Foreign Literature, Science, and Art*, 1871 [The Empire Strikes Back](#) Rebecca Harrison, 2020-10-29 The Empire Strikes Back 1980 the second film in the original Star Wars trilogy is often cited as the best and most popular Star Wars movie In her compelling study Rebecca Harrison draws on previously unpublished archival research to reveal a variety of original and often surprising perspectives on the film from the cast and crew who worked on its production through to the audiences who watched it in cinemas Harrison guides readers on

a journey that begins with the film's production in 1979 and ends with a discussion about its contemporary status as an object of reverence and nostalgia. She demonstrates how Empire's meaning and significance has continually shifted over the past 40 years not only within the franchise but also in broader conversations about film authorship, genre, and identity. Offering new insights and original analysis of Empire via its cultural context, production history, textual analysis, exhibition, reception, and post-1980 re-evaluations of the film, the book provides a timely and relevant reassessment of this enduringly popular film.

Territorial Separatism in Global Politics Damien Kingsbury, Costas Laoutides, 2015-03-05 This volume examines the various aspects of territorial separatism, focusing on how and why separatist movements arise. Featuring essays by leading scholars from different disciplinary perspectives, the book aims to situate the question of separatism within the broader socio-political context of the international system, arguing that a set of historical events as well as local, regional, and global dynamics have converged to provide the catalysts that often trigger separatist conflicts. In addition, the book marks progress towards a new conceptual framework for the study of territorial separatism by linking the survival of communities in international politics with the effective control of territory and the consequent creation of new polities. Separatist conflicts challenge conventional wisdom concerning conflict resolution within the context of international relations by unpacking a number of questions with regard to conflict transformation. Through the use of case studies including Cyprus, the Rakhine state in Myanmar, the Shia separatism in Iraq, the Uighurs in China, and the case of East Timor, the volume addresses key issues including the role of democracy, international law, intervention, post-conflict peacebuilding, and the creation of new political entities. The book will be of much interest to students of Intra-State Conflict, Conflict Resolution, International Law, Security Studies, and International Relations.

Thicker Than Water Leonore Davidoff, 2012 A pioneering new study of nineteenth-century kinship and family relations, focusing on the British middle class and highlighting both the similarities and the differences in relations between brothers and sisters in the past and in the present.

Empires of Panic Robert Peckham, 2015-01-01 Empires of Panic is the first book to explore how panics have been historically produced, defined, and managed across different colonial, imperial, and post-imperial settings, from early nineteenth-century East Asia to twenty-first-century America. Contributors consider panic in relation to colonial anxieties, rumors, indigenous resistance, and crises, particularly in relation to epidemic disease. How did Western government agencies, policymakers, planners, and other authorities understand, deal with, and neutralize panics? What role did evolving technologies of communication play in the amplification of local panics into global events? Engaging with these questions, the book challenges conventional histories to show how intensifying processes of intelligence gathering did not consolidate empire but rather served to produce critical uncertainties on the uneven terrain of imperial panic. Robert Peckham is associate professor in the Department of History and co-director of the Centre for the Humanities and Medicine at the University of Hong Kong. Charting the relays of rumor and knowledge that stoke colonial fears of disease, disorder, and disaster, Empires of Panic offers timely and cautionary insight.

into how viscerally epidemics inflame imperial anxieties and how words and their communication over new technologies accelerate panic rally government intervention and unsettle and entrench the exercise of global power Relevant a century ago and even more so today Nayan Shah University of Southern California author of *Contagious Divides Epidemics and Race in San Francisco's Chinatown* Empires generated anxiety as much as ambition This fine study focuses on anxieties generated by disease It is the first book of its kind to track shifting forms of panic through different geopolitical regimes and imperial formations over the course of two centuries Working across medical and imperial histories it is a major contribution to both Andrew S Thompson University of Exeter author of *Empire and Globalisation Networks of People Goods and Capital in the British World c 1850 1914* with Gary B Magee
