current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition interpretation engagement and service Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability and empathy Advocating for change rather than death to museums Museums in Motion demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from where they are today and where they are going Entirely new to this edition Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future The chapters examine museums from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible

Learning Conversations in Museums Gaea Leinhardt, Kevin Crowley, Karen Knutson, 2003-01-30 What do people learn from visiting museums and how do they learn it The editors approach this question by focusing on conversations as both the process and the outcome of museum learning People do not come to museums to talk but they often do talk This talk can drift from discussions of managing the visit to remembrances of family members and friends not present to close analyses of particular objects or displays This volume explores how these conversations reflect and change a visitor s identity discipline specific knowledge and engagement with an informal learning environment that has been purposefully constructed by an almost invisible community of designers planners and educators Fitting nicely into a small but rapidly expanding market this book presents one of the first theoretically grounded set of studies on museum learning an explicit presentation of innovative and rich methodologies on learning in museums information on a variety of museums and subject matter a study on exhibitions ranging from art to science content authors from the museum and the academic world a range of methods from the analysis of diaries written to record museum visits to studies of preservice teachers using pre and post museum visit tests an examination of visitors ranging from age 4 75 years of age and from known and unknown sample populations and a lens that examines museum visits in a fine grained 1 second or big picture week year
