Science Anytime Harcourt Brace & Company, Harcourt School Publishers Staff, 1995-01 **Studies in the Atmospheric Sciences** Mark L. Berliner, 2000-03-30 The need to understand and predict the processes that influence the Earth's atmosphere is one of the grand scientific challenges for the next century This volume is a series of case studies and review chapters that cover many of the recent developments in statistical methodology that are useful for interpreting atmospheric data L Mark Berliner is Professor of Statistics at Ohio State University **Mathematics in Medicine and the Life Sciences** Frank C. Hoppensteadt, Charles S. Peskin, 2013-03-09 The aim of this book is to introduce the subject of mathematical modeling in the life sciences It is intended for students of mathematics the physical sciences and engineering who are curious about biology Additionally it will be useful to students of the life sciences and medicine who are unsatisfied with mere description and who seek an understanding of biological mechanism and dynamics through the use of mathematics The book will be particularly useful to premedical students because it will introduce them not only to a collection of mathematical methods but also to an assortment of phenomena involving genetics epidemics and the physiology of the heart lung and kidney Because of its introductory character mathematical prerequisites are kept to a minimum they involve only what is usually covered in the first semester of a calculus sequence The authors have drawn on their extensive experience as modelers to select examples which are simple enough to be understood at this elementary level and yet realistic enough to capture the essence of significant biological phenomena drawn from the areas of population dynamics and physiology Because the models presented are realistic the book can serve not only as an introduction to mathematical methods but also as a mathematical introduction to the biological material itself For the student who enjoys mathematics such an introduction will be far more stimulating and satisfying than the purely descriptive approach that is traditional in the biological sciences

Dynamic Process Methodology in the Social and Developmental Sciences Jaan Valsiner, Peter C. M. Molenaar, Maria C.D.P. Lyra, Nandita Chaudhary, 2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition

to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes **Sustainable Statistical and Data Science Methods and Practices** O. Olawale Awe, Eric A.

Vance, 2024-01-05 This volume gathers papers presented at the LISA 2020 Sustainability Symposium in Kumasi Ghana May 2 6 2022 They focus on sustainable methods and practices of using statistics and data science to address real world problems From utilizing social media for statistical collaboration to predicting obesity among rural women and from analyzing inflation in Nigeria using machine learning to teaching data science in Africa this book explores the intersection of data statistics and sustainability With practical applications code snippets and case studies this book offers valuable insights for researchers policymakers and data enthusiasts alike The LISA 2020 Global Network aims to enhance statistical and data science capability in developing countries through the creation of a network of collaboration laboratories also known as stat labs These stat labs are intended to serve as engines for development by training the next generation of collaborative statisticians and data scientists providing research infrastructure for researchers data producers and decision makers and enabling evidence based decision making that has a positive impact on society The research conducted at LISA 2020 focuses on practical methods and applications for sustainable growth of statistical capacity in developing nations **Teacher**
