Christ, Science, and Reason Robert Spitzer, 2024-09-25 This is currently the only volume that comprehensively presents the scientific evidence in support of Jesus the Eucharist and Mary Father Robert Spitzer S J closely examines the scientific evidence for The Passion and Resurrection of Jesus from the Shroud of Turin The Real Presence of Jesus in the Holy Eucharist from three recent scientifically investigated Eucharistic miracles The supernatural dimensions of the apparitions of Mary manifest in the Tilma of Guadalupe the Miracle of the Sun at Fatima and many healing miracles connected with the Grotto of Lourdes This work also presents a summary of contemporary historical and exegetical evidence for the historicity Passion and Resurrection of Jesus and concludes with a consideration of the Catholic Church and science particularly the Church's contributions to science the complementarity of science and the Bible and the complementarity of physical evolution and the creation of a soul The book makes clear that the Catholic Church is not anti science but quite the opposite it is one of the most scientifically aware religious denominations in the world It will also be clear that science is not anti God anti Christ or anti religious On the contrary its tools and methods give considerable credible evidence for all of them

Comparable Corpora and Computer-assisted Translation Estelle Maryline Delpech, 2014-07-22 Computer assisted

translation CAT has always used translation memories which require the translator to have a corpus of previous translations that the CAT software can use to generate bilingual lexicons This can be problematic when the translator does not have such a corpus for instance when the text belongs to an emerging field To solve this issue CAT research has looked into the leveraging of comparable corpora i e a set of texts in two or more languages which deal with the same topic but are not translations of one another This work had two primary objectives The first is to assess the input of lexicons extracted from comparable corpora in the context of a specialized human translation task The second objective is to identify bilingual lexicon extraction methods which best match the translators needs determining the current limits of these techniques and suggesting improvements The author focuses in particular on the identification of fertile translations the management of multiple morphological structures and the ranking of candidate translations The experiments are carried out on two language pairs English French and English German and on specialized texts dealing with breast cancer This research puts significant emphasis on applicability methodological choices are guided by the needs of the final users This book is organized in two parts the first part presents the applicative and scientific context of the research and the second part is given over to efforts to improve compositional translation The research work presented in this book received the PhD Thesis award 2014 from the French association for natural language processing ATALA
