Science With Computers:

Science with Computers John Steffee,1999 *Digitized* Peter J. Bentley,2012-03-22 There s a hidden science that affects every part of your life You are fluent in its terminology of email WiFi social networking and encryption You use its results when you make a telephone call access the Internet use any factory produced product or travel in any modern car The discipline is so new that some prefer to call it a branch of engineering or mathematics But it is so powerful and world changing that you would be hard pressed to find a single human being on the planet unaffected by its achievements The science of computers enables the supply and creation of power food water medicine transport money communication entertainment and most goods in shops It has transformed societies with the Internet the digitization of information mobile phone networks and GPS technologies Here Peter J Bentley explores how this young discipline grew from its theoretical conception by pioneers such as Turing through its growth spurts in the Internet its difficult adolescent stage where the promises of AI were never achieved and dot com bubble burst to its current stage as a semi mature field now capable of remarkable achievements Charting the successes and failures of computer science through the years Bentley discusses what innovations may change our world in the future
