Discovering Science Through Inquiry: Matter Kit Rachel E.

Green, 2010-05-12 The Discovering Science through Inquiry series provides teachers and students of grades 3-8 with direction for hands-on science exploration around particular science topics and focuses. The series follows the 5E model: engage, explore, explain, elaborate, evaluate. The Matter kit provides a complete inquiry model for the exploration of the structure and properties of matter through supported investigation. Encourage students through activities such as studying the chemical properties of matter and investigating whether household items are acids and bases. The Matter kit includes 16 Inquiry Cards in print and digital formats, Teacher's Guide, Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students, and video clips to support both students and teachers.

Resources for Teaching Elementary School Science National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution, 1996-03-28 What activities might a teacher use to help children explore the life cycle of butterflies? What does a science teacher need to conduct a leaf safari for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A completely revised edition of the best-selling resource guide *Science for Children*, *Resources for Teachers*, this new book is an annotated guide to hands-on, inquiry-centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade. Companion volumes for middle and high school are planned. The guide annotates about 350 curriculum packages describing the activities involved and what students learn. Each annotation lists recommended grade levels, accompanying materials, and kits or suggested equipment and ordering information. These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to ask questions and find their own answers. Experiment productively. Develop patience, persistence, and confidence in their own ability to solve real problems. The entries in the curriculum section are grouped by scientific area: Life Science, Earth Science, Physical Science, and Multidisciplinary and Applied Science, and by type: core materials, supplementary materials, and science activity books. Additionally, a section of references for teachers provides annotated listings of books about science and teaching, directories and guides to science trade books and magazines that will help teachers enhance their students' science education. *Resources for Teaching Elementary School Science* also lists, by region and state, about 600 science centers, museums, and zoos where teachers can take students for interactive science experiences. Annotations highlight almost 300 facilities that make significant efforts to help teachers. Another section describes more than 100 organizations from which teachers can obtain more resources. And a section on publishers and suppliers gives names and addresses of sources for materials. The guide will be invaluable to
