Scientific Colonialism Nathan Reingold, Marc Rothenberg, 1987 **An Empire on Display** Peter H. Hoffenberg, 2001
The exhibitions of the Victorian and Edwardian eras are the lens through which this book examines the economic cultural and social forces that helped define Britain and the Empire It focuses on exhibitions in England Australia and India from the Great Exhibition to the Festival of Empire **Astronomy in India, 1784-1876** Joydeep Sen, 2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the foundation of the Asiatic Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy **Pasts Beyond Memory** Tony Bennett, 2004-07-31 Contributing to current debates on relationships between culture and the social and the the rapidly changing practices of modern museums as they seek to shed the legacies of both evolutionary conceptions and colonial science this important new work explores how evolutionary museums developed in the USA UK and Australia in the late nineteenth century **American Curiosity** Susan Scott Parrish, 2012-12-01 Colonial America presented a new world of natural curiosities for settlers as well as the London based scientific community In *American Curiosity* Susan Scott Parrish examines how various peoples in the British colonies understood and represented the natural world around them from the late sixteenth century through the eighteenth Parrish shows how scientific knowledge about America rather than flowing strictly from metropole to colony emerged from a horizontal exchange of information across the Atlantic Delving into an understudied archive of letters Parrish uncovers early descriptions of American natural phenomena as well as clues to how people in the colonies construed their own identities through the natural world Although hierarchies of gender class institutional learning place of birth or residence and race persisted within the natural history community the contributions of any participant were considered valuable as long as they supplied novel data or specimens from the American side of the Atlantic Thus Anglo American nonelites women Indians and enslaved Africans all played crucial roles in gathering and relaying new information to Europe Recognizing a significant tradition of nature writing and representation in North America well before the Transcendentalists *American Curiosity* also enlarges our notions of the scientific Enlightenment by looking beyond European centers to find a socially inclusive American base to a true transatlantic expansion of knowledge
Imagined Destinies Russell McGregor, 2015-09-08 White Australians once confidently if regretfully believed that the Aboriginal people were doomed to extinction Even in the 1950s Australian children were still being taught that the Australian Aboriginals were a dying race who would eventually disappear from the face of the earth In *Imagined Destinies* Russell McGregor explores the origins and the gradual demise of the doomed race theory which was unquestioned in nineteenth

century European thinking and remained uncontested until the 1930s White perceptions of Australia's indigenous people and their future had been shaped by Enlightenment ideas about progress Darwin's new theories on the survival of the fittest and other European philosophical concepts *Imagined Destinies* provides a challenging analysis and history of an idea which has exerted a powerful influence over white Australian attitudes to and policies for Aboriginal people Indeed its long shadow may still be with us

South Africa's Dreams Robert J. Gordon, 2021-02-05 In the early sixties South Africa's colonial policies in Namibia served as a testing ground for many key features of its repressive Grand Apartheid infrastructure including strategies for countering anti apartheid resistance Exposing the role that anthropologists played this book analyses how the knowledge used to justify and implement apartheid was created Understanding these practices and the ways in which South Africa's experiences in Namibia influenced later policy at home is also critically evaluated as is the matter of adjudicating the many South African anthropologists who supported the regime

Science, Colonialism and Ireland Nicholas Whyte, 1999 This pioneering and accessible study employs a theoretical framework for an understanding of the role of science in Ireland refuting the assumption that science was an instrument of colonialism

Mapping an Empire Matthew H. Edney, 2024-05-31 In this fascinating history of the British surveys of India Matthew H Edney relates how imperial Britain used modern survey techniques to not only create and define the spatial image of its Empire but also to legitimate its colonialist activities There is much to be praised in this book It is an excellent history of how India came to be painted red in the nineteenth century But more importantly *Mapping an Empire* sets a new standard for books that examine a fundamental problem in the history of European imperialism D Graham Burnett *Times Literary Supplement* *Mapping an Empire* is undoubtedly a major contribution to the rapidly growing literature on science and empire and a work which deserves to stimulate a great deal of fresh thinking and informed research David Arnold *Journal of Imperial and Commonwealth History* This case study offers broadly applicable insights into the relationship between ideology technology and politics Carefully read this is a tale of irony about wishful thinking and the limits of knowledge *Publishers Weekly*

Paper Tiger Carol Freeman, 2010-08-23 Images of animals generate perceptions that have a profound effect on attitudes toward species Can representations contribute to their extinction *Paper Tiger* considers the role of illustrations in the demise of the thylacine or Tasmanian tiger It critiques 80 engravings lithographs drawings and photographs published between 1808 and 1936 paying attention to the messages they convey the politics of representation and the impact on the lives of animals This approach challenges conventional histories offers new understandings of human animal interactions and presents a chilling story of just how misleading and powerful visual representation can be It demonstrates how pictures together with words can have a vital influence on species survival this book is a remarkable achievement Freeman writes thoughtfully carefully and with force and the book is a very good read Nigel Rothfels *University of Wisconsin Milwaukee*
