Einstein in Love Dennis Overbye, 2001-10-01 In *Einstein in Love* Dennis Overbye has written the first profile of the great scientist to focus exclusively on his early adulthood when his major discoveries were made. It reveals Einstein to be very much a young man of his time: draft dodger, self-styled bohemian, poet, violinist, and cocky charismatic genius who left personal and professional chaos in his wake. Drawing upon hundreds of unpublished letters and a decade of research, *Einstein in Love* is a penetrating portrait of the modern era's most influential thinker. *Science-fiction, the Early Years* Everett Franklin Bleiler, 1990 In this volume the author describes more than 3000 short stories, novels, and plays with science fiction elements from earliest times to 1930. He includes imaginary voyages, utopias, Victorian boys' books, dime novels, pulp magazine stories, British scientific romances, and mainstream work with science fiction elements. Many of these publications are extremely rare, surviving in only a handful of copies, and most of them have never been described before. *Postmodern, Marxist, and Christian Historical Novels* Lynne W. Hinojosa, 2022-06-15 *Postmodern Marxist and Christian Historical Novels: Hope and the Burdens of History* argues historical novels can help readers receive the burdens of history, meaning both the burdens of the past, present, and future, and the burden of living in time, and develop a more robust conception of and concrete practice of hope. Since the 1960s historical novels have been a dominant literary genre, but they have been influenced primarily not by Christian but by postmodern and Marxist thinkers and writers. This book provides a theological and literary analysis of all three types of historical novels: postmodern, Marxist, and Christian, and outlines what each school of thought can learn from each other regarding historical understanding and hope. Using Jürgen Moltmann's theology of hope and Frank Kermode's literary criticism as a theoretical basis, the book offers readings of novels by Julian Barnes, A.S. Byatt, Kazuo Ishiguro, Margaret Atwood, Michael Ondaatje, Ian McEwan, and Ursula LeGuin, among others, and ends with an extended analysis of Marilynne Robinson's *Gilead* series. The Literature Book DK, 2016-05-26 Books let's face it: they are better than anything else. Nick Hornby turns the pages of *The Literature Book* to discover over 100 of the world's most enthralling reads and the literary geniuses behind them. Storytelling is as old as humanity itself. Part of the *Big Ideas Simply Explained* series, *The Literature Book* introduces you to ancient classics from the *Epic of Gilgamesh* written 4,000 years ago, as well as the works of Shakespeare, Voltaire, Tolstoy, and more, and 20th-century masterpieces including *Catch 22*, *Beloved*, and *On the Road*. The perfect reference for your bookshelf, it answers myriad questions such as: what is stream of consciousness? who wrote *To Kill a Mockingbird*? and what links the poetry of Wordsworth with that of T.S. Eliot? Losing yourself in a great book transports you to another time and place, and *The Literature Book* sets each title in its social and political context. It helps you appreciate, for example, how Dickens' *Bleak House* paints a picture of deprivation in 19th-century England, or how Stalin's climb to power was the backdrop for George Orwell's *1984*. With succinct plot summaries, graphics, and inspiring quotations, this is a must-have reference for literature students and the perfect gift for book lovers everywhere. *Series Overview: Big Ideas Simply Explained* series uses creative design and innovative graphics along with straightforward and engaging writing to make

complex subjects easier to understand With over 7 million copies worldwide sold to date these award winning books provide just the information needed for students families or anyone interested in concise thought provoking refreshers on a single subject
