### **Scientific Temperaments Three Lives In Contemporary Science:**

*Scientific Temperaments* Philip J. Hilts, 1984      *Beyond the Science Wars* Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives      The Baltimore Case Daniel J. Kevles, 2000 Kevles tells the complete story of David Baltimore winner of a Nobel Prize for medicine in 1975 in the field of immunology who got caught up in a legal battle over fraudulent scientific papers Photos line drawings      **Hackers** Steven Levy, 2010-05-19 This 25th anniversary edition of Steven Levy's classic book traces the exploits of the computer revolution's original hackers those brilliant and eccentric nerds from the late 1950s through the early 80s who took risks bent the rules and pushed the world in a radical new direction With updated material from noteworthy hackers such as Bill Gates Mark Zuckerberg Richard Stallman and Steve Wozniak Hackers is a fascinating story that begins in early computer research labs and leads to the first home computers Levy profiles the imaginative brainiacs who found clever and unorthodox solutions to computer engineering problems They had a shared sense of values known as the hacker ethic that still thrives today Hackers captures a seminal period in recent history when underground activities blazed a trail for today's digital world from MIT students finagling access to clunky computer card machines to the DIY culture that spawned the Altair and the Apple II      *Language Beyond Postmodernism* Eugene Gendlin, 1997-08-20 Eugene Gendlin's contribution to the theory of language is the focus of this collection of essays edited by David Michael Levin This compilation of critical studies each followed by a comment from Gendlin himself investigates how concepts grow out of experience and explores relations between Gendlin's philosophy of language and experience and the philosophies of Wittgenstein Dilthey and Heidegger      **The Scientific Life** Steven Shapin, 2009-08-01 Who are scientists What kind of people are they What capacities and virtues are thought to stand behind their considerable authority They are experts indeed highly respected experts authorized to describe and interpret the natural world and widely trusted to help transform knowledge into power and profit But are they morally different from other people The Scientific Life is historian Steven Shapin's story about who scientists are who we think they are and why our sensibilities about such things matter Conventional wisdom has long held that scientists are neither better nor worse than anyone else that personal virtue does not necessarily accompany technical expertise and that scientific practice is profoundly impersonal Shapin however here shows how the uncertainties attending scientific research make the virtues of individual researchers intrinsic to scientific work From the early twentieth century origins of corporate research laboratories to the high flying scientific entrepreneurship of the present Shapin argues that the radical uncertainties of much contemporary science have made personal virtues more central to its practice than ever before and he also reveals how radically novel aspects of late modern science have unexpectedly deep historical roots His elegantly conceived history of the scientific career and character ultimately encourages us to reconsider the very nature of the technical and moral worlds in which we now live Building on

the insights of Shapin's last three influential books featuring an utterly fascinating cast of characters and brimming with bold and original claims *The Scientific Life* is essential reading for anyone wanting to reflect on late modern American culture and how it has been shaped *Gaither's Dictionary of Scientific Quotations* Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

Epistemic Virtues in the Sciences and the Humanities Jeroen van Dongen, Herman Paul, 2017-12-07 This book explores how physicists astronomers chemists and historians in the late nineteenth and early twentieth centuries employed epistemic virtues such as accuracy objectivity and intellectual courage In doing so it takes the first step in providing an integrated history of the sciences and humanities It assists in addressing such questions as What kind of perspective would enable us to compare organic chemists in their labs with paleographers in the Vatican Archives or anthropologists on a field trip with mathematicians poring over their formulas While the concept of epistemic virtues has previously been discussed primarily in the contexts of the history and philosophy of science this volume is the first to enlist the concept in bridging the gap between the histories of the sciences and the humanities Chapters research whether epistemic virtues can serve as a tool to transcend the institutional disciplinary boundaries and thus help to attain a post disciplinary historiography of modern knowledge Readers will gain a contextualization of epistemic virtues in time and space as the book shows that scholars themselves often spoke in terms of virtue and vice about their tasks and accomplishments This collection of essays opens up new perspectives on questions discourses and practices shared across the disciplines even at a time when the neo Kantian distinction between sciences and humanities enjoyed its greatest authority Scholars including historians of science and of the humanities intellectual historians virtue epistemologists and philosophers of science will all find this book of particular interest and value

Biographies of Scientists Roger Smith, 1998 Identifies over 500 sources of information about the lives of scientists for young and adult general readers and for scholars Entries ranging from a quarter to a half page in length explain briefly what the subjects achieved worthy of biography as well as describing the work in some detail The works cited include books encyclopedias and periodicals and both biography and autobiography The arrangement is by discipline the social sciences are not included with indexes by author and subject scientist Annotation copyrighted by Book News Inc Portland OR

**Fermilab** Lillian Hoddeson, Adrienne W. Kolb, Catherine Westfall, 2009-08-01 Fermi National Accelerator Laboratory located in the western suburbs of Chicago has stood at the frontier of high energy physics for forty years Fermilab is the first history of this laboratory and of its powerful accelerators told from the point of view of the people who built and used them

for scientific discovery Focusing on the first two decades of research at Fermilab during the tenure of the laboratory's charismatic first two directors Robert R Wilson and Leon M Lederman the book traces the rise of what they call megascience the collaborative struggle to conduct large scale international experiments in a climate of limited federal funding In the midst of this new climate Fermilab illuminates the growth of the modern research laboratory during the Cold War and captures the drama of human exploration at the cutting edge of science

**Role of Maps in Sci-Tech Libraries** Ellis Mount,2020-06-04 Maps charts and related items present special problems to libraries for example a less organised bibliographic control mechanism more difficult means of acquisitions and problems of storage and preservation This book first published in 1985 deals with these problems and presents practical solutions for maps in library collections

The Billion-Dollar Molecule Barry Werth,2013-08-20 Join journalist Barry Werth as he pulls back the curtain on Vertex a start up pharmaceutical company and witness firsthand the intense drama being played out in the pioneering and hugely profitable field of drug research Founded by Joshua Boger a dynamic Harvard and Merck trained scientific whiz kid Vertex is dedicated to designing atom by atom both a new life saving immunosuppressant drug and a drug to combat the virus that causes AIDS You will be hooked from start to finish as you go from the labs where obsessive fiercely competitive scientists struggle for a breakthrough to Wall Street where the wheeling and dealing takes on a life of its own as Boger courts investors and finally decides to take Vertex public Here is a fascinating no holds barred account of the business of science which includes an updated epilogue about the most recent developments in the quest for a drug to cure AIDS

**Cavendish** Christa Jungnickel,Russell McCormack,1996 The Cavendishes flourished during the high tide of British aristocracy following the revolution of 1688 89 and the case can be made that this aristocracy knew its finest hour when Henry Cavendish gently laid his delicate weights in the pan of his incomparable precision balance For this it took two generations and two kinds of invention one in social forms and the other in scientific technique This biography tells how it came to pass Book jacket

**Conflicts of Interest in Science** Sheldon Krinsky,2019-01-29 30 Years of Peer Reviewed Studies on the Corporate Ties and Vested Interests that Influence Scientific Research For over 500 years groups and organizations with political economic and personal interests have successfully exercised influence on the pursuit of scientific inquiry and knowledge History is replete with examples like the Papal authority muddying research into studies of the cosmos but far less attention is paid today to the various corporate and special interest groups who through funding and lobbying efforts have been able to shape the modern academic and scientific landscape to fit their agenda In Conflicts of Interest Within Science author Sheldon Krinsky compiles 21 peer reviewed academic articles that examine the complex relationship between the individual scientists conducting research and the groups who fund them Ultimately Krinsky's call to action concerns a collective movement among authors peer reviewers corporations and journal editors to disclose the sources of their funding By holding scientists and the groups that fund them more accountable through increased transparency we as a society can begin to

rebuild trust in the integrity of knowledge      The Leader's Edge Charles J. Palus, David M. Horth, 2002-10-01 Der ultimative Schritt für Schritt Leitfaden für Manager die ihren Führungsqualitäten mehr Kreativität verleihen wollen Er basiert auf jahrelanger Forschungsarbeit Die Autoren stellen hier eine bewährte Methode für sicheren Führungserfolg vor Sie beschreiben sechs unterschiedliche aber miteinander verflochtene Kompetenzen für kreative Führung die wichtige Aspekte menschlichen Verhaltens widerspiegeln aber bislang nur unzureichend für eine funktionierende Unternehmensführung in Betracht gezogen wurden Mit genauer Anleitung welche Maßnahmen notwendig sind um die jeweilige Kompetenz zu erwerben Bietet eine Fülle von Hilfsmitteln und Beurteilungstests mit deren Hilfe man die sechs Kompetenzen entwickeln kann Enthält eine Fülle von Beispielen und Fallstudien sowie Tipps und Hinweise wie man Missbrauch vermeidet Ein neuer Band zum Thema Leadership vom renommierten Center for Creative Leadership      Scientific Temperaments Philip J. Hilts, 1982 Robert Wilson the particle physicist who designed and built some of the great machines of physics including one of the largest and most elegant ever constructed the Fermilab Accelerator Mark Ptashne the brilliant Harvard geneticist who turned his sixteen year obsession with the macabre habits of a single microorganism into one of the most important works in contemporary biology John McCarthy one of the founding fathers of artificial intelligence As the inventor of time sharing computer languages and other computer esoterica McCarthy more than any other person created the systems and ideas that made the home computer possible      Scientifically Speaking C.C. Gaither, Alma E Cavazos-Gaither, 2000-11-21 In these days of ever increasing specialization it is important to gain a broad appreciation of science Entertaining and informative Scientifically Speaking A Dictionary of Quotations Second Edition contains the words and wisdom of several hundred scientists writers philosophers poets and academics The largest compilation of published sci      *Against Essentialism* Stephan Fuchs, 2009-07 Against Essentialism presents a sociological theory of culture This interdisciplinary and foundational work deals with basic issues common to current debates in social theory including society culture meaning truth and communication Stephan Fuchs argues that many mysteries about these concepts lose their mysteriousness when dynamic variations are introduced Fuchs proposes a theory of culture and society that merges two core traditions American network theory and European Luhmannian systems theory His book distinguishes four major types of social observers encounters groups organizations and networks Society takes place in these four modes of association Each generates levels of observation linked with each other into a culture the unity of these observations Against Essentialism presents a groundbreaking new approach to the construction of society culture and personhood The book invites both social scientists and philosophers to see what happens when essentialism is abandoned      **The Body in Pain: The Making and Unmaking of the World** Elaine Scarry, 1985-09-26 Part philosophical meditation part cultural critique The Body in Pain is a profoundly original study that has already stirred excitement in a wide range of intellectual circles The book is an analysis of physical suffering and its relation to the numerous vocabularies and cultural forces literary political philosophical medical religious

that confront it Elaine Scarry bases her study on a wide range of sources literature and art medical case histories documents on torture compiled by Amnesty International legal transcripts of personal injury trials and military and strategic writings by such figures as Clausewitz Churchill Liddell Hart and Kissinger She weaves these into her discussion with an eloquence humanity and insight that recall the writings of Hannah Arendt and Jean Paul Sartre Scarry begins with the fact of pain s inexpressibility Not only is physical pain enormously difficult to describe in words confronted with it Virginia Woolf once noted language runs dry it also actively destroys language reducing sufferers in the most extreme instances to an inarticulate state of cries and moans Scarry analyzes the political ramifications of deliberately inflicted pain specifically in the cases of torture and warfare and shows how to be fictive From these actions of unmaking Scarry turns finally to the actions of making the examples of artistic and cultural creation that work against pain and the debased uses that are made of it Challenging and inventive The Body in Pain is landmark work that promises to spark widespread debate **No Truth Except in the**

**Details** A.J. Kox,D.M. Siegel,2012-12-06 Beginning with a couple of essays dealing with the experimental and mathematical foundations of physics in the work of Henry Cavendish and Joseph Fourier the volume goes on to consider the broad areas of investigation that constituted the central foci of the development of the physics discipline in the nineteenth century electricity and magnetism including especially the work of Michael Faraday William Thomson and James Clerk Maxwell and thermodynamics and matter theory including the theoretical work and legacy of Josiah Willard Gibbs some experimental work relating to thermodynamics and kinetic theory of Heinrich Hertz and the work of Felix Seyler Hoppe on hemoglobin in the neighboring field of biophysics biochemistry Moving on to the beginning of the twentieth century a set of three articles on Albert Einstein deal with his early career and various influences on his work Finally a set of historiographical issues important for the history of physics are discussed and the chronological conclusion of the volume is an article on the Solvay Conference of 1933 For physicists interested in the history of their discipline historians and philosophers of science and graduate students in these and related disciplines

## Reviewing **Scientific Temperaments Three Lives In Contemporary Science**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is truly astonishing. Within the pages of "**Scientific Temperaments Three Lives In Contemporary Science**," an enthralling opus penned by a highly acclaimed wordsmith, readers embark on an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve to the book's central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.
