Scientific Basis for Nuclear Waste Management XVIII Takashi Murakami, Rodney C. Ewing, 1995 **Symposium** Ian G. MacKinley, 1998 *Radioactive Waste Management*, 1981 **The Chemistry of the Actinide and Transactinide Elements (Set Vol.1-6)** L.R. Morss, Norman M. Edelstein, Jean Fuger, 2010-10-21 The fourth edition of The Chemistry of the Actinide and Transactinide Elements comprises all chapters in volumes 1 through 5 of the third edition published in 2006 plus a new volume 6 To remain consistent with the plan of the first edition to provide a comprehensive and uniform treatment of the chemistry of the actinide and transactinide elements for both the nuclear technologist and the inorganic and physical chemist and to be consistent with the maturity of the field the fourth edition is organized in three parts The first group of chapters follows the format of the first and second editions with chapters on individual elements or groups of elements that describe and interpret their chemical properties A chapter on the chemical properties of the transactinide elements follows The second group chapters 15 26 summarizes and correlates physical and chemical properties that are in general unique to the actinide elements because most of these elements contain partially filled shells of 5f electrons whether present as isolated atoms or ions as metals as compounds or as ions in solution The third group chapters 27 39 focuses on specialized topics that encompass contemporary fields related to actinides in the environment in the human body and in storage or wastes Two appendices at the end of volume 5 tabulate important nuclear properties of all actinide and transactinide isotopes Volume 6 Chapters 32 through 39 consists of new chapters that focus on actinide species in the environment actinide waste forms nuclear fuels analytical chemistry of plutonium actinide chalcogenide and hydrothermal synthesis of actinide compounds The subject and author indices and list of contributors encompass all six volumes *Yucca Mountain Site Characterization Project Bibliography, 1994-1995*, 1996 **Environmentally Assisted Cracking** R. Burns, Robert J. Finch, 2018-12-17 Volume 38 of Reviews in Mineralogy provides detailed reviews of various aspects of the mineralogy and geochemistry of uranium We have attempted to produce a volume that incorporates most important aspects of uranium in natural systems while providing some insight into important applications of uranium mineralogy and geochemistry to environmental problems The result is a blend of perspectives and themes historical Chapter 1 crystal structures Chapter 2 systematic mineralogy and paragenesis Chapters 3 and 7 the genesis of uranium ore deposits Chapters 4 and 6 the

geochemical behavior of uranium and other actinides in natural fluids Chapter 5 environmental aspects of uranium such as microbial effects groundwater contamination and disposal of nuclear waste Chapters 8 9 and 10 and various analytical techniques applied to uranium bearing phases Chapters 11 14 This volume was written in preparation for a short course by the same title sponsored by the Mineralogical Society of America October 22 and 23 1999 in Golden Colorado prior to MSA's joint annual meeting with the Geological Society of America Stabilization and solidification of hazardous, radioactive, and mixed wastes T. Michael Gilliam, 1996 Energy, Waste and the Environment R. Gieré, Peter Stille, 2004 This book provides incentives for further development of sustainable fuel cycles through a novel and interdisciplinary approach to an Earth science related topic The main focus is on geochemical concepts in immobilizing isolating or neutralizing waste derived from energy production and consumption The book also addresses the issue of using some types of energy derived waste as alternative raw materials Moreover it highlights research on how certain wastes can be used for energy production an increasingly important aspect of modern integrated waste management strategies The main objectives are to a identify the most serious environmental problems related to various types of power generation and associated waste accumulation b present strategies based on natural analogue materials for the immobilization of toxic and radioactive waste components through mineralogical barriers c discuss modern procedures for reuse of waste or certain waste components and d review the importance of geochemical modelling in describing and predicting the interaction between waste and the environment

Scientific Basis for Nuclear Waste Management XXVIII, 2004 Adsorption of Metals by Geomedia Everett Jenne, 1998-03-30 Virtually all factors affecting the extent of metal adsorption on geomedia ranging from single minerals to sediments and soils are examined including the effects of selected anions competition among metals pH metal concentration loading variable metal adsorption capacity ionic strength hydrogen exchange and stoichiometry solids concentration and artifact effects of precipitation **Microbiology of the Terrestrial Deep Subsurface** Penny S. Amy, 2018-01-10 Obtaining and analyzing samples is challenging in subsurface science This first of its kind reference book addresses accomplishments in this field from drilling to sample work up A collaborative approach is taken involving the efforts of microbiologists geochemists hydrologists and drilling and mining experts to present a comprehensive view of subsurface research The text provides practical information about obtaining analyzing and evaluating subsurface materials the current status of subsurface microbial ecology and describes several applications that will interest a variety of readers including engineers physical and life scientists *Clays: Controlling the Environment* GJ Churchman, RW Fitzpatrick, RA Eggleton, 1995-01-01 Proceedings of the 10th International Clays Conference Adelaide Australia July 18 to 23 1993 Clays have provided us with the most active ingredients in soils with building materials with pottery and ceramics for both utility and decoration and with coatings and fillers for paper among other uses The unique properties of these apparently everyday materials are being studied and used in an increasing range of industrial and environmental applications *Clays Controlling the Environment*

provides a valuable compendium of the latest results from the complete range of clay related scientific research. All papers in these proceedings were subject to peer review. The topics discussed are Clays in industry and the environment, Surface and interlayer reactions, Clay mineral structures and chemistry, Methods of investigation, Clays in geology, Soil mineralogy. The emphasis of this book reflects the vital role that clays play in controlling natural polluted and technological environments.

Mechanisms of Chemical Degradation of Cement-based Systems

K.L. Scrivener, J.F. Young, 1997-04-17. Deterioration of cement based materials is a continuing problem as it results in the substantial shortening of the lives of conventional concrete structures. The main costs result from poor performance and the need for early repair. With more advanced applications where very long service lives are essential such as the storage of nuclear waste, an understanding of the degradation processes in order to predict long term performance is very important. This book forms the proceedings of the latest Symposia at the Materials Research Society Autumn meeting in Boston.

Ageing Studies and

Lifetime Extension of Materials Les Mallinson, 2012-12-06. The first International Conference on Ageing Studies and Lifetime Extension of Materials was held on the July 12-14, 1999 at St Catherine's College, Oxford, United Kingdom. Over 230 delegates attended during the three days and heard nearly ninety papers together with over thirty poster presentations. Sixteen of these papers were keynotes from invited speakers eminent in their field of research. The proceedings were organised into six separate sessions: observation and understanding of real time and accelerated ageing; experimental techniques; modelling and theoretical studies; lifetime prediction and validation; lifetime extension and material design for ageing. In doing this it was hoped to cover most issues of scientific concern in the field of materials ageing. One important aspect was that the conference did not concentrate on any particular group or type of material; rather the aim was to attract contributions from workers engaged in ageing studies with as wide a range of materials as possible. In this way it was hoped that delegates could interact with and learn from those whom they perhaps would not normally come across and that metallurgists could learn from polymer scientists, ceramicists could talk to modellers and so on in this important field. A read through the diverse papers contained within these proceedings will confirm that this aim was happily satisfied. Why hold such a meeting? In the modern world engineered systems are expected to last longer.

Archaeological Obsidian Studies

M. Steven Shackley, 2013-06-29. This volume is the third in the Advances in Archaeological and Museum Science series sponsored by the Society for Archaeological Sciences (SAS). The purpose of this series is to provide summaries of advances in various topics in archaeometry, archaeological science, environmental archaeology, preservation technology and museum conservation. The SAS exists to encourage interdisciplinary collaboration between archaeologists and colleagues in the natural and physical sciences. SAS members are drawn from many disciplinary fields. However, they all share a common belief

that physical science techniques and methods constitute an essential component of contemporary archaeological field and laboratory studies The series editors wish to thank the reviewers of each of the chapters in this volume for their excellent comments and suggestions We also wish to thank Chriss Jones for her invaluable assistance in the preparation of the texts for submission to the publisher xi Preface As noted in the introductory chapter this volume is the second major review of research progress in the study of archaeological obsidian An earlier book *Advances in Obsidian Glass Studies Archaeological and Geochemical Perspectives* appeared in 1976 A comparison of the treatment of topics reflected in this earlier work and that contained in this volume not only highlights important advances in the quality and depth of research on archaeological obsidian over more than a quarter of a century but also illustrates more generally some characteristics of developments in the archaeological science field in general
