Scientific Man Enrico Cantore,1977 **Pursuing Scientific Humanism** Claudio Tagliapietra,2025-04-25 In 1967 Werner Heisenberg Nobel Prize winning physicist and pioneer of quantum mechanics received an unexpected letter from a young Italian Jesuit named Enrico Cantore The letter beginning simply with Dear Professor Heisenberg marked the start of a decade long exchange focused on bringing to life a shared vision scientific humanism Drawing on newly uncovered materials from the Max Planck Institute Archives in Berlin this book reveals a rarely seen side of Heisenberg his role as a mentor and advocate in the creation of an interdisciplinary research institute even as institutional politics threatened to stifle Cantore s efforts Readers will follow Cantore s struggle to bridge philosophy and science within traditional academic boundaries and see how Heisenberg s unwavering support helped bring this ambitious project to life Whether you re interested in the academic and publishing world of Heisenberg s time or curious about the human dimensions of intellectual pursuit this collection reveals a powerful story of mentorship courage and the enduring belief that science can and should serve the greater good Deep Homology? Rational Landscapes and Humanistic Geography Edward Relph,2015-07-30 This book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment The source of this paradox where material benefits appear to have been gained only at the expense of intangible values and qualities is found in humanism the persistent and powerful belief that all problems can be solved through the use of human reason But humanism has become increasingly confused rationalistic callously devoted to efficiency and authoritarian These confusions and contradictions together with the anti nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected Such rejection does not advocate the inhuman and anti human but requires instead a return to the humility that lies at the origin of humanism a respect for objects creatures environments and people This environmental humility is explored in the context of individuality of settings ways of seeing landscapes appropriation and ways of building places This title will be of interest to students of human geography
