Scientific Weather Forecasting In The Middle Ages Gerrit Bos, Charles Burnett, 2018-10-24 First Published in 1999
Man has always tried to find effective ways to predict the weather Simple predictions from meteorological phenomena or from the constellations rising in the sky can be found attributed to Aristotle and in Varro Pliny Ptolemy and the paragmata of Classical times However the particular cultural situation of Baghdad in the mid ninth century encouraged the production of what can be regarded as the first scientific treatises on weather forecasting These are two letters of the Philosopher of the Arabs Ya q b ibn Ish q al Kindi ca 800 ca 870 who combines at least three traditions of weather forecasting the native Arabic agricultural tradition Greek Aristotelian meteorology and scientific astrology This volume sketches the history of weather forecasting from ancient times through to the Early Modern period and places the two letters of al Kindi in their historical and intellectual context The original Arabic text of al Kindi's letters has not been discovered but the work is known through two Hebrew translations and an independent Latin version made directly from the Arabic in which the two letters have been combined into one treatise All these texts are edited here together with an annotated English translation of the principal Hebrew version and a detailed commentary This book not only adds to our knowledge concerning al Kindi but is also the first study devoted exclusively to medieval weather forecasting a topic which from the evidence of the number of texts and manuscripts had a significant place in medieval scientific and social culture *Weather Forecasting, Past, Present, and Future* United States. Congress. House. Committee on Science and Technology. Subcommittee on Space Science and Applications, 1978 Minding the Weather Robert R. Hoffman, Daphne S. Ladue, H. Michael Mogil, Paul J. Roebber, J. Gregory Trafton, 2023-08-15 A detailed study of research on the psychology of expertise in weather forecasting drawing on findings in cognitive science meteorology and computer science This book argues that the human cognition system is the least understood yet probably most important component of forecasting accuracy Minding the Weather investigates how people acquire massive and highly organized knowledge and develop the reasoning skills and strategies that enable them to achieve the highest levels of performance The authors consider such topics as the forecasting workplace atmospheric scientists descriptions of their reasoning strategies the nature of expertise forecaster knowledge perceptual skills and reasoning and expert systems designed to imitate forecaster reasoning Drawing on research in cognitive science meteorology and computer science the authors argue that forecasting involves an interdependence of humans and technologies Human expertise will always be necessary **Doppler Radar, Satellites, and Computer Models** Paul Fleisher, 2010-08-01 How do scientists predict the weather What tools and instruments help them make forecasts How far in advance can they make good predictions Weather forecasting is a tricky science Forecasters gather current weather data and study trends and historical patterns They use their expertise to predict what kind of weather is likely coming next with help from computers satellites and other machines In this fact packed book discover what it really takes to forecast Earth's weather *Restoring U.S.*
