Interplay of Creativity and Giftedness in Science Melissa K. Demetrikopoulos, John L. Pecore, 2015-12-17 This book explores education for juvenile offenders in relation to Passages Academy which is both similar to and representative of many school programs in juvenile correctional facilities Examining the mission and population of this school contributes to an understanding of the ways in which the teachers think about and ultimately act with respect to their detained juveniles students and particularly illustrates how the tension between punishment and rehabilitation is played out in school policies and design By calling attention to the decisions that surround juvenile detention education the extant research concentrates on three main areas first the social political and pedagogical forces that determine who enters the juvenile justice systems second how these court involved youths are educated while they are in the system and third the practical problems and the social justice issues youths encountered when transitioning back to their community schools

I Hope I Don t See You Tomorrow is both heartwarming and heartbreaking its vast empathy for the students that L A Gabay teaches is edifying while its unsparing examination of the forces that push youth into detention is soul shearing Gabay is at once Tocqueville and Kozol he brilliantly guides us through the educational territory that is foreign to most of us even as he paints a searing portrait of teachers who shape lesson plans for students who must learn under impossible conditions Gabay s haunting and eloquent missive from the front lines of pain and possibility couldn t be more timely as the nation s first black president seeks to lessen the stigma of nonviolent ex offenders in our society Gabay s book confronts the criminal justice system at its institutional roots in the economic misery and racial strife of schooling that compounds the suffering of poor youth as they are contained by a state that often only pays

attention to them when they are in trouble Gabay opens eyes and vexes minds with this stirring and sober account of what it means to teach those whom society has deemed utterly expendable Michael Eric Dyson author of *The Black Presidency* Barack Obama and the Politics of Race in America As a beneficiary of Lee Gabay and his colleague s patience discipline and compassionate teaching at the school this timely book beautifully decrypts the pedagogical framework within the juvenile justice system As America comes to term with its zeal for incarceration policymakers educators government officials parents and advocates should take advantage of this carefully written book and use it as reflection and pause as we prepare our young court involved students towards adulthood Jim St Germain Advisory counsel on President Obama s Taskforce on Police Community Relations and Mayor Bloomberg s Close to Home initiative

Thomas Edison: Success and Innovation through Failure Ian Wills,2020-01-01 This book develops a systematic approach to the role of failure in innovation using the laboratory notebooks of America s most successful inventor Thomas Edison It argues that Edison s active pursuit of failure and innovative uses of failure as a tool were crucial to his success From this the author argues that not only should we expect innovations to fail but that there are good reasons to want them to fail Using Edison s laboratory notebooks written as he worked and before he knew the outcome we see the many false starts wrong directions and failures that he worked through on his way to producing revolutionary inventions While Edison s strengths in exploiting failure made him the icon of American inventors they could also be liabilities when he moved from one field to another Not only is this book of value to readers with an interest in the history of technology and American invention its insights are important to those who seek to innovate and to those who employ and finance them *Scientists, Mathematicians and Inventors* Doris Simonis,2019-11-04

Pedagogy of Humanization Chelda Smith Kondo,2024-03-30 The purpose of Pedagogy of Humanization Preparing Teachers for Culturally Sustaining Classrooms is to build a critical mass of educators who know how

to employ the principles of critical pedagogy in elementary classrooms This includes attention to the various knowledge skills and dispositions required of critical pedagogues in their curricula instruction assessment classroom environment and relationships From Critical Race Theory CRT to restorative justice oriented classroom management the theoretical is made practical Moreover the structure of the book follows the curriculum of a traditional teacher education program making it complementary to any teacher education course The Pedagogy of Humanization is the first book to bring together the practice how and theory what and why of inclusive and asset based teaching In this book a group of teacher educators across disciplines explore their personal and professional identities to reveal the potential for applying each tenet of culturally relevant pedagogy in their respective fields Filled with anecdotes exercises user friendly theories and examples readers will learn how teachers can humanize themselves to have the capacity to be effective teachers of children who have been dehumanized and underserved by traditional teaching and schooling Pre service teachers will read this book so that they can connect the material they study in teacher education courses to the daily work of being an educator who aims to be justice oriented However this is not a foolproof guide or how to manual that could be completed without direct support from mentors and colleagues Instead readers will practice the sort of engagement in individual and community growth that ignites the possibility of teaching as a force for social change In many ways chapters of the text could be used through a flipped classroom approach whereby faculty invert the typical cycle of content acquisition and application The book will prove to be a valuable resource as a teaching text in classrooms devoted to critical pedagogy Critical Race Theory social justice and other topics necessary to produce teachers who are prepared to maximize their effectiveness in educating today s students
