Geison, 2014-07-14 In *The Private Science of Louis Pasteur* Gerald Geison has written a controversial biography that finally penetrates the secrecy that has surrounded much of this legendary scientist's laboratory work Geison uses Pasteur's laboratory notebooks made available only recently and his published papers to present a rich and full account of some of the most famous episodes in the history of science and their darker sides for example Pasteur's rush to develop the rabies vaccine and the human risks his haste entailed The discrepancies between the public record and the private science of Louis Pasteur tell us as much about the man as they do about the highly competitive and political world he learned

to master Although experimental ingenuity served Pasteur well he also owed much of his success to the polemical virtuosity and political savvy that won him unprecedented financial support from the French state during the late nineteenth century But a close look at his greatest achievements raises ethical issues In the case of Pasteur s widely publicized anthrax vaccine Geison reveals its initial defects and how Pasteur in order to avoid embarrassment secretly incorporated a rival colleague s findings to make his version of the vaccine work Pasteur s premature decision to apply his rabies treatment to his first animal bite victims raises even deeper questions and must be understood not only in terms of the ethics of human experimentation and scientific method but also in light of Pasteur s shift from a biological theory of immunity to a chemical theory similar to ones he had often disparaged when advanced by his competitors Through his vivid reconstruction of the professional rivalries as well as the national adulation that surrounded Pasteur Geison places him in his wider cultural context In giving Pasteur the close scrutiny his fame and achievements deserve Geison s book offers compelling reading for anyone interested in the social and ethical dimensions of science Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Bengert, Vittoria Borsò, Davide Caliaro, Jörg Dünne, Jean-Pierre Dupuy, Jörn Etzold, Gesine Hindemith, Marie-Hélène Huët, Walburga Hülk-Althoff, Judith Kasper, Françoise Lavocat, Bettine Menke, Markus Ophälders, Giulia Palladini, Kati Röttger, Gianluca Solla, Johannes Ungelenk, 2018-02-14 From epidemics in the 17th century and the Lisbon earthquake in 1755 to Guernica in World War II the essays in this volume trace the development of the catastrophic imagination relying heavily on pictorial media and different forms of staging Catastrophe in its modern sense seems to be inextricably linked to its spectacular representation be it on the stage on screen or in popular amusement parks But the modern relationship between catastrophe and spectacle is also increasingly confronting us with the unimaginable side of catastrophe particularly with regard to the Holocaust and in more recent times to the daily experience of refugees The essays in this volume elucidate images of the catastrophes that have inspired them by providing a textual commentary that makes it possible to reconsider how the spectacular and the catastrophic are interrelated Thus the essays not only deal with the emergence of the modern spectacular imagination of catastrophe in terms of the history of both discourse and media they also present themselves as a critique of catastrophe one based on close readings of the scenes and images in question **Science Through the Ages: Unveiling the Discoveries of History's Scientific Pioneers**

Pasquale De Marco, 2025-05-13 Science has been a driving force behind human progress for centuries shaping our understanding of the world around us and leading to countless innovations that have improved our lives From the ancient Greeks who first sought to explain the natural world through rational inquiry to the modern scientists who are pushing the boundaries of our knowledge science has played a vital role in our development as a species This book takes you on a journey through the history of science from its humble beginnings in ancient Greece to the cutting edge research being conducted today You will meet the brilliant minds who have made groundbreaking discoveries and learn about the ideas that have shaped our scientific understanding of the world Along the way you will explore the Golden Age of Greece the Alexandrian era the Roman Empire the Renaissance the Scientific Revolution and the 19th and 20th centuries You will learn about the astronomers who first charted the stars the physicists who unlocked the secrets of the universe the chemists who discovered the elements and the biologists who unraveled the mysteries of life You will also learn about the challenges that scientists have faced throughout history from persecution and censorship to funding cuts and political interference But through it all science has continued to advance driven by the human desire to understand the world around us This book is a celebration of science and the scientists who have dedicated their lives to pursuing knowledge It is a reminder of the power of human curiosity and the importance of scientific research We hope that it will inspire you to learn more about this fascinating subject and to appreciate the role that science has played in shaping our world If you like this book write a review on google books [The Black Death](#) Therese Harasymiw, 2021-07-15 As the COVID 19 pandemic has swept around the globe people have looked to the past for other examples of deadly disease outbreaks In the mid 14th century an outbreak of bubonic plague or the Black Death killed more than 25 million Europeans
