Scientists As Theologians Paperback:

Faith, Science and Understanding John Polkinghorne, 2008-10-01
In this captivating book one of the most highly regarded scientist theologians of our time explores aspects of the interaction of science and theology. John Polkinghorne defends the place of theology in the university; it is part of the human search for truth and discusses the role of revelation in religion. It is a record of experience and not the communication of unchallengeable propositions. Throughout his thought provoking conversation Polkinghorne speaks with an honesty and openness that derives from his many years of experience in scientific research. A central concern of Polkinghorne's collection of writings is to reconcile what science can say about the processes of the universe with theology's belief in a God active within creation. The author examines two related concepts in depth. The first is the divine self limitation involved in creation that leads to an important reappraisal of the traditional claim that God does not act as a cause among causes. The other is the nature of time and God's involvement with it, an issue that Polkinghorne shows can link metascience and theological understandings. In the final section of the book the author reviews three centuries of the science and theology debate and assesses the work of major contemporary contributors to the discussion: Wolfhart Pannenberg, Thomas Torrance and Paul Davies. He also considers why the science theology discussion has for several centuries been a particular preoccupation of the English DIV DIV.

Enriching Our Vision of Reality Alister McGrath, 2017-08-10
Enriching our Vision of Reality is elegant, erudite and animated by a constant enthusiasm for its subject. There is everything here: science, theology, philosophy, biography, even some poetry, all enlisted to help us to see the world as it is, both more clearly and with greater delight. Reverend Doctor Andrew Davison, Starbridge Lecturer in theology and natural sciences, University of Cambridge and fellow in theology at Corpus Christi College, writes: 'It is a pleasure to read an introduction to science and Christian belief that is both erudite and accessible.' McGrath's new book is rich with personal examples, biographies of famous scientists and theologians and effective refutations of their detractors. This invitation to move forward from a bifurcated to an expansive view of reality is recommended for all who seek an integrated understanding of science and Christian faith. Philip Clayton, editor of The Oxford Handbook of Religion and Science, writes: 'In this exceptional volume leading theologian Alister McGrath writes for scientists with an interest in theology and Christians and theologians who are aware of the importance of the natural sciences. A scene setting chapter explores the importance of the human quest for intelligibility. The focus then moves to three leading figures who have stimulated discussion about the relationship between science and theology in recent years: Charles Coulson, an Oxford professor of theoretical chemistry who was also a prominent Methodist lay preacher; Thomas F. Torrance, perhaps the finest British theologian of the twentieth century; and John Polkinghorne, a theoretical physicist and theologian. The final section of the book features six parallel conversations between science and theology which lay the groundwork for the kind of enriched vision of reality the author hopes to encourage. Here we are inspired to enjoy individual aspects of nature while seeking to interpret them in the light of deeper revelations about

our gloriously strange universe **The Way the World is** J. C. Polkinghorne,2007-01-01 In this brief and highly accessible book for general readers distinguished physicist turned theologian John Polkinghorne presents a reasoned account of the Christian view of the world as seen by the one of the world's leading interpreters of the interface between science and religion Drawing from his experiences as a scientist and a theologian Polkinghorne argues that Christianity presents a credible and compelling worldview that can be taken seriously even while fully understanding the importance of science

Astrobiology and Humanism Julian Chela-Flores,2019-06-13 This book reviews the horizons and frontiers of humanism as they interact with the science of life in the universe now generally known as astrobiology As one of the most important conversations of our time the existence of life itself raises deep questions that are meaningful to both astrobiology and humanism The text discusses current disagreements in this intercultural dialogue which are shown to be solely due to the widespread delusion that the horizons and frontiers of science can be ignored **The Remarkable Wisdom of Solomon**

Henry Madison Morris,2001 Verse by verse commentary of Proverbs Ecclesiastes and Song of Solomon Much research and detail on the life of Solomon is presented An in depth study for the serious student of the Bible Isn't it amazing that a man who had 700 wives and 300 concubines and ruled a country for 40 years still had time to write three of the most profound books of the Bible Proverbs Ecclesiastes and Song of Solomon all show marks of divine inspiration and each can be a blessing to the reader but why would God choose a man who turned to idolatry to write these books Dr Henry Morris author of the commentaries Treasures in the Psalms and The Remarkable Record of Job addresses the enigma of Solomon and presents a verse by verse commentary on his writings Having studied the Bible for 60 years Dr Morris' wisdom is also quite remarkable as you will quickly learn as you read The Remarkable Wisdom of Solomon *The Scientist and the Theologian* James Patrick Mackey,2007 A study of dialogue between modern science and religion with regards to creation in the face of 21st century knowledge from both sides

Jesus Christ Is Lord Peter Toon,2020-07-20 Is Jesus Christ really Lord of the twentieth century world where scientific achievement is worshiped economic pressures control daily life and permissive attitudes set low moral standards In answer to this vital question Peter Toon challenges today's narrow and shallow view of Christ as Lord Exploring the meaning of Lordship as written in the New Testament and the implications of Christ's ascension as proclaimed in creeds for many centuries Toon presents a broader more powerful view of Jesus as Lord of the nations Lord of the church Lord of the universe and Lord of the Christian's life For everyone concerned about the complex pressures and powerful forces that work to deny the Lordship of Jesus Christ in today's world Toon affirms that the Lord of the cosmos human history and the church is my Lord because by faith I am united in him **Sceptical Christianity** Robert Reiss,2016-06-21 Thinking

critically about Christianity today means taking the sceptics seriously Following the tradition of authors of the last century Robert Reiss engages sympathetically with people's religious doubt resulting in a thought provoking book about what it means practically to be Christian today Playing God? Wilkinson,2010-05-27 Does matter matter The scientific picture of the end of the physical Universe has undergone dramatic
changes since the turn of the 21st century with its future characterized by accelerated expansion and futility Yet Christian

theology has been largely silent on this despite the interest in eschatology in popular culture and in theology itself What can Christian theology learn from and contribute to the scientific picture of the future of the Universe Can the biblical narratives of creation and new creation have a fruitful dialogue with scientific discoveries David Wilkinson shows what a fruitful dialogue this can be Critiquing the folk eschatology of the Left Behind series the misguided faith of the scientific optimists and the lack of scientific engagement of the theologians of hope Wilkinson argues for a rediscovery of the theological theme of new creation and the centrality of bodily resurrection Light from Light Gerald S. J. O'Collins, Mary Ann Meyers, 2012-01-31 In this volume renowned scientists and theologians discuss the concept of light as understood by modern physics and employed by biblical and patristic writers Light from Light deepens readers understanding of light as posited by recent cosmological and physical theories drawing connections with light as a theological metaphor Striking glimpses into new scientific developments offer additional insight and interest Contributors Markus Aspelmeyer John Behr Marco Bersanelli Robert W Boyd David Brown Robert Dodaro Michael Heller George Hunsinger Mary Ann Meyers Gerald O Collins John Polkinghorne Andrew M Steane Kathryn E Tanner Kallistos Ware Metropolitan of Diokleia Anton Zeilinger **God and the Scientist** Dr Christopher C Knight, Revd Dr Fraser Watts, 2012-09-01 This book presents a celebration survey and critique of the theological work of arguably the most important and most widely read contributor to the modern dialogue between science and theology John Polkinghorne Including a major survey by Polkinghorne himself of his life's work in theology this book draws together contributors from among the most important voices in the science theology dialogue today to focus on key aspects of Polkinghorne's work with Polkinghorne providing responses Anybody exploring contemporary aspects of the science religion debate will find this book invaluable **Divine Action, Determinism, and the Laws of Nature** Jeffrey Koperski, 2019-11-28 A longstanding question at the intersection of science philosophy and theology is how God might act or not when governing the universe Many believe that determinism would prevent God from acting at all since to do so would require violating the laws of nature However when a robust view of these laws is coupled with the kind of determinism now used in dynamics a new model of divine action emerges This book presents a new approach to divine action beyond the current focus on quantum mechanics and esoteric gaps in the causal order It bases this approach on two general points First that there are laws of nature is not merely a metaphor Second laws and physical determinism are now understood in mathematically precise ways that have important implications for metaphysics The explication of these two claims shows not only that nonviolationist divine action is possible but there is considerably more freedom available for God to act than current models allow By bringing a philosophical perspective to an issue often dominated by theologians and scientists this text redresses an imbalance in the discussion around divine action It will therefore be of keen interest to scholars of Philosophy and Religion the Philosophy of Science and Theology
