Scope And Specificity Linguistik Aktuell V 16:

Scope and Specificity Feng-hsi Liu, 1997-12-11 Scope and Specificity is an investigation of quantifier scope interaction in natural language with special reference to English and Chinese In particular it is concerned with semantic properties of NPs Quantifier scope plays an important role in current theories of syntax and semantics However most studies of quantifier scope are only concerned with the behavior of a small number of quantifiers e g every some all As a result the generalizations made on the basis of these quantifiers often do not hold when a wider range of quantifiers is considered In this study a wide variety of NP types are examined with respect to how they interact with other NPs The key concept explored is that of semantic scope dependency independence NPs are considered according to two properties whether they can induce scope dependency and whether they can be scope dependent By observing how in basic sentences NPs behave with respect to the two properties the author presents a picture of quantifier scope much different from what has been assumed in the literature

Clitics in Phonology, Morphology and Syntax Birgit Gerlach, Janet Grijzenhout, 2001-02-01 This book contains fourteen articles that reflect current ideas on the phonology morphology and syntax of clitics It covers the forms and functions of clitics in various typologically diverse languages and presents data from e g European Portuguese Macedonian and Yoruba It extensively deals with the prosodic structure of clitics their morphological status clitic placement and clitic doubling The form and behavior of clitics with respect to tonal phenomena and in verse are discussed in two articles Akinlabi Liberman Reindl Franks Other articles address the prosodic representation of clitics in Irish Green the differences in the acquisition of clitics and strong pronouns in Catalan Escobar Gavarro the similarities between clitics and affixes or words in Romance and Bantu languages Cocchi Cysmann Monachesi Ortman Popescu the semantics of clitics in the Greek DP and in Spanish doubling Alexiadou Stavrou Uriagereka and complex problems concerning verbal clitics in Romanian and Balkan languages Legendre Spencer Tomic

Pronouns □ Grammar and Representation Horst J. Simon, Heike Wiese, 2002-09-27 The contributions of this thematic collection center around the typology of pronominal paradigms the generation of syntactic and semantic representations for constructions containing pronouns and the neurological underpinnings for linguistic distinctions that are relevant for the production and interpretation of these constructions They come from different theoretical approaches and methodological backgrounds and take into account data from a wide range of Indo-European and non Indo-European languages Bringing together a cross section of recent research on the grammar and representation of pronouns the volume offers a kaleidoscope of studies united by the common topic of pronouns as a domain of language that exemplarily shows the interaction of different components responsible for computational syntactic and semantic lexical and discourse pragmatic processes

Dimensions of Movement Artemis Alexiadou, 2002-01-01 This volume presents a collection of papers of recent generative research into the properties of phrasal and feature movement which explore these key syntactic phenomena from different angles and across languages The papers advance or build on models of movement

which capitalize either on generalized feature movement or on generalized remnant movement Both these approaches attempt to develop a restrictive theory of movement aiming at a simplification of the operations of the computational system Despite the fact that they are so different technically generalized feature movement and generalized remnant movement both push the theory of movement to the same direction in two important respects a Elimination of head movement b Elimination of covert movement The book is of primary interest to researchers and students in theoretical linguistics and syntactic theory

Empty Categories in Sentence Processing Sam Featherston, 2001 Annotation Featherston Eberhard Karls U Tubingen presents the results of three experiments on the role of empty categories phonetically null place holders for locally absent constituents in sentence processing The experiments used probe recognition sentence matching and event related potentials as well as self paced reading Coverage includes a discussion of the predictions of both Principles and Parameters Theory and Head Driven Phrase Structure Grammar Annotation c Book News Inc Portland OR booknews com **Arguments and Case** Eric J. Reuland, 2000 The ideas presented by the contributions in this volume originated in a workshop on Burzio s generalization Burzio s Generalization BG states that a verb which does not assign an external theta role to its subject does not assign structural accusative Case to an object and conversely It connects cross linguistic similarities between e g passives raising verbs and unaccusatives However it does so by linking very different properties of a predicate This raises fundamental questions about its theoretical status The contributions in this volume explore BG s theoretical basis A consensus emerges that BG is in fact an epiphenomenon due to the interaction of different principles of grammar Moreover the contributions show a striking convergence as to how BG is ultimately derived The results obtained make a significant contribution to the further development of theories of Case and thematic relations Asymmetry in Grammar Anne-Marie Di Sciullo, 2003 Asymmetry in Grammar Syntax and Semantics brings to fore the centrality of asymmetry in DP VP and CP A finer grained articulation of the DP is proposed and further functional projections for restrictive relatives as well as a refined analyses of case identification and presumptive pronouns The papers on VP discuss further asymmetries among arguments and between arguments and adjuncts Double object constructions specificational copula sentences secondary predicates and the scope properties of adjuncts are discussed in this perspective The papers on CP propose a further articulation of the phrasal projection justifications for Remnant IP movement and an analysis of variation in clause structure asymmetries The papers in semantics support the hypothesis that interpretation is a function of configurational asymmetry The type token information difference is further argued to correspond to the partition between the upper and lower level of the phrase It is also proposed that Point of View Roles are not primitives of the pragmatic component but are head dependent categories Configurationality is further argued to be required to distinguish contrastive from non contrastive Topic Compositionality is proposed to explain cross linguistic variations in the selectional behavior of typologically different languages The papers in syntax include contributions from Antonia Androutsopoulou and Manuel Espa ol Echevarra a Dana Isac Edit Jakab Cedric

Boeckx Julie Anne Legate Maria Cristina Cuervo Jacqueline Gu ron Niina Zhang Thomas Ernst Manuela Ambar Jean Yves Pollock Anna Maria Di Sciullo Ilena Paul and Stanca Somesfalean The papers on semantics include contributions of Greg Carlson Peggy Speas and Carol Tenny Chungmin Lee and James Pustejovsky *The Verb in Turkish* Eser Erguvanl?

Taylan,2002-02-21 This book is a collection of articles on the properties of the verb in Turkish as the core element of clause structure by linguists from different parts of the world Articles present the most recent analyses on the Turkish language carried out in various theoretical orientations within the functional formal range The topics researched in the contributions center around properties of verbal inflection as the morphological means to express temporal aspectual and modal notions and the implications of these morphological configurations to syntactic theory **Issues in Formal German(ic) Typology**

Werner Abraham,C. Jan-Wouter Zwart,2002 This book takes up a variety of general syntactic topics which either yield different solutions in German in particular or which lead to different conclusions for theory formation One of the main topics is the fact that languages that allow for extensive scrambling between the two verbal poles V 2 and V last need to integrate discourse functions like thema and rhema into the grammatical description This is attempted in terms of Minimalism thus extending the functional domain Special attention is given to the asymmetrical scrambling behavior of indefinites vs definites and their semantic interpretation Related topics are Transitive expletive sentences types of existential sentences with either BE or HAVE the that trace phenomenon and its semantics negative polarity items ellipsis and gapping passivization double negation all of which have extensive effects both on distributional behavior and semantic disambiguation reaching far beyond effects observable in English with its rigid unscramble word order *Studies in Comparative Germanic Syntax C.*

Jan-Wouter Zwart,Werner Abraham,2002 This volume presents a collection of articles reporting on new research carried out within the theoretical framework of generative grammar on the comparative syntax of the Germanic languages Divided in four main sections the book focuses on issues of subordination and complementation with emphasis on German Dutch and Danish displacement phenomena discussed in relation with richness of morphology with special attention to English German Dutch and Norwegian as well as presenting more general discussion of the issue language variation and change studying historical English syntax and Frisian contact dialects and the syntax semantics interface viewed from a Germanic perspective addressing ellipsis reflexivity and the behavior of quantifiers Asymmetry in Grammar Anna Maria Di Sciullo,2003-03-20

Asymmetry in Grammar Morphology Phonology and Acquisition presents evidence that asymmetry as a property of linguistic relations is salient in grammar The papers in morphology bring further evidence for the centrality of asymmetry in word structure It is shown that asymmetry is part of the internal structure of functional constructs such as determiners and complementizers as it is the case for lexical constructs Further evidence is presented for the asymmetry of prefixes in verb structure A typology of formal objects based on the distinction between maximal and minimal categories is formulated It is proposed that Formal Complexity drives the change from synthetic to analytic expressions The papers in phonology point to

the fact that asymmetry is part of that linguistic dimension in terms of processes that eliminates symmetric relations in terms of head dependency relations in terms of relative scope of the distinctive features in any inventory in terms of universal principles in combination with certain language specific choices Moreover the papers on acquisition bring to fore experimental data that point to the same direction The asymmetry of grammatical relations provides the form of the initial state of language that enables the child to cope with the poverty of the stimulus The collection includes papers in morphology by Anna Maria Di Sciullo Angela Ralli R Jean Canac Marquis Abdelkader Fassi Fehri papers in phonology by Eric Raimy Harry van der Hulst and Nancy Ritter Glyne Piggott Charles Reiss Elan Dresher and papers in acquisition from Maria Louisa Rivero and Magdalena Golezinska and David Lebeaux

Diachronic Clues to Synchronic Grammar Eric Fuss, Carola Trips, 2004-01-01 This volume emphasizes a new line of thinking in generative grammar which acknowledges that certain synchronic properties of languages can only be fully understood if diachronic data is taken into consideration The central topics addressed in this collection of papers are 1 a critical assessment of the hypothesis that certain apparently synchronic generalizations are actually the result of the mechanisms of language change 2 an inquiry into how diachronic data can be used to evaluate and shape formal analyses of particular synchronic phenomena Reviving the interest in diachronic explanations for synchronic data the contributions provide novel and original diachronic accounts of phenomena that up to now have escaped a deeper synchronic explanation including the nature of EPP features gaps in the distribution of complementizer agreement and counterexamples to the generalization that rich verbal inflection correlates with verb movement

Verb Clusters Katalin É Kiss, Henk C. van Riemsdijk, 2004-01-01 Many languages have constructions in which verbs cluster But few languages have verb clusters as rich and complex as Continental West Germanic and Hungarian Furthermore the precise ordering properties and the variation in the cluster patterns are remarkably similar in Hungarian and Germanic This similarity is of course unexpected since Hungarian is not an Indo European language like the Germanic language group Instead it appears that the clustering inversion and roll up patterns found may constitute an areal feature This book presents the relevant language data in considerable detail taking into account also the variation observed for example among dialects But it also discusses the various analytical approaches that can be brought to bear on this set of phenomena In particular there are various hypotheses as to what is the underlying driving force behind cluster formation stress patterns aspectual features morpho syntactic constraints And the analytical approaches are closely linked to a number of questions that are at the core of current syntactic theorizing does head movement exist or should all apparent verb displacement be reduced to remnant movement are morphology and syntax really just different sides of the same coin

Balkan Syntax and Semantics Olga Mičeska Tomić, 2004-01-01 The book deals with some syntactic and semantic aspects of the shared Balkan Sprachbund properties In a comprehensive introductory chapter Tomić offers an overview of the Balkan Sprachbund properties Sobolev displaying the areal distribution of 65 properties argues for dialect cartography Friedman on

the example of the evidentials argues for typologically informed areal explanation of the Balkan properties The other contributions analyze specific phenomena polidefinite DPs in Greek and Aromanian Campos and Stavrou Balkan constructions in which datives combine with impersonal clitics or non active morphology Rivero Balkan optatives Ammann and Auwera imperative force in the Balkan languages Isac and Jakab clitic placement in Greek imperatives Bo kovic focused constituents in Romanian and Bulgarian Hill synthetic and analytic tenses in Romanian D Hulst Coene and Avram purpose like modification in a number of Balkan languages Bu arovska Balkan modal existential wh constructions Grosu child and adult strategies in interpreting empty subjects in Serbian Croatian Stojanovic and Marelj conditional sentences in Judeo Spanish Montoliu and Auwera

Grammaticalization as Economy Elly van Gelderen, 2004-01-01 This book provides much detail on the changes involving the grammaticalization of personal and relative pronouns topicalized nominals complementizers adverbs prepositions modals perception verbs and aspectual markers It accounts for these changes in terms of two structural economy principles Head Preference expresses that single words i e heads are used to build structures rather than full phrases and Late Merge states that waiting as late as possible to merge i e be added to the structure is preferred over movement The book also discusses grammar external processes e g prescriptivist rules that inhibit change and innovations that replenish the grammaticalized element Most of the changes involve the extended CP and IP as elements grammaticalize clause boundaries disappear Cross linguistic differences exist as to whether the CP IP and VP are all present and split and this is formulated as the Layer Principle Changes involving the CP are typically brought about by Head Preference whereas those involving the IP and VP by Late Merge

Adverbials Jennifer R. Austin, Stefan Engelberg, Gisa Rauh, 2004 Adverbials have become an important testing ground for research on the interfaces between syntax semantics and pragmatics The articles selected for this volume present recent research on this topic Among the issues addressed are the occurrence of adverbials in various domains of the sentence Mittelfeld left and right periphery adverbials in front of gaps and the influence of the discourse context on the interpretation and position of adverbials Particular classes of adverbials that are discussed include domain locative temporal manner transparent and degree adverbials Beyond the exploration of these topics the volume reflects the current debate between proponents of semantic driven approaches to the positioning of adverbials which assume adverbials to be adjuncts and approaches that claim a primacy of syntax in conceiving of adverbials as specifiers in a universally valid hierarchy of functional projections

Islands and Chains Cedric Boeckx, 2003-07-17 The present work provides a detailed analysis of chain formation and locality conditions imposed on it within the Minimalist Program It does so by analyzing resumptive strategies in great detail This study claims that resumptive pronouns and their antecedents are first merged as constituents and are separated via movement thus forming instances of discontinuous constituents Resumptive chains are thus akin to the well known stranding analysis of quantifier float A taxonomy of islands is developed that crucially ties barriers for movement to agreement possibilities The stranding of a resumptive pronoun is

shown to limit the role of agreement for the moving element thereby allowing a chain to be formed across an island

Focus Structure in Generative Grammar Carsten Breul, 2004-04-29 The notion of focus structure in this work refers to the distinction between categoricalthetic and identificational sentences The central claim is that the syntactic representation of every sentence has to encode which of these types of focus structure is realized This claim is discussed in great detail with respect to syntax intonation and semantics within the framework of the Minimalist Program It is shown that the incorporation of focus structure into syntax offers new perspectives for a solution of vexing problems in syntax and semantics For example fronting preposing topicalisation is treated as a syntactic operation which clearly belongs to core grammar i e is not optional or stylistic the semantic notion of quantifier raising is dispensed with in favour of a focus structural treatment of phenomena which gave rise to it The book appeals to generative linguists and to functional linguists who do not believe in an unbridgeable gap between the formal and functional analysis of language Modality and its Interaction with the Verbal System

Sjef Barbiers, Frits Beukema, Wim van der Wurff, 2002-05-29 This book provides a broad overview of the issues relevant for the study of syntax of modals and their interaction with the verbal system A large number of novel observations are offered from a variety of languages including Dutch Modern and Middle English German Lele Macedonian Middle Dutch and Slovene The wealth of data the critical evaluation of existing syntactic analyses of modality and the alternative analyses proposed make the book interesting for both for descriptively and for theoretically oriented syntacticians Major concerns addressed are the distinction between epistemic and root modality where the arguments pro and contra the assumption of a corresponding difference in syntactic structure are evaluated refined and supplemented by arguments for syntactic distinction between necessity and possibility modals and by consideration of the influence of the modal s complement on the interpretation the interaction between modality and clausal phenomena in particular negation but also imperatives aspect and Aktionsart and the acquisition of modality addressing cross linguistic differences in the possibility for root infinitives to express modal interpretations and the late acquisition of epistemic interpretations as compared with non epistemic interpretations *The Syntax of Cape Verdean Creole*

Marlyse Baptista, 2003-01-27 This book offers an in depth treatment of a variety of morpho syntactic issues in Cape Verdean Creole CVC both from a descriptive and theoretical perspective The investigated topics include the determiner system Tense Mood Aspect markers and pronominal paradigms The study of TMA markers reveals morpho syntactic configurations with interesting ramifications for syntactic theory and parametric variation This book targets creolists theoretical linguists and the Cape Verdean community Given the diversified targeted audience the descriptive chapters are purposefully kept separate from their theoretical counterparts presenting issues that are later revisited in the Minimalist framework The data used in this study are primarily drawn from 83 transcribed interviews from a pool of 187 speakers The interviews were collected during fieldwork conducted in 1997 2000 and 2001 in the Cape Verdean Sotavento leeward islands representing the more basilectal varieties of the creole As all natural languages CVC displays

syntactic similarities and differences with other creoles and noncreoles Hence in the spirit of comparative syntax this volume compares CVC to other creoles like Guinea Bissau Creole and to noncreoles like Portuguese French Icelandic and Italian dialects
