Anthropology as a Holistic Science defends the holistic scientific approach by examining its history which is in part a story of adventure and its sound philosophical foundation. It shows that activism and the holistic scientific approach need not compete with one another. This book discusses how anthropology developed in the nineteenth century during what has been called the Second Scientific Revolution. It emerged in the United States in its holistic four field form from the confluence of four lines of inquiry: the British, the French, the German, and the American. As the discipline grew and became more specialized, a tendency of divergence set in that weakened its holistic appeal. Beginning in the 1960s, a new movement arose within the discipline which called for abandoning science as anthropology's mission in order to convert it into an instrument of social change, a redefinition which weakens its effectiveness as a way of understanding humankind and which threatens to discredit the discipline.

Anthropology and the Behavioral and Health Sciences Otto von Mering, Leonard Kasdan, 2010-11-23. This book acts as a catalyst for anthropology to foster research ties to its neighboring disciplines in the behavioral and health sciences. It is an introspective and circumspective appraisal of the relevance of anthropology to these related disciplines and professions and assesses the usefulness of reciprocal borrowing of ideas and investigative tools among them. Essays by scholars from several disciplines are included along with commentaries on each essay by noted social scientists. Contributors: Bernard S. Cohn, Albert Damon, Jules Henry, Donald L. Can Small Urban Communities Survive? Branka Berce-Bratko, 2018-01-17. This title was first published in 2001. Throughout the post-war period, there has been much activity in the conservation and renewal of old town centres throughout Europe. A considerable body of knowledge has been built up on the technical side of rehabilitation.

over a period of 40 years but little attention has been paid to related societal and cultural aspects More often than not this results in a degree of failure in the rehabilitation process This is an exploration of how the planning and design of urban areas might be improved by the incorporation of culturological analysis within the town planning process European practice in residential rehabilitation and conservation is renewed in order to gauge what progress has been made with particular emphasis on solutions and remedies associated with cultural ethnicity and minority issues **Anthropology in Theory** Henrietta L. Matthews,Paul Robertson,2024-02-01 This book explores both scientific and humanistic theoretical traditions in anthropology through the lens of ontology The first part of the book examines different methods for generating valid anthropological knowledge and proposes a shift in current consensus Drawing on Western scholars of antiquity and the medieval period and moving away from 20th century theorists it argues that we must first make ontological assumptions about the kinds of things that can exist or not before we can then develop epistemologies that study those kinds of things The book goes on to apply the ontology first theory to a set of case studies in modern day conspiracy theories misinformation and magical thinking It asserts that we need to move away from unneeded metaphysical assumptions of conspiracy theories being misinformation and argues that reconstructing particular historical events can be a fruitful zone for application of quantitative methods to humanistic questions Theorizing the Anthropology of Belief is an excellent supplementary suitable for upper level undergraduate and graduate courses in anthropological theory *Anthropology as Cultural Critique* George E.
