Scorched Earth William Thomas,1995-01-01      Scorched Earth William Thomas,1995      *Ecocide* Franz

Broszimmer,2002-09-20 We live in an age of ecocide Changes of enormous ecological significance are occurring on our planet the ozone layer is beginning to disintegrate Since 1970 the world s forests have almost halved A quarter of the world s fish have been depleted 70% of biologists believe the world is now in the midst of the fastest mass extinction of species in the planet s 4 5 billion year history Biodiversity loss is rated as a more serious environmental problem than the depletion of the ozone layer global warming or pollution and contamination How have we come to this and what can be done to conserve our environment for the future *Ecocide* examines the facts behind the figures to offer a disturbing account of the ecological impact that the human species has on the planet It shows how we are wilfully destroying our world Highlighting important countermovements who are working for ecological democracy this unique book is essential for anyone who cares about conserving our environment for the future

*The Caspian Sea* William Ascher,Natalia Mirovitskaya,2012-12-06 This volume is based on the presentations and deliberations of an Advanced Research Workshop ARW Caspian Sea A Quest for Environmental Security that was held on March 15 19 1999 in Venice Italy The Workshop was sponsored by the NATO s Division for Scientific and Environmental Affairs with additional support provided by the Trust for Mutual Understanding USA It was organized by Duke University s Center for International Development Research with the guidance of the International Committee of scientists from Russia United States Georgia and Italy and organizational assistance rendered by Venice International University The Caspian Sea region is of profound importance from the perspective of global and regional environmental security New geopolitical and economic circumstances have created a mixture of competition reluctant collaboration and legal political economic and ideological wrangling There is an intense debate over how the Caspian and its resources should be divided among littoral states and how these resources are to be developed While most littoral states and the international companies strive to develop the area s immense hydrocarbon potential it is clear that the Caspian s unique and fragile ecosystem is at risk

**The SAGE Handbook of Qualitative Research** Norman K. Denzin (ed),Yvonna S. Lincoln,2005 A thoroughly revised updated edition this volume includes new chapters on auto ethnography critical race theory queer theory testimonies

*War and Nature* Jurgen Brauer,2009-10-15 SOME PLACES YOU NEVER FORGET For Amanda Stockenberg that place was Smugglers Inn The seaside inn had been a refuge for Amanda when she was sixteen a place to find solace to find herself and to find love She can t think of the inn now without remembering Dane Cutter The then nineteen year old illegitimate son of the cook had taught her about love She d been ready to give up everything to be with him But at the end of the summer he it seemed was not Now ten years later Amanda once again finds herself staying at Smugglers Inn this time for a corporate retreat The event is her last chance to prove herself to her bosses so she doesn t need any complications like finding Dane Cutter still working at the inn And still as dangerous to her equilibrium as ever

Because suddenly Amanda isn't sure what she wants the window office or the window room of a seaside inn She has one week Seven days to choose between achieving all her dreams or reuniting with the man she never stopped loving Climate Crisis and the Democratic Prospect Frank Fischer, 2017 Can contemporary democratic governments tackle climate crisis Some argue that democracy has to be a central part of a strategy to deal with climate change Others argue that it not to be up to the challenge in the time frame available that it will require a stronger hand even a form of eco authoritarianism This book supports the case for environmental democracy but argues that sustaining democratic practices will be difficult during the global climate turmoil ahead This inquiry thus seeks a political ecological strategy for preserving democratic governance during hard times Without ignoring the global dimension the analysis identifies an alternative path in the theory and practices participatory environmental governance embodied in a growing global relocation movement Drawing on these ideas and experiences the task is to influence environmental political theory in ways that can be of assistance to those who will face climate crisis in its full magnitude in The International Political Economy of the Environment Dimitris Stevis, Valerie J. Assetto, 2001 Thirteen contributions from political scientists sociologists and other academics represent a critical approach to the IPE of the environment an approach that focuses on the historical development and framing of environmental problems and solutions and that seeks to understand the social priorities or purpose that differing problems and solutions reflect from the preface A unifying theme is the idea that the way in which problems are framed intimately impacts the kinds of solutions that are proposed A sampling of topics environmental NGOs TNCs and the question of governance environmental discourse and danger in Dominican and Cuban urban watersheds and global change and the political economy of sustainable development in Brazil Annotation copyrighted by Book News Inc Portland OR *Communicating Gender Diversity* Victoria Pruin DeFrancisco, Victoria Leto DeFrancisco, Catherine Helen Palczewski, 2007-06-21 The purpose behind *Communicating Gender Diversity* A Critical Approach is not to provide any final conclusions about communicating gender Because gender is a constantly evolving concept both in terms of individuals gender identity development and the larger culture's predominant notions of gender such absolute claims are not possible Instead the intent is to better equip readers with tools with which they can examine and make sense of the intersections of communication and gender The text covers the variety of ways in which communication of and about gender and sex enables and constrains people's intersectional identities The authors believe people are social actors and as such create meaning through their symbolic interactions Thus the book's emphasis is not on how gender influences communication but on how communication constitutes gender They also believe that people are capable of being self reflective about communication processes and creative in generating new ways to play with symbols

**Domicide** John Douglas Porteous, Sandra Eileen Smith, 2001 Media reports describing the destruction of people's homes for reasons ranging from ethnic persecution to the perceived need for a new airport or highway are all too familiar The planned destruction of homes affects millions of people globally places destroyed range in scale from single dwellings to

entire homelands Domicide tells how and why the powerful destroy homes that happen to be in the way of corporate political bureaucratic and strategic projects Too frequently this destruction is justified as being in the public interest **Ecology of War & Peace** Tom H. Hastings, 2000 How do mobilization for war and the actual war effort affect the environment How do ecological conditions encourage war What are possible non violent solutions to the ecological conflict dynamic Ecology of War Peace attempts to answer these questions in readable prose with an unapologetic bias toward non violence **The Philosopher Queen** Chris J. Cuomo, 2003 The search for an ethic that is joyful and life loving yet politically and scientifically realistic is at the root of Cuomo's recent philosophy **The Planetary Emergency** Kent D. Shifferd, 2021-02-02 Earth and its inhabitants face an unprecedented crisis the human caused destruction of the planet's life support systems Deteriorating climate bringing super storms mass forest fires melting glaciers droughts extreme heat and rising seas a decline in food production soil loss water pollution and declining fisheries all threaten the future of life on earth with a looming extinction event not seen for 60 million years Beginning in the 17th century we developed a civilization based on radical materialism exploitation of natural resources and the myth of endless economic growth For all its technological wonders this hypercivilization has proven unsustainable This book explores ways we can create an ecocivilization compatible with the laws and limits of nature a new way of living already developing with new technologies new forms of social organization and a new story about ourselves and the Earth **The Genocide-Ecocide Nexus** Damien Short, Martin Crook, 2022-02-09 In a world gripped by an ever worsening ecological crisis there are present and increasing genocidal pressures on many culturally distinct social groups such as indigenous peoples This is where the genocide ecocide nexus presents itself The destruction of ecosystems ecocide can be a method of genocide if for example environmental destruction results in conditions of life that fundamentally threaten a social group's cultural and or physical existence Given the looming threat of runaway climate change the attendant rapid extinction of species destruction of habitats ecological collapse and the self evident dependency of the human race on our biosphere ecocide both natural and manmade will become a primary driver of genocide Through nine chapters of cutting edge research this book examines specific case studies in geographical settings such as Iraq Sudan Nigeria and Brazil to highlight and analyse the crucial connections and vectors of the genocide ecocide nexus This book will be of great value to scholars students and researchers interested in the ecological crisis Environmental Justice the political economy of genocide and ecocide as well as environmental human rights The chapters in this book were originally published as a special issue of The Journal of Genocide Research **The Violent Technologies of Extraction** Alexander Dunlap, Jostein Jakobsen, 2019-10-15 Offering a thought provoking theoretical conversation around ecological crisis and natural resource extraction this book suggests that we are on a trajectory geared towards total extractivism guided by the mythological Worldeater The authors discuss why and how we have come to live in this catastrophic predicament rooting the present in an original perspective that animates the forces of global techno capitalist development They argue that the

Worldeater helps us make sense of the insatiable forces that transform convert and consume the world The book combines this unique approach with detailed academic review of critical agrarian studies and political ecology the militarization of nature and the conventional and green extraction nexus It seeks radical reflection on the role people play in the construction and perpetuation of these crises and concludes with some suggestions on how to tackle them Enforcing Ecocide Alexander Dunlap,Andrea Brock,2022-06-30 Policing and ecological crises and all the inequalities discrimination and violence they entail are pressing contemporary problems Ecological degradation biodiversity loss and climate change threaten local communities and ecosystems and cumulatively the planet as a whole Police brutality wars paramilitarism private security operations and securitization more widely impact people especially people of colour and habitats This edited collection explores their relationship and investigates the numerous ways in which police security and military forces intersect with reinforce and facilitate ecological and climate catastrophe Employing a case study based approach the book examines the relationships and entanglements between policing and ecosystems revealing the intimate connection between political violence and ecological degradation **Triangle of One Hundred Years Wars** JJ Klaas,2023-10-15 The book Triangle of One Hundred Years Wars provides an incredibly gripping and riveting South African historiography chronologically articulated through an endogenous lens by a native South African It chronicles a record reflective of the fundamental historical events within the southern part of Africa The narrative delineates the adroitness of the visionary leadership of amaXhosa given the successes and failures on the protracted wars etched in the Eastern Cape region Dr Jongi Joseph Klaas has a Bachelor of Pedagogics from the University of Fort Hare South Africa a Masters Degree from the from the University of Oklahoma in the United States of America and Master of Philosophy and Doctor of Philosophy in Sociology from the University of Cambridge United Kingdom In 2015 he published Memoirs of Relentless Pursuit Currently he is working on the battlefields of the African wars of resistance When I wrote House of Phalo more than 40 years ago I could never have expected that we would have to wait so long for an African perspective Professor Jeff Peires The book itself is a victory it is a reward to those heroes who fought wars of resistance Ms Vathiswa Nhanha Librarian at Cory Library Rhodes University Jongi Klaas redefines the telling of history his stories have a soul they live in you Professor Ncedile Saule **Military History of Late Rome 565-602** Ilkka Syväanne,2022-09-21 A fresh analysis of the Roman Empire in the aftermath of the reconquests of Justinian I It is often claimed that Justinian overstretched the Roman resources but the analysis in Military History of Late Rome 565 602 proves that view wrong It demonstrates that the initial troubles were largely the result of the mistakes of Justin II and that his successors Tiberius II and Maurice not only restored its fortunes but were at the time of Maurice s death actually poised to complete the reconquests of Justinian It was thanks to the reforms of Maurice which were codified in the military treatise the Strategikon that the Roman army had achieved a position of relative superiority over all of its enemies so that by 602 the Romans had decisively defeated the Persians Slavs and Avars These gains however were lost

when Maurice was murdered in a military mutiny that brought Phocas to power This volume explains why the Roman army overthrew one of the greatest Roman emperors who ever lived This was an era of epic battles so the author also pays particular attention to the period tactics and analyzes all the period battles in great detail These include such battles as Melitene Constantia Sirmium Nymphius River Solancho Lake Urmiah Plain of Canzak Iatrus and the epic battles of Priscus and Comentiolus in the Balkans Praise for Military History of Late Rome 425 457 An outstanding work the series gives us a very good picture of the long process that has come to be known as the Fall of Rome This is an invaluable read for anyone with an interest in Late Antiquity The NYMAS Review

*A Military History of the Ottomans* Mesut Uyar Ph.D., Edward J. Erickson, 2009-09-23 The Ottoman Army had a significant effect on the history of the modern world and particularly on that of the Middle East and Europe This study written by a Turkish and an American scholar is a revision and corrective to western accounts because it is based on Turkish interpretations rather than European interpretations of events As the world's dominant military machine from 1300 to the mid 1700s the Ottoman Army led the way in military institutions organizational structures technology and tactics In decline thereafter it nevertheless remained a considerable force to be counted in the balance of power through 1918 From its nomadic origins it underwent revolutions in military affairs as well as several transformations which enabled it to compete on favorable terms with the best of armies of the day This study tracks the growth of the Ottoman Army as a professional institution from the perspective of the Ottomans themselves by using previously untapped Ottoman source materials Additionally the impact of important commanders and the role of politics as these affected the army are examined The study concludes with the Ottoman legacy and its effect on the Republic and modern Turkish Army This is a study survey that combines an introductory view of this subject with fresh and original reference level information Divided into distinct periods Uyar and Erickson open with a brief overview of the establishment of the Ottoman Empire and the military systems that shaped the early military patterns

[Chemtrails, HAARP, and the Full Spectrum Dominance of Planet Earth](#) Elana Freeland, 2014-05-26 We are entering a Space Age but not the kind President Kennedy originally envisioned This Space Age is replacing resource wars and redefines planet earth as a battlespace in accordance with the military doctrine of Full Spectrum Dominance This book examines how chemtrails and ionospheric heaters like the High frequency Active Auroral Research Project HAARP in Alaska services a full spectrum dominance This Revolution in Military Affairs needs an atmospheric medium to assure wireless access to the bodies and brains of anyone on Earth from heat seeking missiles to a form of mind control How sinister are these technologies Are we being prepared for a global village lockdown The recent release of NSA records have reminded Americans that eyes in the sky are tracking us as supercomputers record the phone calls e mails internet posts and even the brain frequencies of millions Elana M Freeland's startling book sifts through the confusion surrounding chemtrails versus contrails and how extreme weather is being geo engineered to enrich disaster capitalists and intimidate nations A deconstruction of Bernard J Eastlund's HAARP patent

points to other covert agendas such as a global Smart Grid infrastructure that enables access to every body and brain on Earth a Transhumanist future that erases lines between human and machine and Nanobiological hybrids armed with microprocessors that infest and harm human bodies
