Compositional Choices and Meaning in the Vocal Music of J. S. Bach Mark A. Peters, Reginald L.

Sanders, 2020-07-06 **Compositional Choices and Meaning in the Vocal Music of J S Bach** collects seventeen essays by leading Bach scholars The authors each address in some way such questions of meaning in J S Bach s vocal compositions including his Passions Masses Magnificat and cantatas with particular attention to how such meaning arises out of the intentionality of

Bach's own compositional choices or in Part IV in particular how meaning is discovered and created through the reception of Bach's vocal works. And the authors do not consider such compositional choices in a vacuum but rather discuss Bach's artistic intentions within the framework of broader cultural trends: social, historical, theological, musical, etc. Such questions of compositional choice and meaning frame the four primary approaches to Bach's vocal music taken by the authors in this volume as seen across the book's four parts. Part I: How might the study of historical theology inform our understanding of Bach's compositional choices in his music for the church: cantatas, Passions, masses. Part II: How can we apply traditional analytical tools to understand better how Bach's compositions were created and how they might have been heard by his contemporaries. Part III: What we can understand anew through the study of Bach's self-borrowing, i.e. parody, which always changed the earlier meaning of a composition through changes in textual content, compositional characteristics, the work's context within a larger composition, and often the performance context from court to church, for example. Part IV: What can the study of reception teach us about a work's meaning(s) in Bach's time, during the time of his immediate successors, and at various points since then, including our present. The chapters in this volume thus reflect the breadth of current Bach research in its attention not only to source study and analysis but also to meanings and contexts for understanding Bach's compositions.

Sacred Repertories in Paris under Louis XIII Peter Bennett, 2023-04-14. The study of sacred music under Louis XIII (r. 1610-43) has advanced little in the past hundred years. Despite some important recent contributions by the late Denise Launay and others, much of our current perception of the Latin sacred music of the period is still informed by the pioneering research undertaken by Henri Quittard in the early years of the twentieth century. Even with Quittard's work, however, the almost complete absence of surviving sources has severely limited our understanding of this era. But by re-examining one of the seventeenth-century treasures of the Bibliothèque nationale MS Vma r s 571 *Sacred Repertories in Paris under Louis XIII*, reveals that far from being a transitional period in which little music of any interest was produced, the reign of Louis XIII witnessed a flowering of musical activity and the development of musical techniques normally associated with the reign of

Louis XIV Based on an exhaustive and innovative manuscript study *Sacred Repertories* shows that Vma r s 571 a largely anonymous source of previously unknown provenance was copied in Paris by the composer Andr Pechon and that it preserves three previously unidentified repertories with connections to the court of Louis XIII The repertoire of the musique de la chambre until now considered a secular institution shows it to have been an equal partner of the chapelle in the provision of sacred music at court The repertoire of the royal parish church of Saint Germain l Auxerrois the only working liturgical repertory surviving from the century illustrates musical practices at this important collegiate church And the repertoire of the Royal Benedictine Abbey of Montmartre testifies to the richness of musical tradition in Parisian convents during a period when no other comparable music from France survives *Sacred Repertories* thus transforms our understanding of the musical landscape of seventeenth century France and provides a springboard fo

The Voice ,1926 **A Woman's Voice in Baroque Music: Mariane von Ziegler and J.S. Bach** MarkA. Peters,2017-07-05 At the end of his second year in Leipzig J S Bach composed nine sacred cantatas to texts by Leipzig poet Mariane von Ziegler 1695 1760 Despite the fact that these cantatas are Bach s only compositions to texts by a female poet the works have been largely ignored in the Bach literature Ziegler was Germany s first female poet laureate and the book highlights her significance in early eighteenth century Germany and her commitment to advancing women s rights of self expression Peters enriches and enlivens the account with extracts from Ziegler s four published volumes of poetry and prose and analyses her approach to cantata text composition by arguing that her distinctive conception of the cantata as a genre encouraged Bach s creative musical realizations In considering Bach s settings of Ziegler s texts Peters argues that Bach was here pursuing a number of compositional procedures not common in his other sacred cantatas including experimentation with the order of movements within a cantata with formal considerations in arias and recitatives and with the use of instruments as well as innovative

approaches to Vox Christi texts and to texts dealing with speech and silence A Woman s Voice in Baroque Music is the first book to deal in depth with issues of women in music in relation to Bach and one of the few comprehensive studies of a specific repertory of Bach s sacred cantatas It therefore provides a significant new perspective on both Ziegler as poet and cantata librettist and Bach as cantata composer **Obeying the Voice of God** ,2008
