King, Gary Robinson, 2019-02-18 Contemporary public discourses about the ocean are routinely characterized by scientific and environmentalist narratives that imagine and idealize marine spaces in which humans are absent In contrast this collection explores the variety of ways in which people have long made themselves at home at sea and continue to live intimately with it In doing so it brings together both ethnographic and archaeological research much of it with an explicit Ingoldian approach on a wide range of geographical areas and historical periods Mesolithic Settlement in the North Sea Basin Clive Waddington, 2007-12-20 The archaeological remains at Howick consist of a Mesolithic hut site and an Early Bronze Age cist cemetery located on a modern cliff edge overlooking a small estuary This volume is devoted solely to the reporting and interpretation of the Mesolithic remains Three huts had been constructed on the Howick site all on the same footprint with no evidence to indicate a gap between these occupations and the remains inside the hut were all consistent with its use as a habitation site The lithic material from Howick is the most accurately dated assemblage from any British Mesolithic site and is a classic example of a narrow blade industry Typically for Britain these sites date from around 7500 cal BC but the Howick dates indicate an earlier start for this type of industry The chipped stone assemblage from Howick is all made from locally occurring beach pebble flint which fits into the wider pattern of localised raw material acquisition by groups elsewhere in North East England A wide variety of tool types were found within the hut reflecting the diverse activities that appear to have taken place there With such a wide range of resources on offer on a year round basis the site is interpreted as a base camp settlement that was used by the same group and their descendants over a period of several generations lasting for somewhere in the region of 200 years The size of the hut indicates its use by a family sized group The Howick excavations have forced a rethink of the scale and nature of Mesolithic settlement in North East England as well as the relationship between this and other regions around the North Sea Basin It is hoped that this work will help encourage further research into the Mesolithic of the region and its interactions with adjacent areas of upland other North Sea Basin communities as well as groups occupying the lands further north and south **Records of the Scottish Settlers in the River Plate and Their Churches** James Dodds (of Buenos Aires.), 1897 **British History** A.J. **Settlement, Society and Cognition in Human Evolution** Fiona Coward, Robert Hosfield, Matt Pope, Francis Wenban-Smith, 2015-01-26 This volume provides a landscape narrative of early hominin evolution linking conventional material and geographic aspects of the early archaeological record with wider and more elusive social cognitive and symbolic landscapes It seeks to move beyond a limiting notion of early hominin culture and behaviour as dictated solely by the environment to present the early hominin world as the outcome of a dynamic dialogue between the physical environment and its perception and habitation by active agents This international group of contributors presents theoretically informed yet empirically based perspectives on hominin and human landscapes

**Ireland's First Settlers** Peter Woodman, 2015-12-31 Ireland's First Settlers tells the story of the archaeology and history of the first continuous phase of Ireland's human settlement It combines centuries of search and speculation about human antiquity in Ireland with a review of what is known today about the Irish Mesolithic This is in part provided in the context of the author's 50 years of personal experience searching to make sense of what initially appeared to be little more than a collection of beach rolled and battered flint tools The story is embedded in how the island of Ireland its position distinct landscape and ecology impacted on when and how Ireland was colonized It also explores how these first settlers evolved their technologies and lifeways to suit the narrow range of abundant resources that were available The volume concludes with discussions on how the landscape should be searched for the often ephemeral traces of these early settlers and how sites should be excavated It asks what we really know about the thoughts and life of the people themselves and what happened to them as farming began to be introduced
