Translanguaging and English as a Lingua Franca in the Plurilingual Classroom Anna Mendoza,2023-03-09 This book explores multilingual practices such as translanguaging code switching and stylization in secondary classrooms in Hawai i Using linguistic ethnography it investigates how students in a linguistically diverse class including those who speak less commonly taught languages deal with learning tasks and the social life of the class when using these languages alongside English as a lingua franca It discusses implications for teachers from balancing student needs in lesson planning and instruction to classroom management where the language use of one individual or group can create challenges of understanding participation or deficit identity positionings for another The book argues that

students must not only be allowed to flex their whole language repertoires to learn and communicate but also be aware of how to build bridges across differences in individual repertoires. It offers suggestions for teachers to consider within their own contexts highlighting the need for teacher autonomy to cultivate the classroom community's critical language awareness and create conducive environments for learning. This book will appeal to postgraduate students, researchers, and academics working in the fields of sociolinguistics and linguistic ethnography as well as pre-service and in-service teachers in linguistically diverse secondary school contexts.

Revisiting Language Learning Resources Carlos Periñán Pascual, 2009-03-26

Human and material resources are two key elements that make up the language learning process. Regarding material resources, nowadays new technologies can be said to play a leading role in most language learning environments. However, we cannot forget that these relatively new tools still coexist with more traditional ones which are still widely used in the foreign language classroom. On the other hand, the progressive emergence of new human roles in language learning means that human resources have also become a key medium through which the learner accesses knowledge and practice towards language acquisition. There is an obvious need to carry out research on these resources in order to assess their potential for an optimum learning experience. This book tries to meet such needs, offering the research work that different authors have carried out in this field.
