The History of Foreign Investment in the United States to 1914 Mira Wilkins, 1989 From the colonial era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world s largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation s development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world s largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state securities drew in the most long term foreign investment whereas from 1875 to 1914 the private sector was the main attraction The construction of the American railroad system called on vast portfolio investments from abroad there was also sizable direct investment in mining cattle ranching the oil industry the chemical industry flour production and breweries as well as the production of rayon thread and even submarines In addition there were foreign stakes in making automobile and electrical and nonelectrical machinery America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts

The Investment Frontier John Denis Haeger, 1981-06-30 The American West did not grow in isolation from the East On the contrary New York financiers and other eastern entrepreneurs were crucial to America's western economic development providing the necessary capital and expertise to transform the West into a productive part of the nation's economy This thesis is powerfully demonstrated by John Denis Haeger in this study concerning the Old Northwest the present day states of Ohio Michigan Indiana Illinois and Wisconsin during the years 1815-1840 The result of years of research in manuscript collections and government documents the book provides a comprehensive picture of early land speculators examining their investments in farm lands town lots banks and transportation improvements as well as their influence on western businessmen and institutions It also explores their political and economic affairs on the East Coast since these matters dramatically affected the scope of their western investments Historians' generalizations about nonresident investors or eastern speculators have previously assumed a common type and business method when in fact easterners possessed varying economic goals and utilized different business strategies To demonstrate this Haeger compares and

contrasts the promoter Charles Butler and the conservative speculators Isaac and Arthur Bronson key figures among New York's financial elite whose careers and strategies are for the first time described in detail The activities of these investment pioneers whose every move was calculated to return profits challenge the traditional images of westward expansion as a largely unplanned and spontaneous movement of people and capital **Pesos and Dollars** Alicia Marion Dewey,2014-10-07
