**The Key Issues Concerning Contemporary Art** Gary Willis, 2010 This thesis argues that the contemporary artist's objective is the production of new social space and the institution of new cultural knowledge It does this by drawing an unexpected parallel between the social and political expectations facing the contemporary artist and the deepest philosophic conception of the artist's function It traces art's historical trajectory from 20th century modernism post modernism to post colonialism from a broad range of critical theoretical and curatorial perspectives

**The Contemporary Museum** Simon Knell, 2018-10-11 The Contemporary Museum issues a challenge to those who view the museum as an artefact of history constrained in its outlook as much by professional institutional and disciplinary creed as by the collections it accumulated in the distant past Denying that the museum can locate its purpose in the pursuit of tradition or in idealistic speculation about the future the book asserts that this can only be found through an ongoing and proactive negotiation with the present the contemporary This volume is not concerned with any present but with the peculiar circumstances of what it refers to as the global contemporary the sense of living in a globally connected world that is preoccupied with the contemporary To situate the museum in this world of real and immediate need and action beyond the reach of history the book argues is to empower it to challenge existing dogmas and inequalities and sweep aside old hierarchies As a result fundamental questions need to be asked about such things as the museum's relationship to global time and space to systems and technologies of knowing to the life well lived to the movement and rights of people and to the psychology permanence and organisation of culture Incorporating diverse viewpoints from around the world The Contemporary Museum is a follow up volume to Museum Revolutions and as such should be essential reading for students in the fields of museum and heritage studies cultural studies communication and media studies art history and social policy Academics and museum professionals will also find this book a source of inspiration

Art of the Deal Noah Horowitz, 2014-08-31 Art today is defined by its relationship to money as never before Prices of living artists' works have been driven to unprecedented heights conventional boundaries within the art world have collapsed and artists now think ever more strategically about how to advance their careers Artists no longer simply make art but package sell and brand it Noah Horowitz exposes the inner workings of the contemporary art market explaining how this unique economy came to be how it works and where it's headed He takes a unique look at the globalization of the art world and the changing face of the business offering the clearest analysis yet of how investors speculate in the market and how emerging art forms such as video and installation have been drawn into the commercial sphere By carefully examining these developments against the backdrop of the deflation of the contemporary art bubble in 2008 Art of the Deal is a must read

**Scale in Contemporary Sculpture** Rachel Wells, 2017-07-05 The first book to devote serious attention to questions of scale in contemporary sculpture this study considers the phenomenon within the interlinked cultural and socio-historical framework of the legacies of postmodern theory and the growth of global capitalism In particular the book traces the impact of postmodern theory on concepts of measurement and exaggeration and analyses the relationship between this philosophy and the sculptural trend that has developed since the early 1990s Rachel Wells examines the arresting international trend of sculpture exploring scale including American precedents from the 1970s and 1980s and work by the Young British Artists

Noting that the emergence of this sculptural trend coincides with the end of the Cold War Wells suggests a similarity between the quantitative ratio of scale and the growth of global capitalism that has replaced the former status quo of qualitatively opposed systems This study also claims the allegorical nature of scale in contemporary sculpture outlining its potential for critique or complicity in a system dominated by quantitative criteria of value In a period characterised by uncertainty and incommensurability Wells demonstrates that scale in contemporary sculpture can suggest the possibility of and even an unashamed reliance upon comparison and external difference in the construction of meaning The Efficacy of Intimacy and Belief in Worldmaking Practices Urmila Mohan, 2023-11-17 This book explores efficacious intimacy as an embodied concept of worldmaking and a framework for studying belief practices in religious and political domains The study of how beliefs make and manifest power through their sociality and materiality can reveal who or what is considered effective in a particular socio cultural context The chapters feature case studies drawn from diverse religious and political contexts in Asia Africa and the Americas and explore practices ranging from ingesting sacred water to resisting injustice In doing so the authors analyze emotions and affects and how they influence dynamics of proximity and distance Taking an innovative approach to the topic of intimacy the book offers a fascinating examination of how life worlds are constructed by material practices It will be of interest to scholars of anthropology religion and material culture
