Fat on Film Barbara Plotz, 2020-02-20 Over the last two decades fatness has become the focus of ubiquitous negative rhetoric in the USA and beyond presented under the cover of the medicalized war against the obesity epidemic In *Fat on Film* Barbara Plotz provides a critical analysis of the cinematic representation of fatness during this timeframe specifically in contemporary Hollywood cinema with an emphasis on the intersection of gender race and fatness The analysis is based on around 50 films released since 2000 and includes examples such as *Transformers* 2007 *Precious* 2009 *Kung Fu Panda* 2008 *Paul Blart* 2009 and *Pitch Perfect* 2012 Plotz maps the common cinematic tropes of fatness and also shows how commonplace notions of fatness that are part of the current obesity epidemic discourse are reflected in these tropes In this original study Plotz brings critical attention to the politics of fat representation a topic that has so far received little attention within film and cinema studies

Film And Television In Education Robert Watson, 2003-09-02 First published in 1990 The aim of the series is to define and defend a comprehensive aesthetic both theoretical and practical for the teaching of the arts There can be little doubt that of the six great arts which the Library of Aesthetic Education is committed to defending and defining film has been the most ignored in the curriculum of our schools There is a grand irony in this for film is not only the one unique art form developed in our own century but also the most unequivocally popular Film was envisaged as part of a system of communications which had to be decoded in terms of ideology and contextualized in terms of power and control Robert Watson's *Film and Television in Education* with its telling subtitle *An Aesthetic Approach to the Moving Image* sets out to remedy the neglect

Fifties Television

William Boddy, 1993 Just a few years in the mid 1950s separated the golden age of television's live anthology drama from Newton Minow's famous vast wasteland pronouncement Fifties Television shows how the significant programming changes of the period cannot be attributed simply to shifting public tastes or the exhaustion of particular program genres but underscore fundamental changes in the way prime time entertainment programs were produced sponsored and scheduled These changes helped shape television as we know it today William Boddy provides a wide ranging and rigorous analysis of the fledgling American television industry during the period of its greatest economic growth programming changes and critical controversy He carefully traces the development of the medium from the experimental era of the 1920s and 1930s through the regulatory battles of the 1940s and the network programming wars of the 1950s
