Dorfman,2015-11-17 This fully integrated volume written by the leading experts in the field of social work presents a wide range of therapeutic paradigms Especially noteworthy is the common framework provided for all paradigms discussed thus facilitating comparison and contrast between each approach These paradigms include cognitive brief oriented and psychosocial therapies as well as Adlerian theory and radical behaviorism *Crisis Intervention, Book 2* Howard J. Parad,Libbie G. Parad,1999 *Affect Regulation Training* Matthias Berking,Brian Whitley,2014-08-30 Emotion Regulation is currently one of the most popular topics in clinical psychology Numerous studies demonstrate that deficits in emotion regulation skills are likely to help maintain various forms of psychological disorders Thus enhancing emotion regulation has become a major target in psychotherapeutic treatments For this purpose a number of therapeutic strategies have been developed and shown to be effective However for practitioners it is often difficult to decide which of these strategies they should use or how they can effectively combine empirically validated strategies Thus the authors developed the Affect Regulation Training as a transdiagnostic intervention which systematically integrates strategies from cognitive behavior therapy mindfulness based interventions emotion focused therapy and dialectical behavioral therapy The effectiveness of ART has been demonstrated in several high quality studies *The International Journal of Indian Psychology, Volume 3, Issue 2, No. 2* IJIP.In,2016-01-15
