National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Nuclear and Radiation
Studies Board,2017-03-27 Most countries in the world use the SI Syst me International also known as the metric system units
for radiation measurements in commercial and technical activities The United States in contrast uses a mix of SI and
conventional units for radiation measurements despite 30 year old national and international recommendations to exclusively
use SI Radiation professionals in the United States are faced with the need to understand both systems and make
conversions between the two In September 2016 the National Academies of Sciences Engineering and Medicine organized a
workshop to explore potential communication improvements associated with adopting the international system of units SI
units for radiation measurements in the United States Participants discussed potential improvements in the effectiveness of
responding to national and international radiation emergencies international experiences in adopting the exclusive use of SI
units of radiation measurements and steps needed to adopt the exclusive use of SI units in the US in terms of timing
implementation and ways to overcome or manage technical economic and policy barriers This publication summarizes the
presentations and discussions from the workshop
