Siamese Tragedy:

A Siamese Tragedy Walden F. Bello, Shea Cunningham, Kheng Poh Li, 1998 Thailand has come to be known as the Fifth Tiger With the Asian economic collapse of 1997 1998 this book poses the central question Is this merely a short term crisis or is there a real prospect of Thailand being pushed back into Third World status The International Monetary Fund has intervened with an irrelevant indeed damaging policy package that promises to determine the outcome *A Siamese Tragedy* argues that even before the collapse the Thai economy had feet of clay Walden Bello and his co authors show how vested interests local and international propelled the Thai people down a particular path which is unsustainable in terms of human exploitation social disruption ecological damage and economic fragility Thailand like the rest of the world needs to rethink the fundamentals of its economic model

Textures of Struggle Piya Pangsapa, 2011-05-02 Based on intensive ethnographic fieldwork in Thailand *Textures of Struggle* focuses on the experiences of Thai women who are employed at textile factories and examines how the all encompassing nature of wage work speaks to issues of worker accommodation and resistance within various factory settings Why are some women less tolerant of their working conditions than others How is it that women who have similar levels of education come from the same socioeconomic background and enter the same occupation nevertheless emerge with different experiences and reactions to their wage employment Women in the Thai apparel industry Piya Pangsapa finds have very different experiences of labor militancy and non militancy Through interviews with women at two kinds of factories one linked to the global economy through local capital investment and another through transnational capital Pangsapa examines issues of worker consciousness with a focus on the process by which women become activists She explores the different degrees of control and coercion employed by factory managers and shows how women were able to overcome conditions of adversity by relying on the close personal ties they developed with each other *Textures of Struggle* reveals what it is like for women to feel powerlessness and passivity in Thai sweatshops but also shows how they are equally able to resist and rebel

The South in World Politics C. Alden, S. Morphet, M. Vieira, 2010-01-20 *The South in World Politics* is a timely analysis of the influence and effectiveness of developing states in shaping the international order from the politics of the Cold War and North South confrontation to the contemporary challenges of globalization and the rising power of emerging economies

Southeast Asian Paper Tigers K. S. Jomo, 2013-04-03 This important collection is a timely contribution to the debate on the Asian financial crisis With chapters written by well established international experts in Asian economics this book constitutes a finely judged example of the varying opinions on the matter

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects

has resulted in devastating impacts on the human and environmental security of local populations. These effects are particularly evident in both Thailand and Myanmar. Burma, which is located at the crossroads of Asia, is increasingly engaged in the cross-border energy trade. Based on extensive fieldwork and theoretical analysis, this groundbreaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region. By comparing the nature of this activism under two very different political regimes, it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South's natural resources.

Alternative Capitalisms Robert Gwynne, Denis Shaw, Thomas Klak, 2014-05-12. This book aims to examine the effects of globalization and economic and political transformations in those parts of the world which are now regularly referred to as emerging regions. These are Latin America and the Caribbean, East Central Europe and the former Soviet Union, and East Asia. This book breaks new ground in three areas. First of all, it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory. Secondly, it explores the development trajectories and challenges of countries in this so-called emerging world, countries that will be crucial to the evolution of the world economy in the twenty-first century. Thirdly, it compares and contrasts the pathways of both economic and political change in the three world regions under focus. This is a unique approach in terms of books published in both geography and the social sciences. Within the context of the three world regions, the book combines historical and contemporary analysis of the evolving world system. In these regions, we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production, exchange, and regulation are evolving. The authors believe that at the present time, these processes have produced alternative capitalisms, economic and associated developments which, while assuredly capitalist, differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe.

Globalization or Empire? Jan Nederveen Pieterse, 2004-08-01. In this smart and concise examination of the trends driving contemporary globalization, Jan Nederveen Pieterse argues that the United States' pursuit of global primacy is based upon a complex melding of neoliberal economics and hegemonic politics. Do alternate capitalisms offer viable alternatives to the American way? *Globalization or Empire* looks at globalization with acuity and thoughtfulness and uncovers its underlying dramas.

The Village in Transition Kodai Harada, 2018-02-02. INTRODUCTION. Starting from the 1950s, Thailand had experienced unprecedented economic boom in the nation's history until the 1980s. The average annual growth in the 1960s was 8%, 7% in the 1970s, and 4.6% in the beginning of the 1980s. Thai people, especially those who are in the nation's capital Bangkok, enjoyed the economic boom and started to have modernized lifestyles. However, behind the scene of the national economic success, rural villages were forced to face predicament because of the urban-centered industrial economy based on neo-liberal economic beliefs. In light of

the historical context of the relationship between Thai community and the high powered state authority examining one specific community which is struggling to find a way of development in the globalized world today will be of great help to understand the contemporary notion of rural development in Thailand In this paper focus is centered on a village called Mae Kampong which has been under great influence of the Royal project and the Government in terms of development and yet has a great deal of potential for achieving a selfreliant way of community governance because of its traits as a traditional agrarian rural community This paper aims to examine the socio cultural changes that occurred in the village over the course of the contemporary development and ultimately the outlook of community self sufficiency and selfreliance deploying a realistic and empirical approach to look at the Thailand s contemporary phenomena happening in the rural communities Mae Kampong is the third village of seven villages in Huai Kaew sub district Mae On district Chiang Mai province Northern Thailand known as a major producer of Northern Thai traditional tea product called Mieng It is located east of Chiang Mai province about 50 kilometers from the city average 1 300 meters above the sea level It has been about 100 years since the first generation of this village that had been searching for suitable places for tea cultivation came from nearby areas to settle in the location and started to form the community Now the village has 134 households and 374 people in total The village consists of six clusters Pang Nok Pang Klang Pang Khon Pang Ton Pan Nai No 1 and Pang Nai No 2

Political Booms: Local Money And Power In Taiwan, East China, Thailand, And The Philippines Lynn T White,2009-06-10 Why have Taiwan rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically Do booms abet democracy Does the rise of middle classes promise future liberalization Why has Philippine democracy brought no boom and barely served the Filipino people This book unlike most previous studies shows that both the roots and results of growth are largely political rather than economic Specifically it pays attention to local not just national power networks that caused or prevented growth in the four places under consideration Violence has been common in these polities along with money Elections have contributed to socio political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non state local power affects elections By considering the effects on fair justice of local money and power largely from small and medium sized firms that emerge after agrarian reforms this book asks democrats to face squarely the extent to which electoral procedures fail to help ordinary citizens Students and scholars of Asia will all need this book as will students of the West whose methods have become parochial

Global America? Natan Sznaider,Rainer Winter,2004-03-01 Many contemporary issues cannot be readily or fully understood at the level of the nation state and the concept of globalization is used to develop understanding through the analysis of global transnational processes This volume explores the phenomenon of Americanization and its worldwide impact and the cultural consequences of globalization
