Siberia Problems And Prospects For Regional Development:

Siberia Alan Wood, 2022-12-09 First published in 1987 *Siberia* examines the developments in the different sectors of Siberian economy and discusses the role of this vast and little known region in the Soviet Union's overall economic and defence strategy. It surveys historical developments and the geography of the region and focuses on the key problem areas such as manpower shortage, the difficulties involved in exploiting the territory's natural resources, internal communications including the construction of the Baikal Amur Railway in the Far East and considers Siberia's place in the context of international relations and the world economy. This book is a must read for scholars of Russian history, Russian geopolitics, European politics, international relations and European history. *Maritime Claims in the Arctic* Erik Franckx, 2023-12-28 With the fundamental changes which occurred in the political structure of Europe and improved East-West relations in general, the Arctic has increasingly become the focal point of international attention during the last few years. Scientific research and environmental protection are areas which have already witnessed some form of international cooperation in the area. With this particular evolution in mind, a new look at the legal regime of navigation in the Arctic seems to be justified. While several other countries border on the Arctic, Canada and Russia have the most extensive shorelines and have shown keen interest in ensuring that their proper share of this area is not encroached by other countries. This book is thus generally restricted to an examination of the maritime boundaries that these states are claiming and the extent to which other states have recognized them. It also explores the need for greater international cooperation in this area, not only between the two main contenders but also with other countries that have shown a special interest in Arctic navigation and in the exploitation of resources of this area. *Negotiating the Arctic* E.C.H. Keskitalo, 2004-06-01 This work draws upon the history of Arctic development and the view of the Arctic in different states to explain how such a discourse has manifested itself in current broader cooperation across eight statistics analysis based on organization developments from the late 1970s to the present shows that international region discourse has largely been forwarded through the extensive role of North American, particularly Canadian networks and deriving from their frontier based conceptualization of the north. **Critical Companion to the Russian Revolution, 1914-1921** Edward Acton, V. I. Cherniiaev, V. I. Cherniiaev, William G. Rosenberg, 1997 Essays by 46 historians reflect the impact of the fall of the Soviet Union on the study of the revolution that birthed it, including better access to archives and new opportunities for collaborations between Russian and other specialists. They cover the revolution as event, actors and the question of agency, parties, movements and ideologies, institutions and institutional cultures, social groups, identities, cultures and the question of consciousness, economic issues and problems of everyday life and nationality and regional questions. Annotation copyrighted by Book News Inc. Portland, OR. Russia's Arctic Strategies and the Future of the Far North Marlene Laruelle, 2015-01-28 This book offers the first comprehensive examination of Russia's Arctic strategy, ranging from climate change issues and territorial disputes to energy policy and

domestic challenges As the receding polar ice increases the accessibility of the Arctic region rival powers have been manoeuvring for geopolitical and resource security Geographically Russia controls half of the Arctic coastline 40 percent of the land area beyond the Circumpolar North and three quarters of the Arctic population In total the sea and land surface area of the Russian Arctic is about 6 million square kilometres Economically as much as 20 percent of Russia's GDP and its total exports is generated north of the Arctic Circle In terms of resources about 95 percent of its gas 75 percent of its oil 96 percent of its platinum 90 percent of its nickel and cobalt and 60 percent of its copper reserves are found in Arctic and Sub Arctic regions Add to this the riches of the continental shelf seabed and waters ranging from rare earth minerals to fish stocks After a spike of aggressive rhetoric when Russia planted its flag in the Arctic seabed in 2007 Moscow has attempted to strengthen its position as a key factor in developing an international consensus concerning a region where its relative advantages are manifest despite its diminishing military technological and human capacities

The Soviet Far East Allan Rodgers, 2023-06-14 The Soviet Far East 1990 examines the largest economic region in the Soviet Union the Far East The region is explored in all its geographical and economic complexity Chapters on the state of its development under Gorbachev and his programme of investment are supplemented by examinations of the history of its settlement analysis of its unique environment and the threats which economic growth might pose for it and of the region's vital strategic significance to the Soviet Union

In the Soviet House of Culture Bruce Grant, 2020-10-06 At the outset of the twentieth century the Nivkhi of Sakhalin Island were a small population of fishermen under Russian dominion and an Asian cultural sway The turbulence of the decades that followed would transform them dramatically While Russian missionaries hounded them for their pagan ways Lenin praised them while Stalin routed them in purges Khrushchev gave them respite and while Brezhnev organized complex resettlement campaigns Gorbachev pronounced that they were free to resume a traditional life But what is tradition after seven decades of building a Soviet world Based on years of research in the former Soviet Union Bruce Grant's book draws upon Nivkhi interviews newly opened archives and rarely translated Soviet ethnographic texts to examine the effects of this remarkable state venture in the construction of identity With a keen sensitivity Grant explores the often paradoxical participation by Nivkhi in these shifting waves of Sovietization and poses questions about how cultural identity is constituted and reconstituted restructured and dismantled Part chronicle of modernization part saga of memory and forgetting In the Soviet House of Culture is an interpretive ethnography of one people's attempts to recapture the past as they look toward the future This is a book that will appeal to anthropologists and historians alike as well as to anyone who is interested in the people and politics of the former Soviet Union

Sustaining Russia's Arctic Cities Robert W. Orttung, 2016-11-01 Urban areas in Arctic Russia are experiencing unprecedented social and ecological change This collection outlines the key challenges that city managers will face in navigating this shifting political economic social and environmental terrain In particular the volume examines how energy production drives a boom bust cycle in the Arctic economy explores how

migrants from Muslim cultures are reshaping the social fabric of northern cities and provides a detailed analysis of climate change and its impact on urban and industrial infrastructure **The Blackwell Encyclopedia of the Russian Revolution**
Harold Shukman,1994-12-05 This single volume is an authoritative and accessible guide to the background and progress of the Revolution written by a team of over forty specialist contributors Beginning with the radical movements of the mid nineteenth century the Encyclopedia covers the development of the revolutionary movement created by the intelligentsia the condition of the peasants that of the working class and of the army the role of the Tsarist secret police the agents provocateurs the revolutionaries own underground A substantial section is devoted to the emergence of liberation movements among the national minorities of the borderlands The Encyclopedia also considers the formation of Soviet institutions and examines too the emergence of revolutionary culture well before 1917 the avant garde in art and theatre and the relationship to the revolution of three major Russian writers Blok Gorky and Mayakovsky Siberian Village Bella Bychkova Jordan,2001
